Infratex prospect research

465 companies | 27 October 2026

250 earlier bounded reports; 15 new software/AI public checks; 200 new manufacturers screened. All remain review needed. Company mailboxes do not establish a named decision-maker or deliverability. Proposed workflows are conditional.

IR27-001 CreditLogic

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Lending | Ireland | employees approx. 11-50

Evidence: Mortgage origination extracts payslips, bank statements and valuations and generates credit packs.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Gavin Bennett Co-founder & CTO; target CTO / Head of Engineering / AI. Published address: info@creditlogic.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract income, balances and valuation fields from mortgage documents into application-review records.

Option 2: Infratex could make mortgage evidence searchable so reviewers can trace a figure to its source.

Gaps: CreditLogic already extracts and validates documents. Compare one unmet case rather than assume replacement demand.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://creditlogic.com/product-mortgage-origination-software/ | Workbook row 6

IR27-002 Cognitive Credit

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Credit analysis | United Kingdom | employees approx. approximately 52 public LinkedIn profiles

Evidence: Maintains a searchable library of official filings and traces credit-analysis data back to source documents.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: sales@cognitivecredit.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract company, period and financial figures from uploaded restricted-company reports into analyst tables.

Option 2: Infratex could make deal documents searchable with references behind credit findings.

Gaps: Its platform already models uploaded reports. Current extraction gap and evaluation owner are unknown.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://cognitivecredit.com/products/app | Workbook row 7

IR27-003 Auquan

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | United Kingdom | employees approx. approximately 49 public LinkedIn profiles (G2)

Evidence: Credit agents gather financial and regulatory documents and produce structured credit-analysis reports.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Shub Jain Co-founder & CTO; target CTO / Head of Engineering / AI. Published address: hello@auquan.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract reporting periods and financial figures from filings into credit-analysis inputs.

Option 2: Infratex could retrieve evidence from regulatory and legal documents behind a credit-monitoring finding.

Gaps: Auquan already automates credit analysis. Establish a specific intake problem and integration route.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.auquan.com/insights/introducing-auquans-credit-agent-the-first-autonomous-ai-for-credit-analysis-and-monitoring | Workbook row 8

IR27-004 Finster AI

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | United Kingdom | employees approx. approximately 25 (public job listing)

Evidence: Financial research platform uses a proprietary document pipeline spanning company filings and research material.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Jishnu Mukhoti Head of Technology; target CTO / Head of Engineering / AI. Published address: contact@finster.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract tables and reporting periods from financial documents for research agents.

Option 2: Infratex could provide source-linked answers across company filings and research material.

Gaps: Finster has its own document pipeline and citations. No unmet requirement is established.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.finster.ai/ | Workbook row 9

IR27-005 Limeglass

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | United Kingdom | employees approx. 11-50

Evidence: Breaks financial research into tagged paragraphs for document search and structured research data.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Simon Gregory CTO & Co-founder; target CTO / Head of Engineering / AI. Published address: simon@limeglass.com (Published named decision-maker address)

Option 1: Infratex could turn research PDFs into text and tables for paragraph-level tagging.

Option 2: Infratex could keep document references beside extracted research passages for search results.

Gaps: Limeglass already structures research. Confirm accepted formats and a gap in its current intake.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.limeglass.com/ | Workbook row 10

IR27-006 Artificial

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. 51-200

Evidence: Structures broker documents and reformats submissions for specialty-insurance placement and underwriting.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Zsolt Szende Chief Technology Officer; target CTO / Head of Engineering / AI. Published address: hello@artificial.io (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract risk details from broker attachments into a submission-review table.

Option 2: Infratex could make placement documents searchable so teams can check the wording behind risk details.

Gaps: Artificial already structures broker data. Exact recurring file types and a reason to compare remain unknown.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://artificial.io/ | Workbook row 11

IR27-007 Insly

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. 51-200

Evidence: FormFlow extracts broker-document information and maps it into MGA and insurer templates.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Joshua von Eicken Chief Product & Technology Officer; target CTO / Head of Engineering / AI. Published address: info@insly.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract broker submission fields into the schema used by an MGA or insurer.

Option 2: Infratex could link each extracted answer to the original attachment for underwriting review.

Gaps: FormFlow already performs extraction and mapping. Identify difficult inputs rather than pitch basic automation.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://insly.com/en/blog/new-insly-ai-tool-allows-mgas-and-insurers-to-process-broker-submissions-in-any-format/ | Workbook row 12

IR27-008 Send

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. 51-200

Evidence: Underwriting platform includes submission management and bordereaux ingestion for commercial and specialty risks.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Chris Newton CTO (appointment announcement, 2024); target CTO / Head of Engineering / AI. Published address: hello@send.technology (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract applicant and risk fields from submission attachments if these enter the triage workflow.

Option 2: Infratex could structure bordereaux rows from document-based exceptions if those occur.

Gaps: Submission management is confirmed, but exact unstructured file types and existing parser are unconfirmed.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://send.technology/platform/submission-management/ | Workbook row 13

IR27-009 AI Superior

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document automation | Germany | employees approx. 10-49

Evidence: A public consulting-firm chatbot case describes private hosting and answers with document references.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Ivan Tankoyeu Co-founder; target Founder / delivery head. Published address: ivan.tankoyeu@aisuperior.com (Published named decision-maker address)

Option 1: Infratex could prepare client document text and tables for a private knowledge assistant.

Option 2: Infratex could return source-linked answers from the consulting client's approved knowledge files.

Gaps: A relevant chatbot case is public; a live new client project and document formats are not confirmed.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://aisuperior.com/ | Workbook row 14

IR27-010 Devstark

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document search | Netherlands | employees approx. 10-49

Evidence: The official page confirms custom software and AI delivery. The legal-document case remains supplied-only.

Evidence strength: supplied_only | Previously checked 26 Oct 2026

Owner/contact: Refat Ametov Co-founder & CEO; target Founder / delivery head. Published address: info@devstark.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract clauses and parties if its reported legal-review project receives PDF contracts.

Option 2: Infratex could prepare source-linked answers if a live client application searches legal files.

Gaps: The supplied Clutch case could not be read. The official page confirms software delivery, not the reported document project.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://clutch.co/profile/devstark; https://www.devstark.com/welcome/ | Workbook row 15

IR27-011 dida

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document automation | Germany | employees approx. 10-49

Evidence: The official site confirms custom machine learning and production delivery. Its supplied legal case was not accessible.

