Infratex
Prospect research reports

26 October 2026

250 completed company reports. Two proposed uses per company.

Companies covered	250
Companies pending: no email	56
Distinct companies across both files	306
Original rows reconciled	500
Software and AI consultancies	50
Separate direct-buyer reports	200

Scope: only companies with a supplied business email were researched. General company mailboxes count as email-bearing leads. Their addresses have not been freshly tested for delivery.

Each report puts two proposed Infratex uses first. Conditional proposals identify a possible task to confirm; they do not establish that the company currently uses those documents or needs another tool.

The research tracker lists all 306 companies as Completed or Not done - no email. The source-row log preserves all 500 original rows, including duplicates and rows that lack an email.

Countries, employee estimates and named contacts are supplied fields unless explicitly confirmed in the report. A completed pass records findings and gaps; all accounts still require buyer and workflow review before qualification.

Financial software, insurance software and AI partners are separate from manufacturers, distributors and direct services buyers. Existing extraction, connected-data inputs and document generation are recorded as counterevidence where relevant.

Public product, help and case-study pages were checked on 26 October 2026. Source links appear in each report. Report IDs match the tracker.

IR26-001 CreditLogic

Financial software | Ireland (supplied country)
info@creditlogic.com

How Infratex could help - option 1: Infratex could extract income, balances and valuation fields from mortgage documents into application-review records.

Option 2: Infratex could make mortgage evidence searchable so reviewers can trace a figure to its source.

Business and document evidence: Financial software / Lending. Mortgage origination extracts payslips, bank statements and valuations and generates credit packs.

Contact route: Supplied contact: Gavin Bennett, Co-founder & CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: CreditLogic already extracts and validates documents. Compare one unmet case rather than assume replacement demand.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 6.

IR26-002 Cognitive Credit

Financial software | United Kingdom (supplied country)
sales@cognitivecredit.com

How Infratex could help - option 1: Infratex could extract company, period and financial figures from uploaded restricted-company reports into analyst tables.

Option 2: Infratex could make deal documents searchable with references behind credit findings.

Business and document evidence: Financial software / Credit analysis. Maintains a searchable library of official filings and traces credit-analysis data back to source documents.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Its platform already models uploaded reports. Current extraction gap and evaluation owner are unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 7.

IR26-003 Auquan

Financial software | United Kingdom (supplied country)
hello@auquan.com

How Infratex could help - option 1: Infratex could extract reporting periods and financial figures from filings into credit-analysis inputs.

Option 2: Infratex could retrieve evidence from regulatory and legal documents behind a credit-monitoring finding.

Business and document evidence: Financial software / Financial research. Credit agents gather financial and regulatory documents and produce structured credit-analysis reports.

Contact route: Supplied contact: Shub Jain, Co-founder & CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Auquan already automates credit analysis. Establish a specific intake problem and integration route.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 8.

IR26-004 Finster AI

Financial software | United Kingdom (supplied country)
contact@finster.ai

How Infratex could help - option 1: Infratex could extract tables and reporting periods from financial documents for research agents.

Option 2: Infratex could provide source-linked answers across company filings and research material.

Business and document evidence: Financial software / Financial research. Financial research platform uses a proprietary document pipeline spanning company filings and research material.

Contact route: Supplied contact: Jishnu Mukhoti, Head of Technology. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Finster has its own document pipeline and citations. No unmet requirement is established.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 9.

IR26-005 Limeglass

Financial software | United Kingdom (supplied country)
simon@limeglass.com

How Infratex could help - option 1: Infratex could turn research PDFs into text and tables for paragraph-level tagging.

Option 2: Infratex could keep document references beside extracted research passages for search results.

Business and document evidence: Financial software / Financial research. Breaks financial research into tagged paragraphs for document search and structured research data.

Contact route: Supplied contact: Simon Gregory, CTO & Co-founder. Intended owner: CTO / Head of Engineering / AI. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: Limeglass already structures research. Confirm accepted formats and a gap in its current intake.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 10.

IR26-006 Artificial

Insurance software | United Kingdom (supplied country)
hello@artificial.io

How Infratex could help - option 1: Infratex could extract risk details from broker attachments into a submission-review table.

Option 2: Infratex could make placement documents searchable so teams can check the wording behind risk details.

Business and document evidence: Insurance software / Commercial underwriting. Structures broker documents and reformats submissions for specialty-insurance placement and underwriting.

Contact route: Supplied contact: Zsolt Szende, Chief Technology Officer. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Artificial already structures broker data. Exact recurring file types and a reason to compare remain unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 11.

IR26-007 Insly

Insurance software | United Kingdom (supplied country)
info@insly.com

How Infratex could help - option 1: Infratex could extract broker submission fields into the schema used by an MGA or insurer.

Option 2: Infratex could link each extracted answer to the original attachment for underwriting review.

Business and document evidence: Insurance software / Commercial underwriting. FormFlow extracts broker-document information and maps it into MGA and insurer templates.

