Infratex lead research

25 October 2026 | Growency

74 supplied rows · 56 unique contacts/companies · 18 exact duplicate records. The first CSV contains 50 rows and the second 24. This is six fewer input rows than the expected 80; the repeated records add no new contacts. All 74 rows are accounted for below and in the CSV.

Research result: 9 qualified for an exploratory document conversation, 40 review needed, 7 excluded from this campaign. 24 reports contain a proposed document-based help sentence; this includes conditional and out-of-geography examples. It is not a count of send-ready contacts. Remaining records: 0.

The current client PDF says to cast a wide net among fintech firms, with Europe as the location filter. Accordingly, firms without a confirmed document use remain visible for review. Direct lenders, investment groups, solar businesses and possible partners are tagged separately. Turkey is left for geography review; no EU-only assumption was applied.

Reading the reports: business and document observations are linked to the reviewed public page. Contact names, emails, job titles, employee counts and provider email labels come from the supplied Apollo exports unless explicitly stated otherwise. Their original dates were not established. A LinkedIn link is a supplied identity reference, not proof that the profile was inspected or that the role is current. Employee figures are provider estimates, not audited counts.

Status meaning: qualified means enough European company and document evidence for an exploratory conversation, subject to checking the contact's current role. It does not mean a qualified meeting, buyer intent, budget, available project, email deliverability or integration readiness. Review needed means a material fact or use case remains unresolved. Excluded means outside the campaign on the available company-location evidence, not a claim that no European subsidiary can exist.

Every help sentence is a proposed application. No existing errors, manual work, savings, accuracy, integrations or need to replace a provider is assumed. For companies already processing documents, discuss a difficult format or new requirement rather than presume their current system is inadequate.

Sources & Coverage

- **Used:** both supplied Apollo CSVs for the exact working set and contact fields; the current Infratex client PDF for campaign rules; public company product/help/legal pages linked within each report, checked on 25 October 2026.

- **Unavailable or limited:** some homepages were blocked or yielded no usable text. Where this matters, the report attributes the information to Apollo or indexed official material. Current roles are supplied-only except Victor Bart, whose official team listing was checked. Existing extraction tools, monthly volumes, budgets and buying timelines were generally not public. No live Apollo refresh or deliverability check was performed.

- **Coverage:** all 74 supplied rows, representing 56 unique contacts at 56 companies. Company research was reused for 18 exact duplicates. This is complete within the supplied files, not an exhaustive market search. Direct public-page checks are bounded and may miss unpublished document workflows.

R001 · Particula · Carsten Hermann

Financial data / digital-asset risk | Apollo employees: 25 | Email supplied: carsten.hermann@particula.io

Input: apollo-contacts-export.csv, data row 1 (CSV row 2).

Location: Germany in Apollo; operating entity not independently confirmed in this pass.

- **Business:** Rates and monitors tokenised assets for institutional users.
- **Document research:** Its methodology incorporates verified issuer documentation alongside public disclosures when maintaining risk scores. Source
- **Contact:** Co-Founder & CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take key facts from issuer documents and put them into Particula's risk-review records.
- **Fit:** REVIEW NEEDED. Relevant document input; exact document types, current parser and European purchasing entity still need confirmation.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R002 · YUKKA · Nuria Castello

Financial research / news intelligence | Apollo employees: 31 | Email supplied: nbc@yukkalab.de

Input: apollo-contacts-export.csv, data row 2 (CSV row 3); apollo-contacts-export (1).csv, data row 19 (CSV row 20).

Location: Berlin address published on the company website.

- **Business:** Turns financial news into sentiment, event and risk signals for investment and risk teams.
- **Document research:** Its Quant API analyses unstructured news; the website describes licensed and online articles as inputs. Source
- **Contact:** Head of Artificial Intelligence in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could turn incoming news articles into searchable text for YUKKA's existing analysis, if a document intake gap exists.
- **Fit:** REVIEW NEEDED. Adjacent fit. YUKKA already builds its own language models; PDF intake, unmet need and willingness to use another component are unconfirmed.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R003 · Elucidate · Filipe Garcia

Financial software / compliance | Apollo employees: 15 | Email supplied: filipe@elucidate.co

Input: apollo-contacts-export.csv, data row 3 (CSV row 4).

Location: Website identifies Elucidate GmbH in Berlin, Germany.

- **Business:** Builds financial-crime risk and compliance software for financial institutions.
- **Document research:** The product page explicitly describes parsing KYC packs and case files into structured information. Source
- **Contact:** Founder and CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take customer and company details from KYC packs and put them into Elucidate's case-review fields.
- **Fit:** QUALIFIED. Clear European software and document fit. Existing parsing is counterevidence: test difficult examples rather than assume replacement demand.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R004 · CobranzaOnline.com · Luis Briones

Debt collection / outside geography | Apollo employees: 13 | Email supplied: lbriones@cobranzaonline.com

Input: apollo-contacts-export.csv, data row 4 (CSV row 5); apollo-contacts-export (1).csv, data row 20 (CSV row 21).

Location: Chile in Apollo; local Chilean collections context on the website.

- **Business:** Provides collections for unpaid business invoices in Chile.
- **Document research:** Its site asks customers to upload unpaid invoices and describes collection of invoices issued to businesses. Source
- **Contact:** Fundador y CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take debtor names, invoice amounts and due dates from uploaded invoices and prepare collection records.
- **Fit:** EXCLUDED. Document workflow exists, but Apollo identifies a Chilean company and the site describes its local collections market. Outside Europe campaign.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: outside geography on the available company evidence.