Evidence strength: supplied_only | Previously checked 26 Oct 2026

Owner/contact: Lorenz Richter CTO & Co-founder; target Founder / delivery head. Published address: lorenz.richter@dida.do (Published named decision-maker address)

Option 1: Infratex could extract agreed legal fields if a current client project processes scanned documents.

Option 2: Infratex could make approved legal files searchable if a client needs evidence-linked retrieval.

Gaps: The official site confirms production ML capability; the supplied legal-document case was inaccessible.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://clutch.co/profile/dida; https://dida.do/ | Workbook row 16

IR27-012 Preste

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document search | France | employees approx. 10-49

Evidence: Delivers custom document-processing and knowledge-base query solutions using computer vision and language models.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Thibaut Soubrié CTO & Co-founder; target Founder / delivery head. Published address: contact@preste.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract required fields from client document images for a scoped processing project.

Option 2: Infratex could prepare searchable document content for a client knowledge-base application.

Gaps: Document processing and knowledge-base queries are listed services. A deployed example or live project needs confirmation.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://www.preste.ai/ | Workbook row 17

IR27-013 Framz

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document search | United Kingdom | employees approx. 10-49

Evidence: The supplied record describes accountancy assistants using firm documents and tax guidance. This could not be checked independently.

Evidence strength: supplied_only | Earlier source access incomplete

Owner/contact: Named decision-maker not established unknown; target Founder / delivery head. Published address: accounts@framz.io (Published departmental finance inbox)

Option 1: Infratex could prepare client accounting PDFs for a document-based assistant if that project is current.

Option 2: Infratex could provide source-linked answers from approved tax guidance and firm documents if those inputs are used.

Gaps: Both supplied case access and the homepage failed. Identity, project details and current role need confirmation. Public source access remained incomplete; supplied facts are not independently confirmed.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://clutch.co/profile/framz | Workbook row 18

IR27-014 HAREDATA ELECTRONICS

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | United Kingdom | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: hello@haredata.co.uk (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.haredataelectronics.co.uk/; https://www.europages.co.uk/HAREDATA-ELECTRONICS/00000004603019-416902001.html | Workbook row 19

IR27-015 burster Measurement Solutions GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Germany | employees approx. 100-199

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@burster.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.burster.com/; https://www.europages.co.uk/BURSTER-PRAZISIONSMESSTECHNIK-GMBH-CO-KG/DEU454527-00101.html | Workbook row 20

IR27-016 Mol BV

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Netherlands | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@molhardware.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://molhardware.com/; https://www.europages.co.uk/companies/netherlands/distributor/industrial%20supplies.html | Workbook row 21

IR27-017 Frezamet Bis Sp. z o.o

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Poland | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: faktury@frezamet-bis.com (Published departmental finance inbox)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://frezamet-bis.com/; https://www.europages.co.uk/companies/poland/manufacturer-producer/metal%20components.html | Workbook row 22

IR27-018 TRANSPACK S.A.

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Spain | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@transpackgroup.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract product names, quantities and amounts into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://transpackgroup.com/; https://www.europages.co.uk/TRANSPACK-SA/ESP083392-00101.html | Workbook row 23

IR27-019 DE WITTE SA

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Belgium | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Jazlyn Ching Accounting; target Finance controller / AP manager. Published address: jazlyn@dewitte.com (Published named finance contact)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.dewitte.com/en/; https://www.europages.co.uk/DE-WITTE-SA/00000005505760-001.html | Workbook row 24

IR27-020 ITE Fabriks AB

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Sweden | employees approx. 50-99

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: ite@itefabriks.se (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://itefabriks.se/; https://www.europages.co.uk/companies/sweden/manufacturer-producer/metal%20components.html | Workbook row 25

IR27-021 K-TEC GMBH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Austria | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@ktec.at (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://ktec.at/; https://www.europages.co.uk/KTEC-GMBH/00000005318952-001.html | Workbook row 26

IR27-022 Bo-Inno GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Germany | employees approx. 50-99

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@bo-inno.de (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.bo-inno.de/; https://www.europages.co.uk//00000005454467-001.html | Workbook row 27

IR27-023 LEGRAND CUB

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | France | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: legrandcub@legrandcub.fr (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://legrandcub.fr/; https://www.europages.co.uk/LEGRAND-CUB/FRA266894-000020318001.html | Workbook row 28

IR27-024 FOMIR SRL

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Italy | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: vendite@fomir.it (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

IR27-029 Wachsfabrik Segeberg GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Germany | employees approx. 50-99

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@wachsfabrik.de (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract material names, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.wachsfabrik.de/; https://www.europages.co.uk//00000005316847-001.html | Workbook row 34

IR27-030 MOGRA - FOURNITURES INDUSTRIELLES

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | France | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: contact@mogra.fr (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract material or part references, quantities and charges into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

IR27-038 MEMOLUB

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Belgium | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@memolub.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.memolub.com/; https://www.europages.co.uk/MEMOLUB/BEL071534-00101.html | Workbook row 43

IR27-039 Isovolta AG

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Austria | employees approx. 500-999

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: headquarters@isovolta.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.isovolta.com/; https://www.europages.co.uk//AUT003916-00101.html | Workbook row 44

IR27-040 ezbob

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | United Kingdom | employees approx. approximately 80 (directory)

Evidence: Embedded finance uses invoice, order and payment data. No incoming unstructured document was established.

Evidence strength: data_not_documents | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@ezbob.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract invoice fields if an embedded-lending client sends invoice PDFs rather than structured data.

Option 2: Infratex could prepare financial-statement figures if a lender accepts document-only exceptions.

Gaps: Invoice and order data are confirmed; incoming PDF processing is not. Do not equate transaction data with documents.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://ezbob.com/ | Workbook row 45

IR27-041 Prestatech

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Credit analysis | Germany | employees approx. 51-200

Evidence: Credit intelligence combines bank-statement document processing with cash-flow analysis for lenders.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Granit Gashi CTO; target CTO / Head of Engineering / AI. Published address: platform@prestatech.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract transaction rows and financial figures from uploaded borrower documents into review tables.

