GROWENCY / ACCOUNT RESEARCH

PostingMachine
The 228-company research report

A sourced brief and a specific content angle for every company in the supplied undrafted list.

228	352	198	30
Companies reviewed	Original source entries	Retained for review	Excluded from this brief

What this report supports

Use the factual hook and proposed angle to prepare relevant outreach. Read the fit caveat before deciding whether a company belongs in the campaign. Potential business fit is an enrichment judgment; it does not mean the lead is fully qualified.

No row is labelled qualified. Customer maturity, contract economics, LinkedIn buyer presence and the founder's remaining content opportunity are not all verified for any retained company.

29 October 2026
Source folder: Growency / Emails / Not Sent / Not Drafted

Open the source CSV in Google Drive

Readout and interpretation

152 potential business fits

Published positioning connects these companies with a plausible professional buyer and a concrete educational content angle. All still require review against the full brief.

46 borderline business fits

The principal uncertainty is buyer definition, company maturity, channel economics, commercial availability or an overlap with the company's existing content product.

30 exclusions

Thirteen fail the current US-company filter in their YC profiles. Seventeen have a consumer, local-creator, proprietary-trading or other business-model mismatch. Exclusion applies to this campaign, not the quality of the company.

112 verified founder-post samples

The post pages support identity, publication date and a limited activity sample. Only six companies have a verified sample in the last 30 days. Missing or older samples never prove inactivity.

Eight retained audience exceptions

Agentcard, Agnost AI, Aktoria Robotics, Dock, Litmus, OpenVector, Pluto and screenpipe exceed the standard 10,000-follower range in guest-page snapshots. An exception requires a specific, documented content-to-pipeline gap.

Positioning changes to watch

Last Accounting Company is now Bear. Almanac describes a pivot. Rindler's older post is about web automation while its current product is a coding-agent workspace. Denta's current employer-benefits positioning differs from an older practice-focused post. Use current products in copy.

Sources & Coverage

Used

The current Drive CSV supplies the exact working set, original contacts and source-row provenance. The Growency lead-research skill and PostingMachine brief define the company, buyer, maturity and founder-audience criteria.

Every company has an inspected public YC profile and an attempted supplied website. Public company claims establish positioning, not independently verified revenue, results or buying intent.

A bounded public-post search targeted one matched founder per company. Up to three promising indexed posts were opened. A post entered the report only when its page supplied a matching author and a publication date. Company posts and other people's posts were not treated as the selected founder's activity.

Unavailable or limited

The company sites returned HTTP 200 for 226 of 228 attempts; a number contained only sparse rendered text. Arbital could not be fetched and Derya returned a missing-page response. Their YC profiles still provide bounded product context.

Four YC profiles did not publish a selected founder LinkedIn URL. The post search and guest pages do not provide complete feeds, posting cadence, buyer engagement quality or an audit of existing content teams. Follower and reaction counts are guest-page snapshots observed on 29 October, potentially cached.

Funding, ARR, employee estimates and ACV were not filled with guesses. Existing email addresses and their source labels are preserved; addresses were not newly guessed or deliverability-tested. The selected founder is a research subject, not automatically the owner of the supplied mailbox; confirm the addressee before using a named greeting.

Coverage and use

Coverage is complete within the supplied 228 company rows and their 352 original source entries. It is not an exhaustive market or provider inventory. Research date: 29 October 2026. The recent-post window is 29 September through 29 October 2026.

Suggested buyer roles and all content angles are hypotheses where the source does not state them explicitly. No need for a service, budget or willingness to pay is inferred from funding, audience size or accelerator affiliation.

The companion CSV preserves all original columns and adds sourced research, current company identity, a selected founder, post details, audience exceptions and review gaps. Original and alternative emails are retained separately. The evidence ledger records source URLs and verification status.

Company directory

P = potential business fit. B = borderline. X = excluded. Every retained lead is review_needed. Click a company to open its brief.

PM-001 / 6thSense

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Tactile training data for robotics and manipulation-model teams.

Specific hook: Its capture hardware combines touch signals with hand pose and egocentric vision. [source]

Founder / LinkedIn: James Baek. Pilot tactile hands designed to align human demonstrations with robot hardware. 2026-06-27. Older sample; current cadence unknown. 2,691 founder followers (guest snapshot).