R005 · Assetera · Dotun Rominiyi

Financial software / tokenised securities | Apollo employees: 27 | Email supplied: dr@assetera.com

Input: apollo-contacts-export.csv, data row 5 (CSV row 6); apollo-contacts-export (1).csv, data row 21 (CSV row 22).

Location: Austria in Apollo; website describes its Austrian licence.

- **Business:** Runs a platform for issuing and trading tokenised securities, including an institutional API.
- **Document research:** The website describes legal setup and tokenisation, but the bounded check did not establish an input document or extraction process. Source
- **Contact:** CTO & CPO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European fintech is plausible; identify a real issuer-document intake task before writing a parser-focused opener.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R006 · MPower Ventures AG · Alejandro Jimenez

Solar distribution / separate direct-buyer lane | Apollo employees: 62 | Email supplied: alejandro@mpower.africa

Input: apollo-contacts-export.csv, data row 6 (CSV row 7).

Location: Swiss company location is supplied by Apollo; relevant purchasing entity unconfirmed.

- **Business:** Supplies solar and storage systems with financing and support for African businesses.
- **Document research:** The public page describes installations and energy products, without showing recurring invoice or financial-document intake. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Apollo lists Switzerland, while the website emphasises African operations. Confirm the European entity and a document task; this is a different buyer lane.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R007 · TradeBridge · Stephanie Frackowiak

Lending / supply-chain finance | Apollo employees: 59 | Email supplied: stephanie@tradebridge.com

Input: apollo-contacts-export.csv, data row 7 (CSV row 8).

Location: The official FAQ gives a London office alongside international offices.

- **Business:** Provides working-capital and supply-chain financing.
- **Document research:** Its supplier FAQ explains that approved invoices appear in a portal for early payment and reconciliation; the article was updated in January 2020. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take supplier names, amounts and due dates from invoices and prepare them for funding review, if PDFs are accepted.
- **Fit:** REVIEW NEEDED. Concrete invoice workflow, but confirm it remains current and whether inputs are documents or already structured payment files.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R008 · FINx1 · James Ronayne

Financial software / banking platform | Apollo employees: 25 | Email supplied: james@finxone.com

Input: apollo-contacts-export.csv, data row 8 (CSV row 9); apollo-contacts-export (1).csv, data row 12 (CSV row 13).

Location: Website identifies FINx1 Ltd as registered in England and Wales.

- **Business:** Provides a platform for launching banking and fintech applications.
- **Document research:** The site describes customer-facing applications, compliance and back-office reporting, without identifying an incoming document type. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Software and technical contact fit the broad campaign. Need one real customer-document intake example before selecting an angle.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R009 · Payout · Erik Mocny

Payments / onboarding | Apollo employees: 20 | Email supplied: erik.mocny@payout.one

Input: apollo-contacts-export.csv, data row 9 (CSV row 10); apollo-contacts-export (1).csv, data row 13 (CSV row 14).

Location: The KYC guide identifies Payout a.s. in Zilina, Slovakia.

- **Business:** Provides payment services and customer onboarding.
- **Document research:** Its official KYC guide identifies photo ID and address documents as required identification inputs. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take names and addresses from supporting KYC documents and prepare fields for Payout's onboarding review.
- **Fit:** QUALIFIED. European entity and document intake are supported. Existing verification tools, review volumes and extraction gaps remain unknown.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R010 · iPay.ua · Mykyta Mokrynskyi

Payments / merchant onboarding | Apollo employees: 53 | Email supplied: mokrynskyi@ipay.ua

Input: apollo-contacts-export.csv, data row 10 (CSV row 11).

Location: Official contact page lists Kyiv, Ukraine: https://ecom.ipay.ua/en/contacts

- **Business:** Provides online payment acceptance for merchants in Ukraine.
- **Document research:** Its connection guide requires company founding documents, submitted on paper or through electronic document services, before contracting. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take registration details from merchant founding documents and prepare the fields needed for onboarding review.
- **Fit:** QUALIFIED. Real European fintech document workflow. Confirm whether existing electronic documents already supply structured fields and who owns exceptions.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R011 · Maverix · Adi Saric

Investment products / structuring | Apollo employees: 82 | Email supplied: adi.saric@mavx.com

Input: apollo-contacts-export.csv, data row 11 (CSV row 12).

Location: Switzerland in Apollo; website also lists a French operating company.

- **Business:** Structures investment products for asset managers, banks and institutional clients.
- **Document research:** Its structured-products page describes access to issuers and investment structures; no client-document intake was established. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Financial-services relevance alone is insufficient. The observed upload form is for job applications and must not be used as the sales angle.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R012 · Schuman Financial · Stefan Crnojevic

Stablecoin issuer / financial infrastructure | Apollo employees: 13 | Email supplied: stefan@schuman.io

Input: apollo-contacts-export.csv, data row 12 (CSV row 13); apollo-contacts-export (1).csv, data row 11 (CSV row 12).

Location: Website identifies Swiss parent Schuman Financial AG and French subsidiary Salvus SAS.