Option 2: Infratex could link cash-flow review figures to the original financial statement or payslip.

Gaps: Prestatech already offers document capture and analysis. Compare one confirmed exception, not generic OCR.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.prestatech.com/ | Workbook row 46

IR27-042 CreditOnline

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | Lithuania | employees approx. approximately 42 public LinkedIn profiles

Evidence: Lending product generates loan agreements, repayment schedules and pre-contract disclosures.

Evidence strength: output_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@creditonline.eu (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract borrower fields if loan applications include incoming financial PDFs.

Option 2: Infratex could make signed loan agreements searchable if staff need to retrieve repayment terms.

Gaps: The source establishes generated agreements and disclosures, not incoming extraction.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.creditonline.eu/lending-solutions/instalment-loans/ | Workbook row 47

IR27-043 TIMVERO

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | United Kingdom | employees approx. approximately 15 public LinkedIn profiles

Evidence: Lending SDK includes document templates for contracts, reports and formatted documents.

Evidence strength: storage_or_templates | Previously checked 26 Oct 2026

Owner/contact: Anton Shashok CTO; target CTO / Head of Engineering / AI. Published address: hello@timvero.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract financial fields if a TIMVERO implementation uses uploaded borrower PDFs.

Option 2: Infratex could make a client’s loan documents searchable if document retrieval is an active requirement.

Gaps: Document management, uploads and templates are documented. The deployment-specific input and parser remain unknown.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://documentation.timvero.com/ | Workbook row 48

IR27-044 LendFusion

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | Estonia | employees approx. unknown

Evidence: Loan-management software includes secure document storage and loan-contract generation.

Evidence strength: storage_or_templates | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@lendfusion.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract borrower fields if stored application files include financial statements.

Option 2: Infratex could retrieve repayment terms from signed contracts if servicing teams search those documents.

Gaps: Storage and contract generation do not establish incoming extraction or an unmet need.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://lendfusion.com/ | Workbook row 49

IR27-045 Bankish

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | Estonia | employees approx. 11-50

Evidence: The public page confirms end-to-end lending software. The specific document task remains unverified.

Evidence strength: supplied_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: bankish@bankish.eu (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract financial fields if Bankish clients collect borrower statements as files.

Option 2: Infratex could make credit agreements searchable if servicing staff use them to answer account questions.

Gaps: The reviewed page confirms lending software; the supplied contract-workflow detail needs a more specific source.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://bankish.eu/solutions/ | Workbook row 50

IR27-046 Digilytics

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Lending | United Kingdom | employees approx. 51-200

Evidence: Lending product analyses bank statements, payslips and tax documents for affordability assessment.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: ask@digilytics.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract income, deductions and reporting periods from affordability documents into lending-review fields.

Option 2: Infratex could link affordability calculations to the source payslip, tax record or statement.

Gaps: Existing document analysis is central to Digilytics. Confirm a genuinely unmet format or extraction requirement.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://digilytics.ai/; https://www.digilytics.ai/ | Workbook row 51

IR27-047 INSTANDA

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. unknown

Evidence: A no-code insurance platform is confirmed. Broker-document ingestion was not established on the reviewed page.

Evidence strength: no_intake_evidence | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: sales@instanda.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract proposal-form fields if a commercial-insurance implementation accepts uploaded files.

Option 2: Infratex could make policy schedules searchable if users need source-linked coverage answers.

Gaps: The reviewed homepage confirms a policy platform, not a recurring document-ingestion task.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://instanda.com/ | Workbook row 52

IR27-048 Optalitix

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. 21+ (directory; upper bound unknown)

Evidence: The product turns Excel pricing and underwriting models into APIs. A broker-PDF intake task is unconfirmed.

Evidence strength: structured_models | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: sales@optalitix.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract rating inputs from document-based schedules if clients use them alongside Excel models.

Option 2: Infratex could make underwriting rules searchable if supporting model documentation is supplied as files.

Gaps: Excel-to-API model deployment is confirmed. It does not establish broker-document intake.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.optalitix.com/ | Workbook row 53

IR27-049 mea Platform

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Submission processing | United Kingdom | employees approx. unknown

Evidence: Ingests insurance submissions, loss runs and bordereaux and structures their data for underwriting.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: hello@meaplatform.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract claim dates and amounts from loss runs into an underwriting-review table.

Option 2: Infratex could extract insured-item rows from submission attachments for the agreed insurer schema.

Gaps: mea already sells insurance ingestion and automation. An unmet requirement and willingness to add a component are unknown.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.meaplatform.com/ | Workbook row 54

IR27-050 VIPR

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Submission processing | United Kingdom | employees approx. unknown

Evidence: Bordereaux product validates and transforms delegated-authority files into a consistent insurance-data model.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@viprsolutions.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract bordereaux rows if clients still send PDF or scanned exceptions.

Option 2: Infratex could link disputed bordereaux values to the supporting document page for reviewers.

Gaps: VIPR already validates and transforms data. Confirm unstructured formats rather than assume spreadsheets need parsing.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.viprsolutions.com/; https://viprsolutions.com/ | Workbook row 55

IR27-051 Quotech

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. unknown

Evidence: Lloyd's-focused underwriting tools include automated bordereaux compilation and insurance-document delivery.

Evidence strength: output_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@quotech.io (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract incoming risk fields if Quotech clients submit document-based evidence.

Option 2: Infratex could make policy or risk documents searchable if underwriters need to check original terms.

Gaps: The source confirms bordereaux compilation and document delivery, not incoming parsing.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://quotech.io/; https://www.quotech.io/ | Workbook row 56

IR27-052 Genasys

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. unknown

Evidence: Policy platform maintains policy schedules, claims histories and renewal documents within insurance workflows.

Evidence strength: storage_or_templates | Previously checked 26 Oct 2026

Owner/contact: Craig Olivier Group CTO & Co-founder; target CTO / Head of Engineering / AI. Published address: hello@genasystech.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract claim dates and amounts if an implementation receives claims PDFs.

Option 2: Infratex could make policy schedules searchable if staff need referenced coverage answers.