Contact route: Supplied contact: Joshua von Eicken, Chief Product & Technology Officer. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: FormFlow already performs extraction and mapping. Identify difficult inputs rather than pitch basic automation.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 12.

IR26-008 Send

Insurance software | United Kingdom (supplied country)
hello@send.technology

How Infratex could help - option 1: Infratex could extract applicant and risk fields from submission attachments if these enter the triage workflow.

Option 2: Infratex could structure bordereaux rows from document-based exceptions if those occur.

Business and document evidence: Insurance software / Commercial underwriting. Underwriting platform includes submission management and bordereaux ingestion for commercial and specialty risks.

Contact route: Supplied contact: Chris Newton, CTO (appointment announcement, 2024). Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Submission management is confirmed, but exact unstructured file types and existing parser are unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 13.

IR26-009 AI Superior

AI implementation consultancy | Germany (supplied country)
ivan.tankoyeu@aisuperior.com

How Infratex could help - option 1: Infratex could prepare client document text and tables for a private knowledge assistant.

Option 2: Infratex could return source-linked answers from the consulting client's approved knowledge files.

Business and document evidence: Custom AI delivery / Document automation. A public consulting-firm chatbot case describes private hosting and answers with document references.

Contact route: Supplied contact: Ivan Tankoyeu, Co-founder. Intended owner: Founder / delivery head. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: A relevant chatbot case is public; a live new client project and document formats are not confirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 14.

IR26-010 Devstark

AI implementation consultancy | Netherlands (supplied country)
info@devstark.com

How Infratex could help - option 1: Infratex could extract clauses and parties if its reported legal-review project receives PDF contracts.

Option 2: Infratex could prepare source-linked answers if a live client application searches legal files.

Business and document evidence: Custom AI delivery / Document search. The official page confirms custom software and AI delivery. The legal-document case remains supplied-only.

Contact route: Supplied contact: Refat Ametov, Co-founder & CEO. Intended owner: Founder / delivery head. The email is a company mailbox, not that person's verified address.

Fit and next check: The supplied Clutch case could not be read. The official page confirms software delivery, not the reported document project.

Sources: Evidence 1 / Evidence 2
Input: Infratex_Email_Prospects.xlsx, Prospects row 15.

IR26-011 dida

AI implementation consultancy | Germany (supplied country)
lorenz.richter@dida.do

How Infratex could help - option 1: Infratex could extract agreed legal fields if a current client project processes scanned documents.

Option 2: Infratex could make approved legal files searchable if a client needs evidence-linked retrieval.

Business and document evidence: Custom AI delivery / Document automation. The official site confirms custom machine learning and production delivery. Its supplied legal case was not accessible.

Contact route: Supplied contact: Lorenz Richter, CTO & Co-founder. Intended owner: Founder / delivery head. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: The official site confirms production ML capability; the supplied legal-document case was inaccessible.

Sources: Evidence 1 / Evidence 2
Input: Infratex_Email_Prospects.xlsx, Prospects row 16.

IR26-012 Preste

AI implementation consultancy | France (supplied country)
contact@preste.ai

How Infratex could help - option 1: Infratex could extract required fields from client document images for a scoped processing project.

Option 2: Infratex could prepare searchable document content for a client knowledge-base application.

Business and document evidence: Custom AI delivery / Document search. Delivers custom document-processing and knowledge-base query solutions using computer vision and language models.

Contact route: Supplied contact: Thibaut Soubrié, CTO & Co-founder. Intended owner: Founder / delivery head. The email is a company mailbox, not that person's verified address.

Fit and next check: Document processing and knowledge-base queries are listed services. A deployed example or live project needs confirmation.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 17.

IR26-013 Framz

AI implementation consultancy | United Kingdom (supplied country)
accounts@framz.io

How Infratex could help - option 1: Infratex could prepare client accounting PDFs for a document-based assistant if that project is current.

Option 2: Infratex could provide source-linked answers from approved tax guidance and firm documents if those inputs are used.

Business and document evidence: Custom AI delivery / Document search. The supplied record describes accountancy assistants using firm documents and tax guidance. This could not be checked independently.

Contact route: No named decision-maker supplied. Intended owner: Founder / delivery head. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: Both supplied case access and the homepage failed. Identity, project details and current role need confirmation. Public source access remained incomplete; supplied facts are not independently confirmed.

Sources: Evidence 1 (not accessible)
Input: Infratex_Email_Prospects.xlsx, Prospects row 18.

IR26-014 HAREDATA ELECTRONICS

Direct manufacturer/distributor buyer | United Kingdom (supplied country)
hello@haredata.co.uk

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies power units, battery packs and chargers for industrial and medical uses. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person’s verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 19.

IR26-015 burster Measurement Solutions GmbH

Direct manufacturer/distributor buyer | Germany (supplied country)
info@burster.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Develops sensors, calibration instruments and precision measurement systems. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person’s verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 20.