Angle to test: Show why vision-only demonstrations miss what robot hands need to learn. (hypothesis)

Fit / gaps: The CEO already has content-business experience; establish a distribution gap and paying customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-002 / 83 Sciences

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Materials discovery for industrial R&D teams and academic laboratories.

Specific hook: It combines unpublished experimental records with models to find useful materials. [source]

Founder / LinkedIn: Ian Naccarella. Experimental-data reuse and recruiting an early AI engineer. 2026-07-28. Older sample; current cadence unknown. 4,008 founder followers (guest snapshot).

Angle to test: Build a series around valuable failed experiments that never become papers. (hypothesis)

Fit / gaps: Research partners and technical progress do not establish repeatable commercial revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-003 / Aerogen Systems

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Contamination-control hardware for semiconductor manufacturers and equipment makers.

Specific hook: Talos cleans the environment around wafers inside manufacturing tools. [source]

Founder / LinkedIn: Noah Vogel. Tool-level wafer contamination control and the Talos product launch. 2026-08-18. Older sample; current cadence unknown. 2,796 founder followers (guest snapshot).

Angle to test: Explain the economics of protecting the wafer rather than cleaning the whole building. (hypothesis)

Fit / gaps: Specialist buyers are plausible; current deployments and sales maturity need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-004 / Agency Tool Company

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Deployment infrastructure for robotics engineering teams.

Specific hook: ATC Deploy resumes interrupted transfers and sends changed bytes; YC describes three launch partners. [source]

Founder / LinkedIn: Jack Morrison. Why the founders chose YC and its robotics customer network. 2026-08-03. Older sample; current cadence unknown. 7,782 founder followers (guest snapshot).

Angle to test: Turn field-deployment failures into practical lessons for robotics leaders. (hypothesis)

Fit / gaps: Launch partners indicate use, but paid contracts and the remaining content gap are unknown.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-005 / Agentcard

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Payment infrastructure for teams building personal AI assistants.

Specific hook: Users can authorize agent purchases with a saved card and passkey. [source]

Founder / LinkedIn: Karen Serfaty. A short Agentcard collaboration announcement; limited substantive detail. 2026-09-11. Older sample; current cadence unknown. 13,462 founder followers (guest snapshot).

Angle to test: Explain how an assistant moves from recommending a purchase to completing it safely. (hypothesis)

Fit / gaps: Early-access positioning leaves customer adoption and transaction economics unverified. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-006 / Agnost AI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Production monitoring and model improvement for AI-product teams.

Specific hook: It connects user conversations to recurring agent failures and training opportunities. [source]

Founder / LinkedIn: Shubham Palriwala. Agent failure despite successful technical status codes. 2026-09-14. Older sample; current cadence unknown. 18,448 founder followers (guest snapshot).

Angle to test: Share anonymized examples of technically successful runs that still disappoint users. (hypothesis)

Fit / gaps: Check audience size and existing content maturity before proposing managed posting. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-007 / Akon Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Codebase understanding infrastructure for enterprise engineering teams.

Specific hook: GitNexus maps dependencies and execution paths into a graph used by coding agents. [source]

Founder / LinkedIn: Subham Kundu. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show a cross-file change that plain code search misses. (hypothesis)

Fit / gaps: Open-source adoption alone does not establish paying enterprise customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-008 / Aktoria Robotics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Teleoperation infrastructure and human operations support for robotics companies.

Specific hook: Its site combines low-latency control, trained operators and robot-generated teleoperation data. [source]

Founder / LinkedIn: Jaskaran Singh Walia. Human intervention as a bridge between robotics pilots and deployment. 2026-08-03. Older sample; current cadence unknown. 60,467 founder followers (guest snapshot).

Angle to test: Explain the handoff between autonomous operation and a human intervention. (hypothesis)

Fit / gaps: Confirm contracted robot operators and a buyer audience beyond the robotics ecosystem. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-009 / Alkera AI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Data-work agents for engineering, analytics and data-science teams.

Specific hook: The agent uses lineage and organizational context, with private deployment options. [source]

Founder / LinkedIn: Rick Gao. YC admission and the founding team's background. 2026-06-25. Older sample; current cadence unknown. 3,758 founder followers (guest snapshot).

Angle to test: Teach why a plausible SQL result can still be unsafe to act on. (hypothesis)

Fit / gaps: Enterprise functionality is relevant, but adoption and annual contract value are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-010 / Allia Health

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Clinical operations software and group infrastructure for behavioral-health practices.