Gaps: Policy and claims workflows include documents, but exact incoming files and current extraction are unconfirmed.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.genasystech.com/; https://genasystech.com/ | Workbook row 57

IR27-053 DataNorth AI

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document search | Netherlands | employees approx. 10-49

Evidence: Describes its document-processing project work handling PDFs containing multiple invoices and missing reference fields.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Menno Fokkema Founder & CEO; target Founder / delivery head. Published address: menno@datanorth.ai (Published named decision-maker address)

Option 1: Infratex could separate invoice records and extract their fields when a PDF contains multiple invoices.

Option 2: Infratex could flag missing reference fields and return source evidence for the human review step.

Gaps: The published production example is relevant. Identify a current client project and ownership before a partner discussion.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://datanorth.ai/blog/from-proof-of-concept-to-production-what-actually-has-to-change | Workbook row 58

IR27-054 EZR Shelving

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | United Kingdom | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: sales@ezrshelving.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.ezrshelving.com/; https://www.europages.co.uk/companies/united%20kingdom/distributor/industrial%20supplies.html | Workbook row 59

IR27-055 VKF Renzel GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Germany | employees approx. 500-999

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@vkf-renzel.de (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.vkf-renzel.de/; https://www.europages.co.uk//00000005317319-001.html | Workbook row 60

IR27-056 PFI DISTRIBUTION

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | France | employees approx. unknown

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: contact@pfidistribution.fr (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.pfidistribution.com/; https://www.europages.co.uk/PFI-DISTRIBUTION/FRA807317-00101.html | Workbook row 61

IR27-057 INTEGRATED CHEMICALS SPECIALTIES

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Netherlands | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: service@icspecialties.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract material names, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@srg-elektronik.de (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract part numbers, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://www.srg-elektronik.de/; https://www.europages.co.uk/companies/germany/distributor/pg-2/electronic%20components.html | Workbook row 186

IR27-182 Bischoff Elektronik GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Supplier invoices | Germany | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance controller / AP manager. Published address: info@bischoff-elektronik.de (Published company mailbox; not a named decision-maker email)

IR27-187 Valutico

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | Austria | employees approx. approximately 71 public LinkedIn profiles (G2)

Evidence: Eva AI imports income-statement, balance-sheet and cash-flow line items from uploaded PDF and Excel financial statements.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Kashif Javed Puri CTO; target CTO / Head of Engineering / AI. Published address: k.puri@valutico.com (Published named decision-maker address)

Option 1: Infratex could extract income-statement, balance-sheet and cash-flow rows into a reviewed forecast mapping.

Option 2: Infratex could keep period and source references with each financial value for checking.

Gaps: Eva AI already imports and maps financial statements. A difficult-file comparison needs an agreed gap.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://help.valutico.com/en/articles/12656102-upload-pdf-or-excel-file-with-eva-ai | Workbook row 192

IR27-188 Company Watch

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Credit analysis | United Kingdom | employees approx. approximately 35 public LinkedIn profiles (G2)

Evidence: Credit-risk platform includes viewing company documents as PDFs within its company-analysis workflow.

Evidence strength: viewing_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@companywatch.net (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract reporting periods and financial figures if analysts need structured data from company PDFs.

Option 2: Infratex could make company documents searchable with references supporting a credit-review answer.

Gaps: PDF document viewing is evidenced; ingestion, extraction and demand for another component are not.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://support.companywatch.net/knowledge-base/platform | Workbook row 193

IR27-189 Fintech Market

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Lending | Estonia | employees approx. 11-50

Evidence: Mortgage product generates collateral documents from predefined legal and property templates.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Raido Paaslepp CIO; target CTO / Head of Engineering / AI. Published address: info@fintech-market.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract borrower income fields if supporting mortgage documents arrive as PDFs.

Option 2: Infratex could make collateral and mortgage documents searchable if reviewers need cited property terms.

Gaps: Mortgage applications include supporting documents, while collateral templating is an output function. Confirm actual input formats.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://fintech-market.com/mortgage | Workbook row 194

IR27-190 DLabs.AI

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document automation | Poland | employees approx. 10-49

Evidence: Taxando project uses OCR, machine learning and text analysis to extract information from tax documents.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Przemys■aw Majewski Co-founder; target Founder / Delivery head. Published address: sales@dlabs.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract tax-document fields into the client application’s declaration schema.

Option 2: Infratex could link each extracted field to the original page for accounting review.

Gaps: The Taxando case already uses OCR and ML. A live new project and current pipeline needs remain unknown.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://dlabs.ai/case-studies/taxando/ | Workbook row 195

IR27-191 2V Automation.AI

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document search | Portugal | employees approx. 10-49

Evidence: Published client project delivered a RAG chatbot answering aquarium visitor questions from a knowledge base.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Valerian Valkin Founder & CEO; target Founder / Delivery head. Published address: weare@2vmdls.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could prepare document text for a client knowledge assistant if source materials arrive as PDFs.

Option 2: Infratex could provide cited answers from the approved visitor-information knowledge base.

Gaps: The aquarium assistant is deployed adjacent proof; PDF formats, a live new project and financial-sector relevance are unconfirmed.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://www.2vautomation.ai/cases/georgia-aquarium/ | Workbook row 196

IR27-192 laizee.ai

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document automation | Germany | employees approx. 10-49

Evidence: Its official website describes extracting tariff data from unstructured price sheets and an AI insolvency platform.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Dr. Michael Jentgens Co-founder & CEO; target Founder / Delivery head. Published address: contact@laizee.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract tariff values and dates from complex supplier price sheets into structured records.

Option 2: Infratex could prepare source-linked knowledge answers from client documents for its Virtual Expert product.

Gaps: The official site names tariff extraction and an insolvency platform. Establish the active project and component ownership.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://clutch.co/profile/laizeeai; https://laizee.ai/ | Workbook row 197

IR27-193 ObjectSingle

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document automation | Portugal | employees approx. 10-49

Evidence: Built VaultIQ+ for InsightX: retrieved documents feed a private RAG index and auditable due-diligence reports.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Delivery head. Published address: contact@objectsingle.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could structure fields from retrieved due-diligence files if those sources include PDFs or scans.

Option 2: Infratex could keep cited passages beside risk findings for an analyst to review.

Gaps: VaultIQ+ is a relevant delivered product. Licensed data and web retrieval do not by themselves establish difficult PDF intake.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://www.objectsingle.com/case-study/ai-aml-kyc-due-diligence-platform | Workbook row 198

IR27-194 theBlue.ai

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document automation | Germany | employees approx. 10-49

Evidence: A logistics case describes extracting shipment data from German and English emails on the client’s servers.