IR26-016 Mol BV

Direct manufacturer/distributor buyer | Netherlands (supplied country)
info@molhardware.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies hardware including metal fittings, snap hooks, webbing and chains. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 21.

IR26-017 Frezamet Bis Sp. z o.o

Direct manufacturer/distributor buyer | Poland (supplied country)
faktury@frezamet-bis.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Provides CNC milling, turning and other precision metalworking services. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 22.

IR26-018 TRANSPACK S.A.

Direct manufacturer/distributor buyer | Spain (supplied country)
info@transpackgroup.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract product names, quantities and amounts into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures customised cardboard packaging for industrial and food products. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 23.

IR26-019 DE WITTE SA

Direct manufacturer/distributor buyer | Belgium (supplied country)
jazlyn@dewitte.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies professional cleaning products to wholesalers, including imported and assembled products. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: Supplied contact: Jazlyn Ching, Accounting. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 24.

IR26-020 ITE Fabriks AB

Direct manufacturer/distributor buyer | Sweden (supplied country)
ite@itefabriks.se

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Provides sheet-metal manufacturing, forming and in-house tooling. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person’s verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 25.

IR26-021 K-TEC GMBH

Direct manufacturer/distributor buyer | Austria (supplied country)
info@ktec.at

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Produces customised thermoformed plastic components for several industries. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person’s verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page

IR26-022 Bo-Inno GmbH

Direct manufacturer/distributor buyer | Germany (supplied country)
info@bo-inno.de

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Develops industrial washing baskets and related handling solutions. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 27.

IR26-023 LEGRAND CUB

Direct manufacturer/distributor buyer | France (supplied country)
legrandcub@legrandcub.fr

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Distributes plumbing, compressed-air, electrical and materials-handling products. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 28.

IR26-024 FOMIR SRL

Direct manufacturer/distributor buyer | Italy (supplied country)
vendite@fomir.it

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Designs ergonomic workstations, manual assembly lines and internal logistics equipment. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 29.

IR26-025 Mmg maquinaria

Direct manufacturer/distributor buyer | Spain (supplied country)
mmg@mmgmaquinaria.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Sells new and used industrial machinery and buys used equipment. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 30.

IR26-026 SATIR Europe (Ireland) Co. Ltd.

Direct manufacturer/distributor buyer | Ireland (supplied country)
enquiry@satir.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures thermal cameras and infrared inspection equipment. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 31.

IR26-027 ACTEC A/S

Direct manufacturer/distributor buyer | Denmark (supplied country)
info@actec.dk

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies batteries and manufactures customised battery packs. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

IR26-033 GNOTEC AB

Direct manufacturer/distributor buyer | Sweden (supplied country)
info.gnotec-ab@fta-group.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies automotive engineering and manufactured components. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Input: Infratex_Email_Prospects.xlsx, Prospects row 43.

IR26-039 Isovolta AG

Direct manufacturer/distributor buyer | Austria (supplied country)
headquarters@isovolta.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures electrical insulation materials, technical laminates and composites. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 44.

IR26-040 ezbob

Financial software | United Kingdom (supplied country)
info@ezbob.com

How Infratex could help - option 1: Infratex could extract invoice fields if an embedded-lending client sends invoice PDFs rather than structured data.

Option 2: Infratex could prepare financial-statement figures if a lender accepts document-only exceptions.

Business and document evidence: Financial software / Lending. Embedded finance uses invoice, order and payment data. No incoming unstructured document was established.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: Invoice and order data are confirmed; incoming PDF processing is not. Do not equate transaction data with documents.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 45.

IR26-041 Prestatech

Financial software | Germany (supplied country)
platform@prestatech.com

How Infratex could help - option 1: Infratex could extract transaction rows and financial figures from uploaded borrower documents into review tables.

Option 2: Infratex could link cash-flow review figures to the original financial statement or payslip.

Business and document evidence: Financial software / Credit analysis. Credit intelligence combines bank-statement document processing with cash-flow analysis for lenders.

Contact route: Supplied contact: Granit Gashi, CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: Prestatech already offers document capture and analysis. Compare one confirmed exception, not generic OCR.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 46.

IR26-042 CreditOnline

Financial software | Lithuania (supplied country)
info@creditonline.eu

How Infratex could help - option 1: Infratex could extract borrower fields if loan applications include incoming financial PDFs.

Option 2: Infratex could make signed loan agreements searchable if staff need to retrieve repayment terms.

Business and document evidence: Financial software / Lending. Lending product generates loan agreements, repayment schedules and pre-contract disclosures.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The source establishes generated agreements and disclosures, not incoming extraction.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 47.

IR26-043 TIMVERO

Financial software | United Kingdom (supplied country)
hello@timvero.com

How Infratex could help - option 1: Infratex could extract financial fields if a TIMVERO implementation uses uploaded borrower PDFs.