Specific hook: The website connects intake, documentation, billing and practice management. [source]

Founder / LinkedIn: Amie Leighton. Connecting behavioral health with primary-care workflows. 2026-09-09. Older sample; current cadence unknown. 9,094 founder followers (guest snapshot).

Angle to test: Use a practice-operator workflow to explain the cost of disconnected systems. (hypothesis)

Fit / gaps: The software-versus-clinical-group proposition and paying customer base need clarification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-011 / Alloovium

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Project information and document intelligence for construction companies.

Specific hook: Its YC description emphasizes exact citations and human approval of drafted work. [source]

Founder / LinkedIn: Zander Schweitzer. Demo Day reflections and post-batch business development. 2026-09-13. Older sample; current cadence unknown. 5,143 founder followers (guest snapshot).

Angle to test: Show how one site conversation can become a traceable project decision. (hypothesis)

Fit / gaps: The homepage emphasizes voice capture; check current positioning before selecting copy.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-012 / Almanac

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: An AI workspace aimed initially at individuals and eventually teams.

Specific hook: It maintains tasks, projects and knowledge without requiring manual updates. [source]

Founder / LinkedIn: Rohan Sharma. Closing an earlier product after downloads failed to establish willingness to pay. 2026-09-01. Older sample; current cadence unknown. 1,852 founder followers (guest snapshot).

Angle to test: Explain the team handoff that becomes easier when work context stays current. (hypothesis)

Fit / gaps: The founder describes a product pivot; use current team-workspace positioning, not the earlier coding product.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-013 / Amorphic Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: A tool marketplace for developers building AI agents.

Specific hook: One connection and balance let agents discover, pay for and use tools. [source]

Founder / LinkedIn: Dylan Kelly. The company's formation and participation in YC. 2026-07-16. Older sample; current cadence unknown. 3,120 founder followers (guest snapshot).

Angle to test: Explain a real agent task that fails because its tools require manual accounts. (hypothesis)

Fit / gaps: Marketplace availability does not establish repeat purchases or enterprise traction.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-014 / Applied Electrodynamics, Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Imaging hardware for construction teams, with other industrial applications planned.

Specific hook: WaveSight aims to reveal structures and utilities hidden inside walls. [source]

Founder / LinkedIn: Bilgehan Avser. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show what a contractor needs to know before drilling or opening a wall. (hypothesis)

Fit / gaps: Verify deployed customer use and distinguish current construction work from future applications.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-015 / Arbital

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: A social trading product for individual market participants.

Specific hook: Its public description centers retail trading across equities, crypto and derivatives. [source]

Founder / LinkedIn: Karon Pangestu. Press coverage of the trading product. 2026-09-03. Older sample; current cadence unknown. 24,618 founder followers (guest snapshot).

Angle to test: No standard PostingMachine campaign angle; a B2B infrastructure pivot would need separate evidence. (hypothesis)

Fit / gaps: Consumer trading is outside the supplied B2B brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-016 / Archal

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: API test environments for engineering teams building integrated AI agents.

Specific hook: Sandboxes can reset state quickly after an agent changes connected applications. [source]

Founder / LinkedIn: Aidan Tiruvan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why testing an agent requires more than replaying a successful API response. (hypothesis)

Fit / gaps: Current paying users and enterprise contract size are not established.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-017 / Assemble

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI development workers for enterprise IT and business-systems teams.

Specific hook: Agents scope, implement and validate changes across ERP, CRM and HR systems. [source]

Founder / LinkedIn: Aliyan Ishfaq. Giving business users reviewable deliverables alongside technical agent traces. 2026-10-01. Within the 30-day window. 4,240 founder followers (guest snapshot).

Angle to test: Explain the dependencies hidden inside a seemingly simple CRM change. (hypothesis)

Fit / gaps: Enterprise relevance is clear; deployment evidence and content needs remain open.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-018 / Async

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Business-automation agents marketed to company owners.

Specific hook: The current site starts with an audit of public presence and automation opportunities. [source]

Founder / LinkedIn: Ben Smith. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show one repetitive business process from audit through operational result. (hypothesis)

Fit / gaps: The proposition is broad; a specific buyer, customer and repeatable use case are needed.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-019 / Atlas Discovery

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: An AI-led drug-development company focused on overlooked rare-disease opportunities.