Evidence strength: email_extraction | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Delivery head. Published address: contact@theblue.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract shipment fields from PDF attachments if they accompany the existing logistics emails.

Option 2: Infratex could make approved transport files searchable if a client needs referenced shipment answers.

Gaps: The case confirms on-premise email extraction. It does not establish PDF attachment intake or a current new requirement.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://theblue.ai/case-studies/fr-meyers-sohn-shipping-data/ | Workbook row 199

IR27-195 Codelive

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | Estonia | employees approx. 11-50

Evidence: The public page confirms loan-management software. An incoming document task was not established.

Evidence strength: supplied_only | Previously checked 26 Oct 2026

Owner/contact: Jüri Pruulmann CTO; target CTO / Head of Engineering / AI. Published address: hello@codelive.ee (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract borrower fields if Codelive clients submit financial statements as PDFs.

Option 2: Infratex could make signed credit agreements searchable if servicing users need original repayment terms.

Gaps: The page confirms lending software; incoming document types and the supplied contract-handling detail need confirmation.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://codelive.ee/loan-management-system/ | Workbook row 200

IR27-196 Validis

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | United Kingdom | employees approx. 11-50 (public directory range)

Evidence: Commercial-lending data is obtained and standardised from accounting systems, rather than an established PDF upload workflow.

Evidence strength: connected_data | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@validis.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract borrower figures from PDF statements if exceptions sit outside accounting-system connections.

Option 2: Infratex could link financial-review answers to supporting report pages if lenders use document-based evidence.

Gaps: Validis primarily standardises connected accounting data. Do not describe those feeds as PDF extraction.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.validis.com/product/commercial-lending/ | Workbook row 201

IR27-197 RiskConcile

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Financial research | Belgium | employees approx. approximately 85 (group, Q1 2026)

Evidence: Investment-risk analytics and reporting produce factsheets and consistent outputs across KID, KIID and related fund documents.

Evidence strength: output_only | Previously checked 26 Oct 2026

Owner/contact: Bram Prosse CTO; target CTO / Head of Engineering / AI. Published address: info@riskconcile.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract disclosed fund terms if clients supply external KIDs or factsheets for comparison.

Option 2: Infratex could make regulatory documents searchable if reviewers need the original wording behind a term.

Gaps: KID, KIID and related reporting outputs are confirmed. Incoming unstructured documents are not.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.riskconcile.com/ | Workbook row 202

IR27-198 finAPI

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Credit analysis | Germany | employees approx. 50+ (company disclosure; upper bound unknown)

Evidence: KreditCheck analyses borrower account data and generates a PDF documenting the lending consultation and decision inputs.

Evidence strength: output_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: kontakt@finapi.io (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract transaction rows if a lending client has statement-only exceptions outside bank feeds.

Option 2: Infratex could make generated consultation PDFs searchable if staff need to retrieve the decision record.

Gaps: The cited page establishes connected bank data and generated PDFs, not uploaded statement extraction.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.finapi.io/en/automation-of-banking-processes/ | Workbook row 203

IR27-199 Finverity

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Lending | United Kingdom | employees approx. approximately 30 public LinkedIn profiles

Evidence: Supply-chain finance platform uploads and groups borrower proof-of-address, identity and ownership documents within financing deals.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Oleg Levitsky Chief Technology Officer; target CTO / Head of Engineering / AI. Published address: info@finverity.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract names, addresses and ownership details from uploaded KYC documents into review fields.

Option 2: Infratex could compare stated identity or ownership details across deal files with source references.

Gaps: A specific document intake is documented. Current verification tools, buyer and unmet extraction requirement remain unknown.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://finverity-vgoav.stonly.com/kb/guide/en/uploading-kyc-documents-i4KaKwWYEa/Steps/3293372 | Workbook row 204

IR27-200 Briink

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | Germany | employees approx. 11-50

Evidence: ESG due diligence for financial institutions extracts source-linked evidence from reports, policies and portfolio-company documents.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Samuel King Co-founder & CTO; target CTO / Head of Engineering / AI. Published address: business@briink.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract environmental metrics and reporting periods from portfolio reports into ESG-review fields.

Option 2: Infratex could return cited answers from policies and reports for disclosure questionnaires.

Gaps: Briink already provides extraction and source-linked answers. Confirm a specific document exception and evaluation owner.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.briink.com/faq | Workbook row 205

IR27-201 Engine AI

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | United Kingdom | employees approx. 11-50

Evidence: Capital-markets research platform extracts company, period and sector metadata from research reports and regulatory filings for document retrieval.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@engineai.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract company, reporting-period and sector metadata from capital-markets reports.

Option 2: Infratex could keep financial tables and source references available to the research retrieval system.

Gaps: Engine AI already describes a specialised extraction and retrieval architecture. A component gap is unconfirmed.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.engineai.com/blog/building-ai-that-understands-capital-markets | Workbook row 206

IR27-202 Web Connectivity

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Insurance software / Submission processing | United Kingdom | employees approx. 11-50 (minimum 20 not confirmed)

Evidence: The homepage confirms insurance connectivity, messaging and integration. Exact unstructured contract inputs remain unverified.

Evidence strength: data_not_documents | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@webconnectivity.uk (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract placement fields if clients exchange PDF attachments alongside market messages.

Option 2: Infratex could make insurance-contract attachments searchable if users need referenced terms.

Gaps: The reviewed homepage establishes connectivity and systems integration, not a specific incoming document format.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://webconnectivityltd.com/ | Workbook row 207

IR27-203 Pancentric Digital

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Insurance software / Commercial underwriting | United Kingdom | employees approx. approximately 22 (public directory estimate, October 2026)

Evidence: The pricing guide lists AI ingestion of unstructured data alongside document generation and policy workflows.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: imagine@pancentric.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract proposal-form fields into Go-Insur quote-and-bind records.

Option 2: Infratex could make policy documentation searchable if service staff need cited coverage answers.