Option 2: Infratex could make a client’s loan documents searchable if document retrieval is an active requirement.

Business and document evidence: Financial software / Lending. Lending SDK includes document templates for contracts, reports and formatted documents.

Contact route: Supplied contact: Anton Shashok, CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: Document management, uploads and templates are documented. The deployment-specific input and parser remain unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 48.

IR26-044 LendFusion

Financial software | Estonia (supplied country)
info@lendfusion.com

How Infratex could help - option 1: Infratex could extract borrower fields if stored application files include financial statements.

Option 2: Infratex could retrieve repayment terms from signed contracts if servicing teams search those documents.

Business and document evidence: Financial software / Lending. Loan-management software includes secure document storage and loan-contract generation.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: Storage and contract generation do not establish incoming extraction or an unmet need.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 49.

IR26-045 Bankish

Financial software | Estonia (supplied country)
bankish@bankish.eu

How Infratex could help - option 1: Infratex could extract financial fields if Bankish clients collect borrower statements as files.

Option 2: Infratex could make credit agreements searchable if servicing staff use them to answer account questions.

Business and document evidence: Financial software / Lending. The public page confirms end-to-end lending software. The specific document task remains unverified.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The reviewed page confirms lending software; the supplied contract-workflow detail needs a more specific source.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 50.

IR26-046 Digilytics

Financial software | United Kingdom (supplied country)
ask@digilytics.ai

How Infratex could help - option 1: Infratex could extract income, deductions and reporting periods from affordability documents into lending-review fields.

Option 2: Infratex could link affordability calculations to the source payslip, tax record or statement.

Business and document evidence: Financial software / Lending. Lending product analyses bank statements, payslips and tax documents for affordability assessment.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Existing document analysis is central to Digilytics. Confirm a genuinely unmet format or extraction requirement.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 51.

IR26-047 INSTANDA

Insurance software | United Kingdom (supplied country)
sales@instanda.com

How Infratex could help - option 1: Infratex could extract proposal-form fields if a commercial-insurance implementation accepts uploaded files.

Option 2: Infratex could make policy schedules searchable if users need source-linked coverage answers.

Business and document evidence: Insurance software / Commercial underwriting. A no-code insurance platform is confirmed. Broker-document ingestion was not established on the reviewed page.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: The reviewed homepage confirms a policy platform, not a recurring document-ingestion task.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 52.

IR26-048 Optalitix

Insurance software | United Kingdom (supplied country)
sales@optalitix.com

How Infratex could help - option 1: Infratex could extract rating inputs from document-based schedules if clients use them alongside Excel models.

Option 2: Infratex could make underwriting rules searchable if supporting model documentation is supplied as files.

Business and document evidence: Insurance software / Commercial underwriting. The product turns Excel pricing and underwriting models into APIs. A broker-PDF intake task is unconfirmed.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Excel-to-API model deployment is confirmed. It does not establish broker-document intake.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 53.

IR26-049 mea Platform

Insurance software | United Kingdom (supplied country)
hello@meaplatform.com

How Infratex could help - option 1: Infratex could extract claim dates and amounts from loss runs into an underwriting-review table.

Option 2: Infratex could extract insured-item rows from submission attachments for the agreed insurer schema.

Business and document evidence: Insurance software / Submission processing. Ingests insurance submissions, loss runs and bordereaux and structures their data for underwriting.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: mea already sells insurance ingestion and automation. An unmet requirement and willingness to add a component are unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 54.

IR26-050 VIPR

Insurance software | United Kingdom (supplied country)
info@viprsolutions.com

How Infratex could help - option 1: Infratex could extract bordereaux rows if clients still send PDF or scanned exceptions.

Option 2: Infratex could link disputed bordereaux values to the supporting document page for reviewers.

Business and document evidence: Insurance software / Submission processing. Bordereaux product validates and transforms delegated-authority files into a consistent insurance-data model.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: VIPR already validates and transforms data. Confirm unstructured formats rather than assume spreadsheets need parsing.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 55.

IR26-051 Quotech

Insurance software | United Kingdom (supplied country)
info@quotech.io

How Infratex could help - option 1: Infratex could extract incoming risk fields if Quotech clients submit document-based evidence.

Option 2: Infratex could make policy or risk documents searchable if underwriters need to check original terms.

Business and document evidence: Insurance software / Commercial underwriting. Lloyd's-focused underwriting tools include automated bordereaux compilation and insurance-document delivery.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The source confirms bordereaux compilation and document delivery, not incoming parsing.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 56.

IR26-052 Genasys

Insurance software | United Kingdom (supplied country)
hello@genasystech.com

How Infratex could help - option 1: Infratex could extract claim dates and amounts if an implementation receives claims PDFs.

Option 2: Infratex could make policy schedules searchable if staff need referenced coverage answers.