- **Business:** Issues the EURØP euro stablecoin and develops related financial infrastructure.
- **Document research:** The website publishes quarterly reserve attestations; these are reports it publishes, not evidence of incoming borrower-document processing. Source
- **Contact:** VP of Engineering in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could make reserve-attestation reports searchable for internal checks, if the team has a recurring review need.
- **Fit:** REVIEW NEEDED. Specific documents exist, but an internal intake problem and relevant evaluation owner are unconfirmed.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R013 · Epipoli S.p.A. · Andrea Sidoti

Payments / gift cards | Apollo employees: 80 | Email supplied: andrea.sidoti@epipoli.com

Input: apollo-contacts-export.csv, data row 13 (CSV row 14).

Location: Website gives the company's Milan address in Italy.

- **Business:** Provides prepaid cards, gift cards, loyalty and incentive services.
- **Document research:** The website centres on card distribution and engagement products; no recurring input document task was found. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Italian fintech fits the broad geography and sector. Need an actual operational document workflow rather than a generic AI pitch.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R014 · European Merchant Bank | EMBank · Mehmet Akdas

Direct lender / separate buyer lane | Apollo employees: 74 | Email supplied: mehmet.akdas@em.bank

Input: apollo-contacts-export.csv, data row 14 (CSV row 15).

Location: Lithuania in Apollo; site identifies European Merchant Bank UAB.

- **Business:** Provides banking and lending services to businesses and fintechs.
- **Document research:** Its overdraft application explicitly requires financial statements, a credit application and a description of the loan purpose. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take revenue, profit and debt figures from applicants' financial statements and prepare a credit-review table.
- **Fit:** REVIEW NEEDED. Strong document hook, but this is a bank buying its own workflow. Confirm the direct-lender lane and technical plus credit-process owners.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Low: the stated material gap prevents qualification.

R015 · ABF Pay · Andrei Kibak

Payments / outside geography | Apollo employees: 17 | Email supplied: andrei.kibak@abfpay.com

Input: apollo-contacts-export.csv, data row 15 (CSV row 16); apollo-contacts-export (1).csv, data row 3 (CSV row 4).

Location: Canada in Apollo and on the official website.

- **Business:** Provides cross-border payments and personal and business wallets.
- **Document research:** Its FAQ requires ID and proof-of-address uploads, reviewed by its compliance team. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take names and addresses from supporting account documents and prepare them for compliance review.
- **Fit:** EXCLUDED. The website identifies Canadian registration and operations. A CTO located in Poland does not establish a European buying entity.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: outside geography on the available company evidence.

R016 · Comfi.ai · Alexander Mushta

Lending / outside geography | Apollo employees: 39 | Email supplied: alex@comfi.ai

Input: apollo-contacts-export.csv, data row 16 (CSV row 17); apollo-contacts-export (1).csv, data row 4 (CSV row 5).

Location: United Arab Emirates in Apollo; UAE business focus on the company site.

- **Business:** Provides invoice financing and B2B credit for businesses in the UAE.
- **Document research:** Its application lists invoices, six months of bank statements, trade licences and signatory identification among required documents. Source
- **Contact:** Co-founder and CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take invoice details and bank-statement figures and put them into Comfi's credit-review records.
- **Fit:** EXCLUDED. Clear document fit, but the company targets the UAE. A Latvia-based contact does not satisfy the European-company filter.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: outside geography on the available company evidence.

R017 · La Fabrique by CA · Victor Bart

Fintech venture studio / possible partner | Apollo employees: 28 | Email supplied: victor.bart@lafabriquebyca.com

Input: apollo-contacts-export.csv, data row 17 (CSV row 18).

Location: France in Apollo; official materials identify the Credit Agricole venture studio.

- **Business:** Builds fintech ventures as part of the Credit Agricole group.
- **Document research:** The official team page confirms Victor Bart as Chief Technical Officer; no specific live document-automation project was established. Source
- **Contact:** Chief Technology Officer in Apollo. Official team listing confirms this role. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Credible technical route, but a venture studio is not automatically an implementation partner. Identify one portfolio project and its document owner.

Evidence: Public page read. Identity: High: official team page confirms the named CTO. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R018 · ShareIn · Andrew Pickett

Financial software / investment platforms | Apollo employees: 21 | Email supplied: andrew@sharein.com

Input: apollo-contacts-export.csv, data row 18 (CSV row 19); apollo-contacts-export (1).csv, data row 7 (CSV row 8).

Location: Website identifies ShareIn Limited and its registered office in Edinburgh, Scotland.

- **Business:** Provides white-label investment platforms and investor administration.
- **Document research:** Its platform gives investors document access and lets administrators manage deal documents; no extraction feature is established. Source
- **Contact:** CTO and Co-Founder in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could make deal and investor documents searchable inside ShareIn's portal, if customers need answers from those files.
- **Fit:** QUALIFIED. European software and a real document surface are established. Confirm customer demand, permitted document access and current search capability.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R019 · Ephelia Group · Ermanno Attardo

Financial infrastructure / compliance | Apollo employees: 21 | Email supplied: e.attardo@epheliagroup.com

Input: apollo-contacts-export.csv, data row 19 (CSV row 20); apollo-contacts-export (1).csv, data row 6 (CSV row 7).

Location: UK company and Switzerland-based contact in Apollo; multi-entity buying route unresolved.

- **Business:** Apollo describes fintech infrastructure, payments and onboarding; indexed official material also describes KYC/KYB services.
- **Document research:** The accessible live homepage exposed only its title. No specific document type or current deployed extraction task could be verified. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Do not turn the indexed AI-compliance description into evidence of a document workflow. Confirm entity, current product and one input document.