Gaps: The pricing guide lists AI ingestion of unstructured data. Confirm exact proposal formats and the current extraction component.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.pancentric.com/software/go-insur-insurance-software/pricing-guide/ | Workbook row 208

IR27-204 Vstorm

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document search | Poland | employees approx. 10-49

Evidence: Delivered a bilingual knowledge assistant answering journalist questions from ARIJ Network's own materials.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Delivery head. Published address: info@vstorm.co (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could prepare client document text and tables for a bilingual knowledge assistant.

Option 2: Infratex could supply source-linked answers from approved client materials.

Gaps: The ARIJ assistant supports delivery capability; new-project timing, file formats and owner are unconfirmed.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://vstorm.co/ | Workbook row 209

IR27-205 nexocode

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: AI implementation consultancy / Document automation | Poland | employees approx. 10-49

Evidence: Describes delivered procurement document processing that extracts prices, terms and SKUs from proposals, invoices, scans and emails.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Delivery head. Published address: info@nexocode.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract prices, terms and product codes from procurement proposals and invoice files.

Option 2: Infratex could return source references with extracted fields for procurement exception review.

Gaps: A published procurement-processing example is relevant. Confirm a live client project rather than assume one is open.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://nexocode.com/blog/posts/from-automation-to-autonomy-how-agentic-ai-is-transforming-procurement/ | Workbook row 210

IR27-206 Stepwise

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document automation | Poland | employees approx. 10-49

Evidence: Built PERMITS to Fly's system to automate aviation permit documents and associated approval workflows.

Evidence strength: output_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Delivery head. Published address: contact@stepwise.pl (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract flight and operator fields if permit applications begin with emailed or scanned requests.

Option 2: Infratex could make country permit requirements searchable if the client maintains them as documents.

Gaps: The case concerns permit creation and workflows. Incoming extraction and a current project are not established.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://stepwise.pl/case-studies/permits-to-fly/ | Workbook row 211

IR27-207 S9Y.ai

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: AI implementation consultancy / Document automation | Czechia | employees approx. 10-49

Evidence: The official site confirms AI/ML process automation. The supplied review's correspondence-processing claim could not be checked.

Evidence strength: supplied_only | Previously checked 26 Oct 2026

Owner/contact: David Brožík Co-founder; target Founder / Delivery head. Published address: hello@s9y.ai (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could classify incoming correspondence if the reported document-processing project remains active.

Option 2: Infratex could extract case references and dates if those letters arrive as PDFs or scans.

Gaps: The official site confirms AI process automation. The supplied Clutch document case could not be checked.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://clutch.co/profile/s9yai; https://s9y.ai/ | Workbook row 212

IR27-208 LenderKit

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Financial software / Lending | Estonia | employees approx. approximately 36 (2025 cohort profile)

Evidence: White-label lending and crowdfunding back-office lets administrators view investment documents and export detailed reports.

Evidence strength: viewing_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: hello@lenderkit.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract investment terms if platform administrators receive deal documents as files.

Option 2: Infratex could make investment documents searchable with source-linked answers for administrators.

Gaps: Document access is confirmed; uploaded formats, an ingestion gap and current parser are unconfirmed.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://lenderkit.com/ | Workbook row 213

IR27-209 Iceberg Data Lab

Decision: review_needed - document workflow evidenced; current buying need and owner remain unconfirmed

Campaign: Financial software / Financial research | France | employees approx. 11-50

Evidence: Its ESG-focused Barbatus AI extracts environmental data from annual reports for investment and issuer analysis.

Evidence strength: observed | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: contact@icebergdatalab.com (Published company mailbox; not a named decision-maker email)

Option 1: Infratex could extract environmental metrics and reporting periods from annual-report tables.

Option 2: Infratex could keep source references beside ESG data used in issuer analysis.

Gaps: Barbatus already extracts environmental data. Identify a missing format or evaluation need rather than pitch basic extraction.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.icebergdatalab.com/about_us | Workbook row 214

IR27-210 Soma GmbH

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Established manufacturing / distribution | Germany | employees approx. 100-199

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance Controller / Accounts Payable Manager. Published address: info@soma.de (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract item references, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: SOMA is part of KOSTAL and already sells automation. Confirm the local finance owner and an actual AP gap.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

IR27-211 VAN DIEMEN CHEMICALS BV

Decision: review_needed - specific document intake or manual workload remains unconfirmed

Campaign: Manufacturers/distributors / Established manufacturing / distribution | Netherlands | employees approx. 20-49

Evidence: No verified supplier-invoice intake task was found in this bounded pass. Product activity alone does not establish invoice volume or manual work.

Evidence strength: hypothesis_only | Previously checked 26 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Finance Controller / Accounts Payable Manager. Published address: info@vandiemenchemicals.com (Published company mailbox; not a named decision-maker email)

Option 1: If supplier invoices arrive as PDFs, Infratex could extract material names, quantities and unit prices into an AP review table.

Option 2: If orders or delivery records are available, Infratex could prepare line-item comparisons and flag differences for an employee before the agreed export.

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Gaps: Confirm the finance/AP owner, invoice formats and recurring volume, current checks, and the destination system. No deployed connection is assumed.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://zum.lodz.pl/ | Workbook row 255

IR27-251 HES FinTech

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Financial software / Lending | Lithuania | employees approx. Approx. 47 (LeadIQ); LinkedIn range 51-200

Evidence: LoanBox requests bank statements, ID scans, utility bills and financial statements within lender onboarding.

Evidence strength: observed | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@hesfintech.com (Published company mailbox; not a named decision-maker email)

Option 1: Extract income and balance figures from borrower statements into the loan application for reviewer checks.

Option 2: Make uploaded statements searchable with source references for a credit analyst.

Gaps: It already advertises OCR and automated validation; test a specific difficult document type, not a generic replacement.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://hesfintech.com/platform/digital-onboarding/; https://hesfintech.com/ | Workbook row 256

IR27-252 Oper Credits

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Financial software / Lending / mortgage underwriting | Belgium | employees approx. Approx. 30-33 public directory estimates; LinkedIn 51-200

Evidence: Herman classifies mortgage documents, extracts and verifies data, applies credit policy and prepares cases.

Evidence strength: observed | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: sales@opercredits.com (Published company mailbox; not a named decision-maker email)

Option 1: Test extraction of payslip income and tax-record fields for Herman's underwriting case.

Option 2: Return cited answers from a mortgage file so the reviewer can trace any figure.