Specific hook: It combines biomedical research agents, biology models and data partnerships. [source]

Founder / LinkedIn: Shaamil Karim. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how an abandoned drug can become a credible research opportunity. (hypothesis)

Fit / gaps: Research progress is not a conventional B2B sales motion; identify a commercial buyer first.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-020 / Atlia

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Short-term rental management for property owners.

Specific hook: The site advertises a flat management fee covering guests, pricing and property operations. [source]

Founder / LinkedIn: Edmond Niu. An example property managed by the company's agents. 2026-09-10. Older sample; current cadence unknown. 2,108 founder followers (guest snapshot).

Angle to test: A portfolio-operator education angle is possible only if an institutional buyer segment is confirmed. (hypothesis)

Fit / gaps: Consumer property-owner acquisition and local operations depart from the software-led target.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-021 / Atomarine

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Floating nuclear-powered compute infrastructure for large capacity buyers.

Specific hook: It proposes separate nuclear power ships and floating compute barges. [source]

Founder / LinkedIn: Dimitris Koutentakis. A new approach to meeting compute-infrastructure demand. 2026-08-19. Older sample; current cadence unknown. 3,500 founder followers (guest snapshot).

Angle to test: Explain the infrastructure bottlenecks that offshore compute is intended to avoid. (hypothesis)

Fit / gaps: Capital-project development, customer contracts and an active sales process are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-022 / Audun

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: NO

Business / buyers: Debt-collection operations, initially serving Norway.

Specific hook: The site combines AI routine handling with specialist intervention. [source]

Founder / LinkedIn: Jacob Hambro. Early public discussion of the debt-collection company. 2026-07-28. Older sample; current cadence unknown. 2,427 founder followers (guest snapshot).

Angle to test: Retain the workflow research for a separately authorized non-US campaign. (hypothesis)

Fit / gaps: YC identifies Norway; it fails the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-023 / Autoresearch, Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Model-improvement research services for teams with measurable agent tasks.

Specific hook: It compares training, prompts, tools and systems against the customer's evaluation. [source]

Founder / LinkedIn: Karan Brar. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a better task evaluation can matter more than a larger model. (hypothesis)

Fit / gaps: Technical scope is credible, but paying projects and the commercial motion are unknown.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-024 / Avoca Systems

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Patient-access automation for radiology networks.

Specific hook: Its workflow spans calls, referrals, scheduling and follow-up with imaging-specific constraints. [source]

Founder / LinkedIn: Max Shand. Welcoming an investor to the radiology-automation business. 2026-09-06. Older sample; current cadence unknown. 6,821 founder followers (guest snapshot).

Angle to test: Explain why booking a scan is more complex than finding an empty calendar slot. (hypothesis)

Fit / gaps: Confirm named network deployments and permission to use any operational outcomes.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-025 / Axelrod

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operational automation for hotels.

Specific hook: YC describes live hotel use and names Marriott and Michelin Key properties as references. [source]

Founder / LinkedIn: Adrian Lucas Tariel Stoica. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Turn a front-desk exception into a practical hotel-operations story. (hypothesis)

Fit / gaps: Reference wording is self-reported; verify the customer relationship and measurable results.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-026 / Baud

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI training and inference chips for model developers and compute operators.

Specific hook: Its design targets both training and serving performance. [source]

Founder / LinkedIn: Sarang Zambare. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain a specific hardware bottleneck that general-purpose accelerators leave unresolved. (hypothesis)

Fit / gaps: The reviewed material does not establish commercial silicon or paying deployments.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-027 / Belvedir

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Automated private-model creation for companies building AI products.

Specific hook: Its launch describes a short setup process and use by ten companies. [source]

Founder / LinkedIn: Zachary Yu. Returning to YC to build the company. 2026-06-26. Older sample; current cadence unknown. 9,536 founder followers (guest snapshot).

Angle to test: Show when a small private model beats paying for a general model on every request. (hypothesis)

Fit / gaps: Company usage is self-reported and does not establish paid retention.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-028 / Bernard

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Front-office and workflow automation for appliance repair businesses.