Business and document evidence: Insurance software / Commercial underwriting. Policy platform maintains policy schedules, claims histories and renewal documents within insurance workflows.

Contact route: Supplied contact: Craig Olivier, Group CTO & Co-founder. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Policy and claims workflows include documents, but exact incoming files and current extraction are unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 57.

IR26-053 DataNorth AI

AI implementation consultancy | Netherlands (supplied country)
menno@datanorth.ai

How Infratex could help - option 1: Infratex could separate invoice records and extract their fields when a PDF contains multiple invoices.

Option 2: Infratex could flag missing reference fields and return source evidence for the human review step.

Business and document evidence: Custom AI delivery / Document search. Describes its document-processing project work handling PDFs containing multiple invoices and missing reference fields.

Contact route: Supplied contact: Menno Fokkema, Founder & CEO. Intended owner: Founder / delivery head. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: The published production example is relevant. Identify a current client project and ownership before a partner discussion.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 58.

IR26-054 EZR Shelving

Direct manufacturer/distributor buyer | United Kingdom (supplied country)
sales@ezrshelving.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies commercial shelving, racking and industrial storage systems. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 59.

IR26-055 VKF Renzel GmbH

Direct manufacturer/distributor buyer | Germany (supplied country)
info@vkf-renzel.de

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies point-of-sale display and sales-promotion equipment. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 60.

IR26-056 PFI DISTRIBUTION

Direct manufacturer/distributor buyer | France (supplied country)
contact@pfidistribution.fr

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Distributes industrial tools, handling equipment, cleaning supplies and workplace furniture. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 61.

IR26-057 INTEGRATED CHEMICALS SPECIALTIES

Direct manufacturer/distributor buyer | Netherlands (supplied country)
service@icspecialties.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material names, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Distributes chemical additives and processing aids with technical advice. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 62.

IR26-058 METALTECH ENGINEERING

Direct manufacturer/distributor buyer | Ireland (supplied country)
info@metaltechengineering.ie

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Provides sheet-metal and general fabrication for industrial customers. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page

Input: Infratex_Email_Prospects.xlsx, Prospects row 66.

IR26-062 MANUTAN SA

Direct manufacturer/distributor buyer | France (supplied country)
contact.directionfrance@manutan.com

How Infratex could help - option 1: If a current invoice exception remains outside Esker, Infratex could extract its agreed fields into an AP review table.

Option 2: If current reviewers need more source evidence, Infratex could prepare invoice-to-order comparisons for a scoped exception test.

Business and document evidence: Distributes workplace equipment, tools, packaging and office furniture. A 2020 Esker case study reports automated supplier invoices and a Microsoft Dynamics AX connection. The present setup was not confirmed.

Contact route: Supplied contact: Fabienne Menard, Group CFO (2022 appointment; current role unconfirmed). Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: A 2020 Esker case study documents supplier-invoice automation. Check the current system and a specific remaining requirement; do not present historical figures as current.

Sources: Company page / Evidence 2
Input: Infratex_Email_Prospects.xlsx, Prospects row 67.

IR26-063 FAE PROJECT

Direct manufacturer/distributor buyer | Italy (supplied country)
faeproject@faeproject.it

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures footwear soles and moulds. The supplied steel-products description is incorrect. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 68.

IR26-064 ESPIR TECH

Direct manufacturer/distributor buyer | Poland (supplied country)
export@ecobalers.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures waste balers and compactors under the Ecobalers brand. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

IR26-099 SENSY S.A.

Direct manufacturer/distributor buyer | Belgium (supplied country)
info@sensy.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Develops force, weighing and torque sensors. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

IR26-187 Valutico

Financial software | Austria (supplied country)
k.puri@valutico.com

How Infratex could help - option 1: Infratex could extract income-statement, balance-sheet and cash-flow rows into a reviewed forecast mapping.

Option 2: Infratex could keep period and source references with each financial value for checking.

Business and document evidence: Financial software / Financial research. Eva AI imports income-statement, balance-sheet and cash-flow line items from uploaded PDF and Excel financial statements.

Contact route: Supplied contact: Kashif Javed Puri, CTO. Intended owner: CTO / Head of Engineering / AI. The address and role are supplied; current ownership and deliverability were not retested.

Fit and next check: Eva AI already imports and maps financial statements. A difficult-file comparison needs an agreed gap.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 192.

IR26-188 Company Watch

Financial software | United Kingdom (supplied country)
info@companywatch.net

How Infratex could help - option 1: Infratex could extract reporting periods and financial figures if analysts need structured data from company PDFs.

Option 2: Infratex could make company documents searchable with references supporting a credit-review answer.

Business and document evidence: Financial software / Credit analysis. Credit-risk platform includes viewing company documents as PDFs within its company-analysis workflow.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: PDF document viewing is evidenced; ingestion, extraction and demand for another component are not.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 193.