Gaps: Existing extraction is central to the product; identify an unmet file type or accuracy gap before pitching.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.opercredits.com/ | Workbook row 257

IR27-253 CityFALCON

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Financial software / Financial research | United Kingdom | employees approx. 11-50 (Wellfound)

Evidence: Its financial-content offering includes company filings and extracting insights from customers' own content.

Evidence strength: observed | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: contact@cityfalcon.ai (Published company mailbox; not a named decision-maker email)

Option 1: Structure figures and tables in company filings for its financial-content API.

Option 2: Provide source-linked answers across filings for its enterprise research users.

Gaps: Existing content extraction is advertised; ingestion needs and source formats need qualification.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.cityfalcon.ai/enterprise-products | Workbook row 258

IR27-254 Fignum

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Financial software / Lending / mortgage origination | United Kingdom | employees approx. 27 (2025 specialist-lending report)

Evidence: A lender-technology landscape describes Origin and Adapt for mortgage origination, underwriting and document management.

Evidence strength: observed | Third-party report checked from supplied research

Owner/contact: Steve Carruthers Published contact for Mortgage Tech Pulse; target CTO / Head of Engineering / AI. Published address: steven.carruthers@fignum.com (Published named business email)

Option 1: Test reading mortgage application documents into the fields Origin uses.

Option 2: Make property and income evidence traceable to the source during underwriting review.

Gaps: This workflow is supported by a third-party report, not a current official technical specification; confirm entity, integration owner and input formats.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.woodhurst.com/wp-content/uploads/2025/03/Powering-The-Lenders_The-Technology-Landscape_March-2025.pdf | Workbook row 259

IR27-255 LendingMetrics

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Financial software / Credit analysis / decisioning | United Kingdom | employees approx. Approx. 52-55 (public directory estimates, 2026)

Evidence: The company offers credit decisioning using bureau, open-banking, identity and affordability data.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@lendingmetrics.com (Published company mailbox; not a named decision-maker email)

Option 1: If its customers submit financial statements, turn agreed figures into decisioning inputs.

Option 2: If lender files contain supporting evidence, return cited answers for a reviewer.

Gaps: No PDF ingestion was established; both options are conditional and should not be used as factual email claims.

Qualify: Which borrower or financial document is hardest to process, and who owns its ingestion?

Sources: https://www.lendingmetrics.com/ | Workbook row 260

IR27-256 Northdoor

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Insurance software / Commercial underwriting / policy administration | United Kingdom | employees approx. Approx. 62 (LeadIQ, Aug 2026)

Evidence: NdexInsure includes a document repository and document generation alongside insurance modules.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@northdoor.co.uk (Published company mailbox; not a named decision-maker email)

Option 1: If broker submissions enter NdexInsure, extract risk fields into its underwriting records.

Option 2: If claims files are stored there, provide cited answers against the source documents.

Gaps: Repository and generation are not evidence of loss-run extraction; confirm live intake and component ownership.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.northdoor.co.uk/ndexinsure/ndexinsure-modules/; https://www.northdoor.co.uk/ndexinsure/ | Workbook row 261

IR27-257 Buckhill

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Insurance software / Commercial underwriting / submissions | United Kingdom | employees approx. 51-200 (company C2MS LinkedIn page)

Evidence: C2MS offers an underwriting workbench, quote-and-bind, claims and policy administration.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: sales@buckhill.co.uk (Published company mailbox; not a named decision-maker email)

Option 1: If broker submission PDFs are received, structure the risk fields for the underwriting workbench.

Option 2: If claims files are reviewed, make key dates and amounts searchable with source links.

Gaps: Exact submission input formats and extraction ownership are unconfirmed.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.buckhill.co.uk/; https://www.buckhill.co.uk/contact-us | Workbook row 262

IR27-258 Concirrus

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Insurance software / Specialty underwriting / submission ingestion | United Kingdom | employees approx. 52 public LinkedIn employee profiles

Evidence: Concirrus markets specialty-insurance underwriting and exposure-management software.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@concirrus.com (Published company mailbox; not a named decision-maker email)

Option 1: Test structured capture of broker submission fields for specialty risk triage.

Option 2: Make submission evidence searchable with citations for an underwriter.

Gaps: The supplied launch describes existing AI intake; confirm a gap rather than claiming the company lacks extraction.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://concirrus.ai/; https://www.globenewswire.com/news-release/2026/02/16/3238656/0/en/Concirrus-Launches-Inspire-An-AI-Native-Underwriting-Platform-for-Specialty-Insurance.html | Workbook row 263

IR27-259 ChainThat

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Insurance software / Commercial / specialty policy administration | United Kingdom | employees approx. 51-200 (company LinkedIn)

Evidence: Supplied research describes configurable policy administration for commercial and specialty insurers.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target CTO / Head of Engineering / AI. Published address: info@chainthat.com (Published company mailbox; not a named decision-maker email)

Option 1: If its clients ingest submissions, structure broker forms for policy workflows.

Option 2: If claims schedules enter a client workflow, surface cited answers for a reviewer.

Gaps: Official product page was inaccessible; document ingestion and current vendor route are unverified.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://www.linkedin.com/company/chainthat-limited | Workbook row 264

IR27-260 Insurwave

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: Insurance software / Specialty submissions / exposure management | United Kingdom | employees approx. 51-100 (Crunchbase)

Evidence: Its platform advertises pre-quote data-quality assessment and submission processing for specialty insurers and MGAs.

Evidence strength: observed | Product/case-study page checked 27 Oct 2026

Owner/contact: Manimaran Chandrasekaran Chief Technology Officer; target CTO / Head of Engineering / AI. Published address: info@insurwave.com (Published company mailbox; not a named decision-maker email)

Option 1: Test extraction of exposure schedules into the pre-quote data-quality workflow.

Option 2: Provide source-linked answers over supporting submission documents.

Gaps: It already claims to reduce manual data flow; identify a specific unmet input format.

Qualify: Which submission document and fields recur, and who owns the intake component?

Sources: https://insurwave.com/ | Workbook row 265

IR27-261 Fuzzy Labs

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: AI implementation consultancy / Document AI / case-file workflows | United Kingdom | employees approx. 11-50 (company LinkedIn)

Evidence: Its case study describes an assistant for complex police case-file preparation.