Specific hook: Its Pre-ID workflow links symptoms to probable parts before a technician arrives. [source]

Founder / LinkedIn: Dan Katzman. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the economics of a technician arriving with the wrong part. (hypothesis)

Fit / gaps: Small-servicer buyer reach and contract economics need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-029 / Billow AI Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Accounting and finance operations for business finance teams.

Specific hook: The workflow includes workpapers, approvals and information gathering across existing systems. [source]

Founder / LinkedIn: Joanathan McIntosh. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show how a month-end exception moves between finance stakeholders. (hypothesis)

Fit / gaps: Founder track record is not evidence of current customer outcomes.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-030 / Bizmark

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Procurement and production automation for manufacturers.

Specific hook: YC reports live factories and recurring revenue for its Otto agent. [source]

Founder / LinkedIn: Rodrigo Mosqueira. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how one purchase-order or quoting task flows through factory spreadsheets. (hypothesis)

Fit / gaps: Revenue is company-reported; confirm current customer mix and paid deployment maturity.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-031 / Bloomy

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI curriculum and instruction infrastructure for schools.

Specific hook: It combines learning content, tutoring and assessment with school-facing dashboards. [source]

Founder / LinkedIn: Alex Southmayd. Presenting the education product at a public-sector AI conference. 2026-07-20. Older sample; current cadence unknown. 3,719 founder followers (guest snapshot).

Angle to test: Teach how a school can spot a learning gap before the next formal assessment. (hypothesis)

Fit / gaps: Buyer access and school procurement cycles need validation; student adoption is not a contract.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-032 / Callbook AI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI-operated debt collection for lenders and portfolio owners.

Specific hook: It locates borrowers and negotiates across calls, text and email. [source]

Founder / LinkedIn: Diego Avellaneda. The founders' journey to the YC company launch. 2026-05-24. Older sample; current cadence unknown. 3,506 founder followers (guest snapshot).

Angle to test: Explain how collection strategy changes between contactability and negotiated recovery. (hypothesis)

Fit / gaps: Do not imply compliance or recovery gains without specific supporting evidence.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-033 / Capto

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Government-sales execution for companies pursuing public-sector contracts.

Specific hook: It combines buyer development, capture research and proposal work. [source]

Founder / LinkedIn: Ananth Sankaralingam. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show what changes between finding a tender and shaping a credible capture plan. (hypothesis)

Fit / gaps: Current client evidence and differentiation from existing sales services need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-034 / Care GP

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: AU

Business / buyers: Operations automation for Australian primary-care clinics.

Specific hook: The website explicitly describes Australian GP workflows. [source]

Founder / LinkedIn: Melvin Chen. Healthcare-document processing volume and clinic adoption. 2026-06-11. Older sample; current cadence unknown. 19,518 founder followers (guest snapshot).

Angle to test: Keep the clinic-operations angle for a separate Australia campaign. (hypothesis)

Fit / gaps: YC identifies Australia, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-035 / CarSignal

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Repair-shop operating software for independent auto businesses.

Specific hook: An August founder post reports expansion from two to more than forty repair shops. [source]

Founder / LinkedIn: Michael Muzzin. Reported growth from two to more than forty repair shops. 2026-08-19. Older sample; current cadence unknown. 1,159 founder followers (guest snapshot).

Angle to test: Explain how a diagnosis delay becomes a parts and scheduling problem. (hypothesis)

Fit / gaps: The post establishes reported adoption, but paid status, ACV and buyer-channel fit remain unknown.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-036 / Caution

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: KY

Business / buyers: Confidential-compute hosting for developers of security-sensitive software.

Specific hook: It lets counterparties verify the reviewed code and runtime deployed inside enclaves. [source]

Founder / LinkedIn: Anton Livaja. A customer case involving verifiable confidential computing. 2026-09-09. Older sample; current cadence unknown. 3,821 founder followers (guest snapshot).

Angle to test: Explain what a buyer can verify beyond a vendor's security promise. (hypothesis)

Fit / gaps: YC identifies the Cayman Islands; the current US-company filter is not met.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-037 / Click

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Managed execution infrastructure for AI-agent developers.

Specific hook: It supplies sessions, tools and sandboxes through an API. [source]

Founder / LinkedIn: Aditya Asgaonkar. The managed-agent product and its MCP launch. 2026-08-12. Older sample; current cadence unknown. 3,794 founder followers (guest snapshot).