IR26-189 Fintech Market

Financial software | Estonia (supplied country)
info@fintech-market.com

How Infratex could help - option 1: Infratex could extract borrower income fields if supporting mortgage documents arrive as PDFs.

Option 2: Infratex could make collateral and mortgage documents searchable if reviewers need cited property terms.

Business and document evidence: Financial software / Lending. Mortgage product generates collateral documents from predefined legal and property templates.

Contact route: Supplied contact: Raido Paaslepp, CIO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: Mortgage applications include supporting documents, while collateral templating is an output function. Confirm actual input formats.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 194.

IR26-190 DLabs.AI

AI implementation consultancy | Poland (supplied country)
sales@dlabs.ai

How Infratex could help - option 1: Infratex could extract tax-document fields into the client application's declaration schema.

Option 2: Infratex could link each extracted field to the original page for accounting review.

Business and document evidence: Custom AI delivery / Document automation. Taxando project uses OCR, machine learning and text analysis to extract information from tax documents.

Contact route: Supplied contact: Przemysław Majewski, Co-founder. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person's verified address.

Fit and next check: The Taxando case already uses OCR and ML. A live new project and current pipeline needs remain unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 195.

IR26-191 2V Automation.AI

AI implementation consultancy | Portugal (supplied country)
weare@2vmdls.com

How Infratex could help - option 1: Infratex could prepare document text for a client knowledge assistant if source materials arrive as PDFs.

Option 2: Infratex could provide cited answers from the approved visitor-information knowledge base.

Business and document evidence: Custom AI delivery / Document search. Published client project delivered a RAG chatbot answering aquarium visitor questions from a knowledge base.

Contact route: Supplied contact: Valerian Valkin, Founder & CEO. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person's verified address.

Fit and next check: The aquarium assistant is deployed adjacent proof; PDF formats, a live new project and financial-sector relevance are unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 196.

IR26-192 laizee.ai

AI implementation consultancy | Germany (supplied country)
contact@laizee.ai

How Infratex could help - option 1: Infratex could extract tariff values and dates from complex supplier price sheets into structured records.

Option 2: Infratex could prepare source-linked knowledge answers from client documents for its Virtual Expert product.

Business and document evidence: Custom AI delivery / Document automation. Its official website describes extracting tariff data from unstructured price sheets and an AI insolvency platform.

Contact route: Supplied contact: Dr. Michael Jentgens, Co-founder & CEO. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person's verified address.

Fit and next check: The official site names tariff extraction and an insolvency platform. Establish the active project and component ownership.

Sources: Evidence 1 / Evidence 2
Input: Infratex_Email_Prospects.xlsx, Prospects row 197.

IR26-193 ObjectSingle

AI implementation consultancy | Portugal (supplied country)
contact@objectsingle.com

How Infratex could help - option 1: Infratex could structure fields from retrieved due-diligence files if those sources include PDFs or scans.

Option 2: Infratex could keep cited passages beside risk findings for an analyst to review.

Business and document evidence: Custom AI delivery / Document automation. Built VaultIQ+ for InsightX: retrieved documents feed a private RAG index and auditable due-diligence reports.

Contact route: No named decision-maker supplied. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: VaultIQ+ is a relevant delivered product. Licensed data and web retrieval do not by themselves establish difficult PDF intake.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 198.

IR26-194 theBlue.ai

AI implementation consultancy | Germany (supplied country)
contact@theblue.ai

How Infratex could help - option 1: Infratex could extract shipment fields from PDF attachments if they accompany the existing logistics emails.

Option 2: Infratex could make approved transport files searchable if a client needs referenced shipment answers.

Business and document evidence: Custom AI delivery / Document automation. A logistics case describes extracting shipment data from German and English emails on the client’s servers.

Contact route: No named decision-maker supplied. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: The case confirms on-premise email extraction. It does not establish PDF attachment intake or a current new requirement.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 199.

IR26-195 Codelive

Financial software | Estonia (supplied country)
hello@codelive.ee

How Infratex could help - option 1: Infratex could extract borrower fields if Codelive clients submit financial statements as PDFs.

Option 2: Infratex could make signed credit agreements searchable if servicing users need original repayment terms.

Business and document evidence: Financial software / Lending. The public page confirms loan-management software. An incoming document task was not established.

Contact route: Supplied contact: Jüri Pruulmann, CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The page confirms lending software; incoming document types and the supplied contract-handling detail need confirmation.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 200.

IR26-196 Validis

Financial software | United Kingdom (supplied country)
info@validis.com

How Infratex could help - option 1: Infratex could extract borrower figures from PDF statements if exceptions sit outside accounting-system connections.

Option 2: Infratex could link financial-review answers to supporting report pages if lenders use document-based evidence.

Business and document evidence: Financial software / Lending. Commercial-lending data is obtained and standardised from accounting systems, rather than an established PDF upload workflow.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Validis primarily standardises connected accounting data. Do not describe those feeds as PDF extraction.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 201.