Evidence: Limited access; supplied/indexed claims labelled. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R020 · Hectarea.io · Adime Amoukou

Investment platform / agricultural land | Apollo employees: 15 | Email supplied: adime@hectarea.io

Input: apollo-contacts-export.csv, data row 20 (CSV row 21).

Location: France in Apollo; site describes French farmland projects and AMF filings.

- **Business:** Lets investors finance agricultural land through bond investments.
- **Document research:** Its FAQ says an information document is filed with the AMF for each land acquisition. Source
- **Contact:** Co-fondateur & CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could make each land project's information document searchable so staff can retrieve its stated terms with source references.
- **Fit:** REVIEW NEEDED. Real document exists, but production of disclosures does not establish an ingestion bottleneck or buyer demand.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R021 · Huddlestock · Ramtin Matin

Financial software / investment infrastructure | Apollo employees: 25 | Email supplied: ramtin.matin@huddlestock.com

Input: apollo-contacts-export.csv, data row 21 (CSV row 22).

Location: Norway in Apollo; relevant contracting entity not independently checked.

- **Business:** Provides investment and trading infrastructure for fintechs and financial institutions.
- **Document research:** Its page describes regulated onboarding and reporting, but no incoming financial document type was confirmed. Source
- **Contact:** COO and CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Plausible broad fintech fit. Identify a document used in an actual onboarding or investment workflow before personalising.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R022 · Wealthyhood · Konstantinos Faliagkas

Consumer investment platform | Apollo employees: 27 | Email supplied: kostas@wealthyhood.com

Input: apollo-contacts-export.csv, data row 22 (CSV row 23).

Location: The website identifies UK and Greek operating entities.

- **Business:** Provides an investing application and savings products.
- **Document research:** The site establishes an investment product and UK/Greek entities, without showing a recurring document-ingestion task. Source
- **Contact:** Co-Founder & CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European fintech, but investment products alone do not justify a parser pitch. Confirm a supported document task first.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R023 · LUX Rewards · Ash Dey

Payments / loyalty | Apollo employees: 15 | Email supplied: ash@luxrewards.co.uk

Input: apollo-contacts-export.csv, data row 23 (CSV row 24).

Location: UK in Apollo; the site describes UK, US and European distribution partners.

- **Business:** Connects merchants to bank, airline and employee-benefit audiences through rewards programmes.
- **Document research:** Its reporting dashboard tracks programme results; no incoming document or extraction process was identified. Source
- **Contact:** Co-founder & COO (Part of Lyfe Technology) in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Weak document fit in this pass. The supplied contact is a COO, so technical evaluation ownership also needs checking.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R024 · ETNA · Kirill Zhuk

Financial software / outside geography | Apollo employees: 89 | Email supplied: kirill.zhuk@etnatrader.com

Input: apollo-contacts-export.csv, data row 24 (CSV row 25).

Location: United States in Apollo; no European purchasing entity established.

- **Business:** Provides white-label brokerage, advisor and trading software.
- **Document research:** Its website describes onboarding, KYC integrations and back-office reporting; no incoming document type was established. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** EXCLUDED. Apollo identifies a US company. A European contact location would not establish a qualifying European operating entity.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Medium: outside geography on the available company evidence.

R025 · Hesapkurdu · Mete Evrenol

Financial comparison / geography review | Apollo employees: 88 | Email supplied: mete@hesapkurdu.com

Input: apollo-contacts-export.csv, data row 25 (CSV row 26); apollo-contacts-export (1).csv, data row 5 (CSV row 6).

Location: Turkey in Apollo and the site's market context; inclusion within campaign geography is unresolved.

- **Business:** Compares financial products and passes applications to banks and financial institutions in Turkey.
- **Document research:** Its disclaimer describes comparison and application referral, without establishing that it processes applicants' supporting documents. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Confirm whether Turkey is included in this campaign and who handles supporting documents. Do not assume the comparison platform underwrites loans.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R026 · KiteEdge · Nick Sturrock

Financial research / credit documents | Apollo employees: 18 | Email supplied: nick@kiteedge.co.uk

Input: apollo-contacts-export.csv, data row 26 (CSV row 27).

Location: Website identifies Kiteedge Ltd and a registered office in Radlett, United Kingdom.

- **Business:** Builds research and decision tools around governed document sources.
- **Document research:** Its Credit Memo workflow includes covenant extraction and a structured appendix; research outputs link claims to source passages. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take covenant terms from credit documents and put them into KiteEdge's source-linked credit-memo appendix.
- **Fit:** QUALIFIED. Strong European document-software fit. Existing extraction means a comparison needs a specific difficult document or unmet requirement.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R027 · Incard · Adam Batten

Financial software / expense documents | Apollo employees: 46 | Email supplied: adam.b@incard.co

Input: apollo-contacts-export.csv, data row 27 (CSV row 28); apollo-contacts-export (1).csv, data row 9 (CSV row 10).

Location: Official site identifies Incard Ltd's global headquarters in London.