Angle to test: Demonstrate the operational work between an agent prototype and a production workload. (hypothesis)

Fit / gaps: Usage, retention and paid infrastructure spend remain unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-038 / COACH

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Conversation analysis and coaching for field-sales organizations.

Specific hook: The founder describes revenue growth through cold calls and direct visits to sales teams. [source]

Founder / LinkedIn: Mathieu Perez. Revenue growth through founder-led outbound and in-person selling. 2026-08-26. Older sample; current cadence unknown. 7,314 founder followers (guest snapshot).

Angle to test: Share a field-sales objection and the coaching action it should trigger. (hypothesis)

Fit / gaps: Reported revenue supports a functioning sales motion; verify figures and the remaining content gap.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-039 / CoArena

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Computer-use evaluations and data for AI labs.

Specific hook: Users compare models on the same practical computer task. [source]

Founder / LinkedIn: Prateek Jannu. Campus-ambassador recruiting for the evaluation platform. 2026-08-28. Older sample; current cadence unknown. 5,254 founder followers (guest snapshot).

Angle to test: Explain why a benchmark win can disagree with real task completion. (hypothesis)

Fit / gaps: A public benchmark audience does not establish a repeatable paying buyer.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-040 / Codag

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Tool-output compression and spend controls for AI-development teams.

Specific hook: Codag reduces the volume of tool results before agents consume them. [source]

Founder / LinkedIn: Michael Zhou. YC admission after several product and sales iterations. 2026-05-24. Older sample; current cadence unknown. 4,160 founder followers (guest snapshot).

Angle to test: Show a large tool response before and after useful context is preserved. (hypothesis)

Fit / gaps: Any cost or accuracy gains remain vendor claims until independently tested.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-041 / Computable

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: GPU-capacity trading infrastructure for compute buyers and suppliers.

Specific hook: The proposition prices capacity by specific usage periods rather than long commitments. [source]

Founder / LinkedIn: . No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the difference between owning capacity and needing compute on particular dates. (hypothesis)

Fit / gaps: Market liquidity, executable contracts and actual customer demand need checking.

Sources: Company / YC. Checked 29 Oct 2026.

PM-042 / Conifer

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Model routing and inference-cost controls for AI teams.

Specific hook: It handles model, provider and cache decisions inside existing agent tools. [source]

Founder / LinkedIn: Charles Muehlberger. The founder's background and a media interview. 2026-07-19. Older sample; current cadence unknown. 859 founder followers (guest snapshot).

Angle to test: Explain a routing decision where the cheapest call produces an expensive retry. (hypothesis)

Fit / gaps: Savings claims and enterprise adoption need independent validation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-043 / Context.dev

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Web-data APIs for teams building AI applications.

Specific hook: A founder case describes a travel planner using discussion data and browser actions. [source]

Founder / LinkedIn: Yahia Bakour. A travel-planning case using discussion data and browser actions. 2026-09-21. Older sample; current cadence unknown. 8,370 founder followers (guest snapshot).

Angle to test: Show why fresh page context changes an agent's answer or action. (hypothesis)

Fit / gaps: The use case is specific; paid retention and an unsolved content need remain unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-044 / Control Seat

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Plant monitoring and operational intelligence for industrial teams.

Specific hook: It combines existing plant data with sensors to investigate equipment changes. [source]

Founder / LinkedIn: Warren Shepard. The founder's background and work on industrial operations. 2026-06-18. Older sample; current cadence unknown. 2,731 founder followers (guest snapshot).

Angle to test: Walk through the first signals of a developing equipment fault. (hypothesis)

Fit / gaps: Verify live plants and separate monitoring capability from autonomous control claims.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-045 / Cosmic Robotics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Construction robots for solar infrastructure and related projects.

Specific hook: YC describes field installations and a NASA lunar-construction contract. [source]

Founder / LinkedIn: James Emerick. Recognition through an American solar-innovation competition. 2026-07-07. Older sample; current cadence unknown. 3,978 founder followers (guest snapshot).

Angle to test: Show an actual solar-panel installation bottleneck from the operator's perspective. (hypothesis)

Fit / gaps: Treat deployment and productivity statements as company-reported until confirmed.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-046 / Cova

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Medicaid enrollment and payment support for family caregivers.

Specific hook: The current service helps individuals receive compensation for caring for relatives. [source]

Founder / LinkedIn: Jordan Ibe. Family-caregiver compensation and the company's launch. 2026-06-30. Older sample; current cadence unknown. 2,093 founder followers (guest snapshot).