IR26-197 RiskConcile

Financial software | Belgium (supplied country)
info@riskconcile.com

How Infratex could help - option 1: Infratex could extract disclosed fund terms if clients supply external KIDs or factsheets for comparison.

Option 2: Infratex could make regulatory documents searchable if reviewers need the original wording behind a term.

Business and document evidence: Financial software / Financial research. Investment-risk analytics and reporting produce factsheets and consistent outputs across KID, KIID and related fund documents.

Contact route: Supplied contact: Bram Prosse, CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: KID, KIID and related reporting outputs are confirmed. Incoming unstructured documents are not.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 202.

IR26-198 finAPI

Financial software | Germany (supplied country)
kontakt@finapi.io

How Infratex could help - option 1: Infratex could extract transaction rows if a lending client has statement-only exceptions outside bank feeds.

Option 2: Infratex could make generated consultation PDFs searchable if staff need to retrieve the decision record.

Business and document evidence: Financial software / Credit analysis. KreditCheck analyses borrower account data and generates a PDF documenting the lending consultation and decision inputs.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: The cited page establishes connected bank data and generated PDFs, not uploaded statement extraction.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 203.

IR26-199 Finverity

Financial software | United Kingdom (supplied country)
info@finverity.com

How Infratex could help - option 1: Infratex could extract names, addresses and ownership details from uploaded KYC documents into review fields.

Option 2: Infratex could compare stated identity or ownership details across deal files with source references.

Business and document evidence: Financial software / Lending. Supply-chain finance platform uploads and groups borrower proof-of-address, identity and ownership documents within financing deals.

Contact route: Supplied contact: Oleg Levitsky, Chief Technology Officer. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: A specific document intake is documented. Current verification tools, buyer and unmet extraction requirement remain unknown.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 204.

IR26-200 Briink

Financial software | Germany (supplied country)
business@briink.com

How Infratex could help - option 1: Infratex could extract environmental metrics and reporting periods from portfolio reports into ESG-review fields.

Option 2: Infratex could return cited answers from policies and reports for disclosure questionnaires.

Business and document evidence: Financial software / Financial research. ESG due diligence for financial institutions extracts source-linked evidence from reports, policies and portfolio-company documents.

Contact route: Supplied contact: Samuel King, Co-founder & CTO. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Briink already provides extraction and source-linked answers. Confirm a specific document exception and evaluation owner.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 205.

IR26-201 Engine AI

Financial software | United Kingdom (supplied country)
info@engineai.com

How Infratex could help - option 1: Infratex could extract company, reporting-period and sector metadata from capital-markets reports.

Option 2: Infratex could keep financial tables and source references available to the research retrieval system.

Business and document evidence: Financial software / Financial research. Capital-markets research platform extracts company, period and sector metadata from research reports and regulatory filings for document retrieval.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Engine AI already describes a specialised extraction and retrieval architecture. A component gap is unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 206.

IR26-202 Web Connectivity

Insurance software | United Kingdom (supplied country)
info@webconnectivity.uk

How Infratex could help - option 1: Infratex could extract placement fields if clients exchange PDF attachments alongside market messages.

Option 2: Infratex could make insurance-contract attachments searchable if users need referenced terms.

Business and document evidence: Insurance software / Submission processing. The homepage confirms insurance connectivity, messaging and integration. Exact unstructured contract inputs remain unverified.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The reviewed homepage establishes connectivity and systems integration, not a specific incoming document format.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 207.

IR26-203 Pancentric Digital

Insurance software | United Kingdom (supplied country)
imagine@pancentric.com

How Infratex could help - option 1: Infratex could extract proposal-form fields into Go-Insur quote-and-bind records.

Option 2: Infratex could make policy documentation searchable if service staff need cited coverage answers.

Business and document evidence: Insurance software / Commercial underwriting. The pricing guide lists AI ingestion of unstructured data alongside document generation and policy workflows.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person’s verified address.

Fit and next check: The pricing guide lists AI ingestion of unstructured data. Confirm exact proposal formats and the current extraction component.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 208.

IR26-204 Vstorm

AI implementation consultancy | Poland (supplied country)
info@vstorm.co

How Infratex could help - option 1: Infratex could prepare client document text and tables for a bilingual knowledge assistant.

Option 2: Infratex could supply source-linked answers from approved client materials.

Business and document evidence: Custom AI delivery / Document search. Delivered a bilingual knowledge assistant answering journalist questions from ARIJ Network's own materials.

Contact route: No named decision-maker supplied. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: The ARIJ assistant supports delivery capability; new-project timing, file formats and owner are unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 209.

IR26-205 nexocode

AI implementation consultancy | Poland (supplied country)
info@nexocode.com

How Infratex could help - option 1: Infratex could extract prices, terms and product codes from procurement proposals and invoice files.

Option 2: Infratex could return source references with extracted fields for procurement exception review.