- **Business:** Provides business accounts, cards and finance tools for online businesses.
- **Document research:** Its integrations page describes retrieving and matching Meta Ads, Shopify and TikTok receipts from Gmail. Source
- **Contact:** Chief Technology Officer (CTO) in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take merchant names, dates and amounts from captured receipts and prepare them for Incard's expense matching.
- **Fit:** QUALIFIED. Specific live document feature and UK entity. Confirm exception formats and current extraction quality; do not assume the existing feature needs replacing.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R028 · Quanted · David Forino

Financial data / investment research | Apollo employees: 11 | Email supplied: d.forino@quanted.com

Input: apollo-contacts-export.csv, data row 28 (CSV row 29); apollo-contacts-export (1).csv, data row 10 (CSV row 11).

Location: Website publishes a London address.

- **Business:** Helps funds discover and evaluate datasets from external vendors.
- **Document research:** The site describes feature analysis and data discovery; this does not establish ingestion of PDF reports or financial statements. Source
- **Contact:** Co-Founder and CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Good research-sector adjacency but unsupported document angle. Check whether any vendor data actually arrives in documents.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R029 · FAKTUS · Fares Soltani

Financial software / invoice financing | Apollo employees: 32 | Email supplied: fares.soltani@faktus.eu

Input: apollo-contacts-export.csv, data row 29 (CSV row 30).

Location: Website gives FAKTUS's Paris registration and registered address.

- **Business:** Provides construction businesses with invoice management and financing tools.
- **Document research:** Its page explicitly describes invoice validation, construction progress billings and submission tracking through Chorus Pro. Source
- **Contact:** Head of AI Innovation in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take amounts and project details from construction invoices and put them into FAKTUS's validation and financing fields.
- **Fit:** QUALIFIED. Strong European document workflow and relevant AI contact. Confirm current checks, unstructured formats and any need beyond existing automation.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R030 · CLOWD9 | Certified B Corp™ · Paul Hansford

Payments / issuer processing | Apollo employees: 47 | Email supplied: paul.hansford@clowd9.com

Input: apollo-contacts-export.csv, data row 30 (CSV row 31).

Location: UK in Apollo; contracting entity not independently verified in this pass.

- **Business:** Provides cloud-based issuer-processing infrastructure.
- **Document research:** The reviewed site presents card-processing services, without establishing document intake or extraction. Source
- **Contact:** Chief Technology Officer (CTO) in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Technical buyer and fintech sector fit broadly; card processing is not evidence of a document workload.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R031 · Allocations · Guillaume Duhan

Fund software / outside geography | Apollo employees: 46 | Email supplied: guillaume@allocations.com

Input: apollo-contacts-export.csv, data row 31 (CSV row 32); apollo-contacts-export (1).csv, data row 1 (CSV row 2).

Location: United States in Apollo; European operating entity not established.

- **Business:** Automates formation and administration of SPVs and private funds.
- **Document research:** Its platform includes deal rooms with documents and investor onboarding with KYC, accreditation and signatures. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take investor details from supporting onboarding documents and prepare fields for a fund's review process.
- **Fit:** EXCLUDED. Apollo identifies a US company. The supplied CTO's French location does not establish a European buying entity.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Medium: outside geography on the available company evidence.

R032 · ESTO Group · Maksym Kulia

Consumer credit / BNPL | Apollo employees: 100 | Email supplied: maksym.kulia@esto.eu

Input: apollo-contacts-export.csv, data row 32 (CSV row 33).

Location: Website identifies operations in Estonia, Latvia and Lithuania.

- **Business:** Provides credit, instalments and pay-later products in the Baltic region.
- **Document research:** The site confirms lending products but does not identify a recurring incoming document or uploaded statement workflow. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European lending adjacency is clear. Establish whether underwriting uses documents or already connected data before pitching extraction.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R033 · Coinscrap Finance · Oscar Barba Seara

Financial software / transaction analytics | Apollo employees: 27 | Email supplied: oscar.barba@coinscrap.com

Input: apollo-contacts-export.csv, data row 33 (CSV row 34).

Location: Spain in Apollo; entity location not independently verified.

- **Business:** Apollo describes banking transaction enrichment and personal-finance tools; indexed official product results support that positioning.

- **Document research:** Direct product-page access failed. No document input was verified; transaction categorisation must not be described as PDF parsing. Source

- **Contact:** CTO & Cofounder in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn

- **How Infratex could help:** No clear document use case found.

- **Fit:** REVIEW NEEDED. Weak document fit and limited source access. Keep the business description attributed rather than treating it as fully checked.

Evidence: Limited access; supplied/indexed claims labelled. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R034 · Suits Me · Justin Taylor

Payments / supporting identity documents | Apollo employees: 86 | Email supplied: jtaylor@suitsmecard.com

Input: apollo-contacts-export.csv, data row 34 (CSV row 35).

Location: UK in Apollo and the account-service context; legal entity not independently checked.

- **Business:** Provides a UK account and card service with alternative identification routes.

- **Document research:** Its help page accepts combinations of HMRC letters, payslips, bank statements and other supporting documents for eligible applicants without photo ID. Source

- **Contact:** Group CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn

- **How Infratex could help:** Infratex could take names, addresses and dates from supporting letters and statements and prepare them for Suits Me's review.

- **Fit:** REVIEW NEEDED. Strong document hook. Confirm the current UK contracting entity, exception volumes and existing verification provider before qualification.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Low: the stated material gap prevents qualification.

R035 · Lifecheq · Daniel Lebrero

Financial advice software / outside geography | Apollo employees: 93 | Email supplied: daniel.lebrero@lifecheq.co.za

Input: apollo-contacts-export.csv, data row 35 (CSV row 36).