Evidence strength: observed | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Head of AI / Delivery Director. Published address: talk@fuzzylabs.ai (Published company mailbox; not a named decision-maker email)

Option 1: Extract named dates, people and events from client case-file documents for a timeline.

Option 2: Provide cited answers across a case-file bundle for its assistant.

Gaps: The published case is historical and public-sector; an active commercial project is unknown.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://www.fuzzylabs.ai/case-studies/building-an-ai-assistant-to-halve-police-case-file-prep-time | Workbook row 266

IR27-262 Kortical

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: AI implementation consultancy / Document agents / RAG implementation | United Kingdom | employees approx. 11-50 (company LinkedIn)

Evidence: Kortical builds bespoke AI agents connected to clients' data and systems.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Head of AI / Delivery Director. Published address: contact@kortical.com (Published company mailbox; not a named decision-maker email)

Option 1: For a document-heavy client agent, structure PDF tables and scans before the agent uses them.

Option 2: Supply cited answers from client documents inside an agent workflow.

Gaps: It has its own AI platform; a live project and willingness to use an external component need checking.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://kortical.com/ai-agents | Workbook row 267

IR27-263 Eli5

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: AI implementation consultancy / Document handling / workflow integration | Netherlands | employees approx. Around 20 engineers (company page); 11-50 LinkedIn

Evidence: Eli5 describes modernising client systems and AI applications, including a TotalEnergies contract-and-quote workflow.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Kishan Chamman CTO; target Founder / Head of AI / Delivery Director. Published address: kishan@eli5.io (Published named business email)

Option 1: For a comparable client project, extract fields from contracts and quotes into the target system.

Option 2: Provide cited answers from the underlying client documents for review.

Gaps: The published example establishes workflow integration, not that document extraction is required now.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://www.eli5.io/what-we-do | Workbook row 268

IR27-264 Brainpool AI

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: AI implementation consultancy / Document processing / custom AI | United Kingdom | employees approx. 11-50 (company LinkedIn); 22 listed profiles

Evidence: The consultancy describes custom AI implementation, information finding, reports and data structuring.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Head of AI / Delivery Director. Published address: contact@brainpool.ai (Published company mailbox; not a named decision-maker email)

Option 1: If a client project uses scanned reports, extract the agreed fields for its data pipeline.

Option 2: Add cited answers over client PDFs to an information-finding application.

Gaps: The expert network is not employee headcount; no live document project was verified.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://brainpool.ai/faqs | Workbook row 269

IR27-265 Leftshift One

Decision: review_needed - fit plausible; validate the exact document type, current need and integration owner

Campaign: AI implementation consultancy / Document search / enterprise RAG | Austria | employees approx. 11-50 (Crunchbase)

Evidence: MyGPT connects to company knowledge and offers document-grounded enterprise search.

Evidence strength: conditional | Product/case-study page checked 27 Oct 2026

Owner/contact: Named decision-maker not established unknown; target Founder / Head of AI / Delivery Director. Published address: contact@leftshift.one (Published company mailbox; not a named decision-maker email)

Option 1: Structure scanned tables from client files before MyGPT searches them.

Option 2: Return source-linked answers across an agreed client's document set.

Gaps: It operates its own RAG platform; external component fit and an active client need are unconfirmed.

Qualify: Which active client project handles documents, and who owns evaluation and data permission?

Sources: https://leftshiftone.com/en/ | Workbook row 270

IR27-266 Marine Power Engines

Decision: review_needed - manufacturer/distributor screened; actual document workflow unverified

Campaign: Manufacturers/distributors / Supplier-invoice workflow | Germany | employees approx. 2-10

Evidence: Supplied screening identifies marine engines and generators; supplier-invoice automation was proposed, not observed.

Evidence strength: hypothesis_only | Official site unavailable in this pass; supplied screening only

Owner/contact: Named decision-maker not established unknown; target Finance Controller / Accounts Payable Manager. Published address: info@marinepowerengines.com (Published company mailbox; not a named decision-maker email)

Option 1: If it receives supplier invoices and purchase orders, Infratex could extract line items and prepare a price/quantity check.

Option 2: If delivery notes are used, Infratex could structure received quantities for a finance or warehouse review.

Gaps: No public evidence of manual invoice checking, document volume, current ERP or budget owner. Confirm all before outreach about process pain.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Sources: https://marinepowerengines.com/ | Workbook row 271

IR27-267 Simtec Systems

Decision: review_needed - manufacturer/distributor screened; actual document workflow unverified

Campaign: Manufacturers/distributors / Supplier-invoice workflow | Germany | employees approx. 50-100

Evidence: Supplied screening identifies simulation equipment; supplier-invoice automation was proposed, not observed.

Evidence strength: hypothesis_only | Official site opened 27 Oct 2026; product identity only

Owner/contact: Named decision-maker not established unknown; target Finance Controller / Accounts Payable Manager. Published address: info@simtec.de (Published company mailbox; not a named decision-maker email)

Option 1: If it receives supplier invoices and purchase orders, Infratex could extract line items and prepare a price/quantity check.

Option 2: If delivery notes are used, Infratex could structure received quantities for a finance or warehouse review.

Gaps: No public evidence of manual invoice checking, document volume, current ERP or budget owner. Confirm all before outreach about process pain.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

Owner/contact: Named decision-maker not established unknown; target Finance Controller / Accounts Payable Manager. Published address: info@bchltd.com (Published company mailbox; not a named decision-maker email)

Option 1: If it receives supplier invoices and purchase orders, Infratex could extract line items and prepare a price/quantity check.

Option 2: If delivery notes are used, Infratex could structure received quantities for a finance or warehouse review.

Gaps: No public evidence of manual invoice checking, document volume, current ERP or budget owner. Confirm all before outreach about process pain.

Qualify: Do supplier invoices or delivery notes require manual checks, at what volume, and in which system?

IR27-464 DUEVI

Decision: review_needed - manufacturer/distributor screened; actual document workflow unverified

Campaign: Manufacturers/distributors / Supplier-invoice workflow | Italy | employees approx. 20-30

Evidence: Supplied screening identifies industrial manufacturing or distribution, as listed in the public directory; supplier-invoice automation was proposed, not observed.

Evidence strength: hypothesis_only | Official site opened 27 Oct 2026; product identity only