Business and document evidence: Custom AI delivery / Document automation. Describes delivered procurement document processing that extracts prices, terms and SKUs from proposals, invoices, scans and emails.

Contact route: No named decision-maker supplied. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: A published procurement-processing example is relevant. Confirm a live client project rather than assume one is open.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 210.

IR26-206 Stepwise

AI implementation consultancy | Poland (supplied country)
contact@stepwise.pl

How Infratex could help - option 1: Infratex could extract flight and operator fields if permit applications begin with emailed or scanned requests.

Option 2: Infratex could make country permit requirements searchable if the client maintains them as documents.

Business and document evidence: Custom AI delivery / Document automation. Built PERMITS to Fly's system to automate aviation permit documents and associated approval workflows.

Contact route: No named decision-maker supplied. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: The case concerns permit creation and workflows. Incoming extraction and a current project are not established.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 211.

IR26-207 S9Y.ai

AI implementation consultancy | Czechia (supplied country)
hello@s9y.ai

How Infratex could help - option 1: Infratex could classify incoming correspondence if the reported document-processing project remains active.

Option 2: Infratex could extract case references and dates if those letters arrive as PDFs or scans.

Business and document evidence: Custom AI delivery / Document automation. The official site confirms AI/ML process automation. The supplied review’s correspondence-processing claim could not be checked.

Contact route: Supplied contact: David Brožík, Co-founder. Intended owner: Founder / Delivery head. The email is a company mailbox, not that person’s verified address.

Fit and next check: The official site confirms AI process automation. The supplied Clutch document case could not be checked.

Sources: Evidence 1 / Evidence 2
Input: Infratex_Email_Prospects.xlsx, Prospects row 212.

IR26-208 LenderKit

Financial software | Estonia (supplied country)
hello@lenderkit.com

How Infratex could help - option 1: Infratex could extract investment terms if platform administrators receive deal documents as files.

Option 2: Infratex could make investment documents searchable with source-linked answers for administrators.

Business and document evidence: Financial software / Lending. White-label lending and crowdfunding back-office lets administrators view investment documents and export detailed reports.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Document access is confirmed; uploaded formats, an ingestion gap and current parser are unconfirmed.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 213.

IR26-209 Iceberg Data Lab

Financial software | France (supplied country)
contact@icebergdatalab.com

How Infratex could help - option 1: Infratex could extract environmental metrics and reporting periods from annual-report tables.

Option 2: Infratex could keep source references beside ESG data used in issuer analysis.

Business and document evidence: Financial software / Financial research. Its ESG-focused Barbatus AI extracts environmental data from annual reports for investment and issuer analysis.

Contact route: No named decision-maker supplied. Intended owner: CTO / Head of Engineering / AI. The email is a company mailbox, not that person's verified address.

Fit and next check: Barbatus already extracts environmental data. Identify a missing format or evaluation need rather than pitch basic extraction.

Sources: Evidence 1
Input: Infratex_Email_Prospects.xlsx, Prospects row 214.

IR26-210 Soma GmbH

Direct manufacturer/distributor buyer | Germany (supplied country)
info@soma.de

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Develops test systems, industrial automation, dosing technology and operator-assistance systems. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: SOMA is part of KOSTAL and already sells automation. Confirm the local finance owner and an actual AP gap.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 215.

IR26-211 VAN DIEMEN CHEMICALS BV

Direct manufacturer/distributor buyer | Netherlands (supplied country)
info@vandiemenchemicals.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material names, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Supplies chemical products to industrial customers. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 216.

IR26-212 THOMSON MACHINERY BV

Direct manufacturer/distributor buyer | Netherlands (supplied country)
info@thomsonmachinerynl.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Sources and trades industrial machinery and equipment. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 217.

IR26-213 Westers Wholesale B.V.

Direct manufacturer/distributor buyer | Netherlands (supplied country)
info@westerswholesale.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract product names, quantities and amounts into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Wholesales food, beverages and other goods. Confirm the trading entity before outreach. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: The broad trading catalogue and supplied Netherlands entity need identity confirmation; no supplier-invoice process was verified.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 218.

IR26-214 PHOENIX FABRIKATIONS B.V.

Direct manufacturer/distributor buyer | Netherlands (supplied country)
sales@phoenixfabrikations.com

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Trades nonwoven fabric rolls and stocklots. Its product range differs from the supplied generic label. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Sources: Company page
Input: Infratex_Email_Prospects.xlsx, Prospects row 219.

IR26-215 FPHU Bobas Jaroslaw Budzinski

Direct manufacturer/distributor buyer | Poland (supplied country)
biuro@bobas-bochnia.com.pl

How Infratex could help - option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Business and document evidence: Manufactures and distributes products for babies and children. No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Contact route: No named decision-maker supplied. Intended owner: Finance controller / accounts payable owner, then ERP or IT owner. The email is a company mailbox, not that person's verified address.

Fit and next check: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.