Location: South Africa in Apollo; European purchasing entity not established.

- **Business:** Provides technology and processes for financial advice delivery.

- **Document research:** The website describes adviser productivity and policy processing, without naming an incoming document type. Source

- **Contact:** SVP Engineering in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn

- **How Infratex could help:** No clear document use case found.

- **Fit:** EXCLUDED. Apollo identifies a South African company and the site identifies Lifecheq (Pty) Ltd. No qualifying European entity established.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Medium: outside geography on the available company evidence.

R036 · SnapSwap International S.A. · Maksim Romanenko

Financial software / onboarding | Apollo employees: 16 | Email supplied: m.romanenko@snapswap.eu

Input: apollo-contacts-export.csv, data row 36 (CSV row 37).

Location: Website identifies Wallee Europe S.A. in Luxembourg.

- **Business:** Provides payment and onboarding products; its site now points to Wallee Europe S.A.
- **Document research:** The Snaprove product checks ID-document authenticity and compares selfies with ID photos as part of onboarding. Source
- **Contact:** Head of Engineering in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take agreed fields from onboarding documents and prepare them for review alongside the existing identity checks.
- **Fit:** QUALIFIED. Real European document software. Confirm the current Wallee/SnapSwap product owner and procurement route; extraction does not replace biometric or fraud checks.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

R037 · ALPHA10X · Ludovic Samper

Financial decision intelligence / entity review | Apollo employees: 36 | Email supplied: ludovic@alpha10x.com

Input: apollo-contacts-export.csv, data row 37 (CSV row 38); apollo-contacts-export (1).csv, data row 17 (CSV row 18).

Location: Official site: Dubai headquarters plus French research presence; Apollo: France.

- **Business:** Provides predictive decision intelligence for private markets.
- **Document research:** The current website says the company is headquartered in Dubai with applied research in the South of France, conflicting with Apollo's France company field. Source
- **Contact:** Head of Artificial Intelligence in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Resolve the French buying entity and an actual document input. The French research location alone does not qualify the group for the campaign.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R038 · M&M Fintech Limited · Bilyana Zdravkova

Financial software / compliance infrastructure | Apollo employees: 32 | Email supplied: bilyana.zdravkova@mmfintech.io

Input: apollo-contacts-export.csv, data row 38 (CSV row 39).

Location: Website identifies M&M Fintech Ltd as registered in England and Wales.

- **Business:** Builds and operates open-banking, payment and compliance technology services.
- **Document research:** The site describes KYC/KYB, AML and regulatory reporting, without identifying the documents used in those processes. Source
- **Contact:** Engineering Manager in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. UK technical capability is supported. Confirm one live document task and whether this is a product integration or a client-delivery project.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R039 · Banky · Oliver Dolan

Consumer lending / connected bank data | Apollo employees: 30 | Email supplied: oliver.dolan@banky.se

Input: apollo-contacts-export.csv, data row 39 (CSV row 40).

Location: Sweden in Apollo; site addresses Swedish customers and BankID usage.

- **Business:** Provides loans and personal-finance services in Sweden.
- **Document research:** Its application flow asks users to authenticate with BankID and connect a bank account; that is evidence of connected data, not bank-statement uploads. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Do not pitch statement extraction without evidence. Ask whether document-only exceptions exist in addition to the connected-account flow.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R040 · Estating · Pablo Montoliu Zunzunegui

Financial platform / private-market documents | Apollo employees: 18 | Email supplied: pablo.montoliu@estating.com

Input: apollo-contacts-export.csv, data row 40 (CSV row 41).

Location: Luxembourg in Apollo; current buying entity not independently verified.

- **Business:** Provides real-estate and private-market investment access through wealth-management channels.
- **Document research:** The site describes deal structuring, subscription execution, custody onboarding and inconsistent documentation across jurisdictions. Source
- **Contact:** Chief Information, Innovation & Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take investor and deal terms from subscription documents and prepare structured records for Estating's onboarding team.
- **Fit:** REVIEW NEEDED. Relevant document context. Confirm exact input files, European contracting entity and whether the existing platform already meets the need.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R041 · De.Fi · Artem Bondarenko

DeFi / outside geography | Apollo employees: 22 | Email supplied: artemb@de.fi

Input: apollo-contacts-export.csv, data row 41 (CSV row 42).

Location: Panama in Apollo; European purchasing entity not established.

- **Business:** Apollo describes a decentralised-finance portfolio and security platform.
- **Document research:** The homepage returned no readable text. No actual document input or extraction task was verified. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** EXCLUDED. Apollo identifies Panama and no European operating entity was established. Preserve the contact without inventing a compliance-document angle.

Evidence: Limited access; supplied/indexed claims labelled. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Medium: outside geography on the available company evidence.

R042 · Transfer Galaxy · Mansoor Ahmad

Payments / remittances | Apollo employees: 47 | Email supplied: mansoor.ahmad@transfergalaxy.com

Input: apollo-contacts-export.csv, data row 42 (CSV row 43).

Location: Website identifies Transfer Galaxy AB and its address in Orebro, Sweden.

- **Business:** Provides international money transfers.
- **Document research:** Its website establishes the payment service and Swedish entity, but no recurring document intake task was identified. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European fintech fits the broad brief. A KYC use case should be supported by a real document list rather than assumed from the sector.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R043 · Advanced Bitcoin Technologies AG · Tobias Zander

Digital payments / crypto infrastructure | Apollo employees: 23 | Email supplied: tobias.zander@abt-ag.com

Input: apollo-contacts-export.csv, data row 43 (CSV row 44).

Location: Germany in Apollo; official site identifies the German AG.

- **Business:** Develops infrastructure connecting fiat, crypto and digital currencies.
- **Document research:** Its official page describes multi-currency transaction products. Publishing investor materials does not establish customer-document processing. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European fintech adjacency, but live document workload and the supplied CTO's current responsibility are unconfirmed.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R044 · Levl · Shaun McGlinchey

Payments / stablecoin infrastructure | Apollo employees: 24 | Email supplied: shaun.mcglinchey@levl.ch

Input: apollo-contacts-export.csv, data row 44 (CSV row 45); apollo-contacts-export (1).csv, data row 23 (CSV row 24).

Location: Official site: Switzerland and Canada; Apollo: United States.

- **Business:** Provides stablecoin and fiat payment infrastructure, including named accounts and remittances.
- **Document research:** The legal footer identifies Swiss Levl GmbH and Canadian Levl Finance Limited, conflicting with Apollo's US company field. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Resolve the Swiss purchasing entity and identify one document workflow. Do not exclude solely on Apollo's US field or infer location from the domain.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R045 · Yavin · Alfred Bourely

Payments / merchant terminals | Apollo employees: 70 | Email supplied: alfred@yavin.com

Input: apollo-contacts-export.csv, data row 45 (CSV row 46).

Location: Website publishes a Paris address.

- **Business:** Provides payment terminals and integrations for merchants.
- **Document research:** The site describes POS, accounting and payment integrations, without establishing incoming document extraction. Source
- **Contact:** Co-founder and CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. French fintech and relevant technical contact, but payment reconciliation does not by itself establish an invoice or receipt parsing need.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R046 · Kayaport Ödeme Kurulu■u · Cagdas Emre

Financial software / bank integration | Apollo employees: 76 | Email supplied: cemre@kayaport.com

Input: apollo-contacts-export.csv, data row 46 (CSV row 47).

Location: Turkey in Apollo; inclusion within campaign geography is unresolved.

- **Business:** Aggregates bank accounts, collections and payment activity into one finance interface.
- **Document research:** Its website describes bank integrations and automated reconciliation; Apollo's invoice-management keyword is not independent evidence of invoice uploads. Source
- **Contact:** CTO - BulutTahsilat in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Confirm campaign coverage of Turkey and whether any process uses unstructured invoices instead of bank feeds.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R047 · PayForce · Andrii Mykytiuk

Financial software / implementation partner | Apollo employees: 39 | Email supplied: andrii.mykytiuk@payforce.ua

Input: apollo-contacts-export.csv, data row 47 (CSV row 48).

Location: Website identifies Ukrainian banking customers and operations; Apollo lists Ukraine.

- **Business:** Develops banking software and integrates financial systems for Ukrainian banks.
- **Document research:** Its KYC solution names BankID, Diia, liveness detection and FaceMatch, but the reviewed page does not establish uploaded-document extraction. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Credible delivery capability; identify a live project with an unstructured document and named owner before using the partner angle.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R048 · Integrated Finance · Canay Ozel

Financial software / banking infrastructure | Apollo employees: 22 | Email supplied: canay.ozel@integrated.finance

Input: apollo-contacts-export.csv, data row 48 (CSV row 49); apollo-contacts-export (1).csv, data row 14 (CSV row 15).

Location: Website identifies UK-registered I.F. Technology Limited.

- **Business:** Provides accounts, cards, ledgers and compliance integrations for fintech products.
- **Document research:** The site describes KYC, AML and monitoring integrations, without showing what unstructured documents enter them. Source
- **Contact:** Co-Founder, CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. UK infrastructure company with a plausible technical owner. Confirm a document task beyond existing provider connections.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R049 · Green-Got · Fabien Huet

Payments / business onboarding documents | Apollo employees: 51 | Email supplied: fabien@green-got.com

Input: apollo-contacts-export.csv, data row 49 (CSV row 50); apollo-contacts-export (1).csv, data row 15 (CSV row 16).

Location: France in Apollo and the service context; legal buying entity not independently verified.

- **Business:** Provides accounts and investment products, including accounts for independent workers.
- **Document research:** Its help page requires a KBIS or SIRENE registration document in PDF or photo form for independent-worker accounts. Source
- **Contact:** Co-founder / CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take SIREN numbers and activity codes from business-registration documents and prepare Green-Got's onboarding fields.
- **Fit:** REVIEW NEEDED. Specific, useful document hook. Confirm the current French contracting entity, document volumes and any gap in existing verification.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Low: the stated material gap prevents qualification.

R050 · Tradevest · Jan Terlecki

Financial software / entity onboarding | Apollo employees: 31 | Email supplied: jan@tradevest.ai

Input: apollo-contacts-export.csv, data row 50 (CSV row 51).

Location: Germany in Apollo; legal entity location not independently verified in this pass.

- **Business:** Provides digital infrastructure for securities, crypto and tokenised assets.
- **Document research:** Its API guide supports uploaded registry extracts, shareholder lists, tax forms and source-of-funds documents, with review-status notifications. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take company names, registration details and ownership information from registry documents and prepare Tradevest's onboarding fields.
- **Fit:** REVIEW NEEDED. Strong document and integration fit. Confirm German contracting entity, current document-processing provider and the specific exception to compare.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Low: the stated material gap prevents qualification.

R051 · CoinCover · Mike Miller

Crypto security / recovery | Apollo employees: 37 | Email supplied: mike.miller@coincover.com

Input: apollo-contacts-export (1).csv, data row 2 (CSV row 3).

Location: Website identifies Digital Asset Services Ltd, trading as CoinCover, in Cardiff, Wales.

- **Business:** Provides digital-asset recovery and security services.
- **Document research:** The site focuses on key recovery, backups and transaction protection; its published research reports are not evidence of input-document processing. Source
- **Contact:** Head of Engineering in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. UK technology company, but weak document fit. Avoid presenting crypto security as insurance-submission software.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R052 · Soan · Arthur Davoine

Payments / collections | Apollo employees: 23 | Email supplied: arthur@soan-solutions.io

Input: apollo-contacts-export (1).csv, data row 8 (CSV row 9).

Location: France in Apollo; not independently verified.

- **Business:** Apollo lists Soan as a French payments and recovery fintech.
- **Document research:** The supplied website could not be read and the bounded public lookup returned no usable official result. Source
- **Contact:** Co-Founder & CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. Business description and role remain supplied-only. Confirm the current website and one actual invoice or document workflow.

Evidence: Limited access; supplied/indexed claims labelled. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R053 · SWIAT · Ivica Aracic

Financial software / digital securities | Apollo employees: 39 | Email supplied: ivica.aracic@swiat.io

Input: apollo-contacts-export (1).csv, data row 16 (CSV row 17).

Location: Website identifies SWIAT GmbH and its Frankfurt address.

- **Business:** Builds blockchain infrastructure for regulated financial-market participants.
- **Document research:** The site explains digital securities issued without physical certificates; this is not evidence that SWIAT ingests PDF issue documents. Source
- **Contact:** Chief Technology Officer in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. German financial software fits the broad campaign. Establish an actual unstructured document input before proposing extraction.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R054 · UNITE Global · Tord Coucheron

Financial software / correspondent payments | Apollo employees: 20 | Email supplied: tc@unite-global.com

Input: apollo-contacts-export (1).csv, data row 18 (CSV row 19).

Location: Website identifies its base and address in Fredrikstad, Norway.

- **Business:** Develops a correspondent hub for bank payments, settlement and cash management.
- **Document research:** Its site describes banking messages and settlement infrastructure; no document-intake workflow was found. Source
- **Contact:** Chief Technology Officer & Co-Founder in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** No clear document use case found.
- **Fit:** REVIEW NEEDED. European infrastructure business, but structured payment messages are not automatically a PDF extraction opportunity.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Low for document fit: no exact input established or source access limited. Fit confidence: Low: the stated material gap prevents qualification.

R055 · Rockaway Capital · Petr Mahdal

Investment group / separate direct-buyer lane | Apollo employees: 70 | Email supplied: petr.mahdal@rockawaycapital.com

Input: apollo-contacts-export (1).csv, data row 22 (CSV row 23).

Location: Website identifies the operator Rockaway GP a.s. and its Prague address.

- **Business:** Invests across private equity, venture capital and blockchain.
- **Document research:** Its site provides fund documents, including key-information documents; this shows disclosure distribution, not a verified internal extraction workflow. Source
- **Contact:** Tech Exec & Visionary & Cto/cio at Rockaway Capital Group in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could make fund key-information documents searchable for staff answering investor questions, if there is a recurring need.
- **Fit:** REVIEW NEEDED. Investment-group buyer rather than a software vendor. Confirm a real internal document process and the relevant group or fund entity.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: Medium: document context is supported; application or current need remains unconfirmed. Fit confidence: Low: the stated material gap prevents qualification.

R056 · Treyd · Sameh El-Ansary

Lending / invoice finance | Apollo employees: 68 | Email supplied: sameh@treyd.io

Input: apollo-contacts-export (1).csv, data row 24 (CSV row 25).

Location: Website identifies Swedish company Treyd AB and its organisation number.

- **Business:** Finances supplier payments and customer invoices for product businesses.
- **Document research:** Its application accepts financial information or accounting connections; customers upload supplier or customer invoices to obtain funding. Source
- **Contact:** CTO in Apollo. Role supplied by Apollo; not independently confirmed. Supplied LinkedIn
- **How Infratex could help:** Infratex could take supplier names, invoice amounts and payment dates from uploaded invoices and prepare Treyd's funding-review records.
- **Fit:** QUALIFIED. Strong European fintech and document fit. Confirm PDF-versus-structured inputs, existing extraction and exception formats before proposing a comparison.

Evidence: Public page read. Identity: Medium: company/domain matched; contact role supplied-only. Facts: High: document task is explicit on the reviewed page. Fit confidence: Medium: research fit supported; demand and current role unconfirmed.

Every input row

The input ID follows the first file, then the second. Data row 1 is CSV row 2 because the header occupies the first line. Duplicate IDs refer to the first input record with identical supplied values.

Input ID	File / data row	Contact	Company	Report	Duplicate of	Status
INF-0001	CSV 1 / 1	Carsten Hermann	Particula	R001	-	review_needed

Using the research

Use only the supported research detail and the conditional help sentence in later drafting. Resolve the individual review flags first. The records have not been approved for sending. No emails or messages were sent.