Angle to test: No standard founder-to-B2B-buyer angle is supported by the reviewed proposition. (hypothesis)

Fit / gaps: The primary acquisition motion is consumer caregiving, outside the brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-047 / CueBench

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Post-training environments for scientific reasoning and performance work.

Specific hook: Its public positioning focuses on reinforcement-learning environments. [source]

Founder / LinkedIn: Dillon Mehta. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain one measurable scientific task and what makes its feedback reliable. (hypothesis)

Fit / gaps: The available product detail is thin; buyers and paid deployments remain unclear.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-048 / Daqstra

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Test orchestration for aerospace, energy and robotics engineering teams.

Specific hook: It connects fragmented physical test hardware and historical measurements through an API. [source]

Founder / LinkedIn: Darell Chua. The product launch and outreach to hardware-test leaders. 2026-07-23. Older sample; current cadence unknown. 1,672 founder followers (guest snapshot).

Angle to test: Show how a test engineer reconstructs a failed run across several devices. (hypothesis)

Fit / gaps: Confirm paid deployments and quantify time saved only from a specific case.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-049 / Datoric

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Custom robotics datasets for physical-AI model teams.

Specific hook: It links captured data to contributors, consent and processing history. [source]

Founder / LinkedIn: Nikhil Reddy. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a robot-model failure becomes a testable data-collection request. (hypothesis)

Fit / gaps: Customer claims and data rights should be checked before use in outreach.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-050 / Dawn Industries

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Fault diagnosis and recovery assistance for industrial automation cells.

Specific hook: VIM connects cell equipment and prepares an operator-approved recovery action. [source]

Founder / LinkedIn: Joohyun (CJ) Cha. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Tell the story of one fault from first alarm to approved recovery. (hypothesis)

Fit / gaps: Published recovery and savings figures are vendor claims; confirm real installations.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-051 / Decawork

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Context-aware action approval for enterprise AI agents.

Specific hook: Its models evaluate proposed actions against task context and company policy. [source]

Founder / LinkedIn: Aman Raj. Post-launch customer calls and demonstrations. 2026-08-18. Older sample; current cadence unknown. 5,980 founder followers (guest snapshot).

Angle to test: Explain why the same action can be appropriate in one task and unsafe in another. (hypothesis)

Fit / gaps: Confirm production buyers and distinguish policy decisions from identity permissions.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-052 / DeepReach Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Real-world data collection infrastructure for physical-AI developers.

Specific hook: It recruits local expert partners and supplies wearable capture devices. [source]

Founder / LinkedIn: Tim Li. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what domain experts contribute that generic video datasets cannot. (hypothesis)

Fit / gaps: Partner recruitment does not by itself establish contracted model customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-053 / Denta

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Dental benefits for startup employers and their employees.

Specific hook: It gives employers a card-based route to employee dental spending. [source]

Founder / LinkedIn: Jack Beecher. Operational habits of profitable dental practices. 2026-07-02. Older sample; current cadence unknown. 1,779 founder followers (guest snapshot).

Angle to test: Explain how a small company can make dental benefits easier to understand. (hypothesis)

Fit / gaps: Current employer-benefits positioning differs from an older post about dental practices; use the current proposition.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-054 / Derya

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Supply-chain execution services for companies buying and moving goods.

Specific hook: Its description covers procurement through distribution across several industries. [source]

Founder / LinkedIn: Mert Turna. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Trace one order from supplier discovery to operational handoff. (hypothesis)

Fit / gaps: The supplied website returned 404; use the YC description cautiously and verify current positioning.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-055 / Dialogus

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Enterprise voice agents for customer operations.

Specific hook: It aims to complete service work across connected systems rather than only answer calls. [source]

Founder / LinkedIn: Juberth Rodriguez. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show what must happen after a customer asks to change an order. (hypothesis)

Fit / gaps: Enterprise breadth does not establish a working deployment or measured resolution rate.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-056 / Dipole Labs

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Optical networking hardware for large AI-compute clusters.

Specific hook: It switches light between racks to reduce electronic routing overhead. [source]

Founder / LinkedIn: Deepankur Thureja. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why more GPUs can make a cluster wait longer for data. (hypothesis)

Fit / gaps: Commercial hardware availability and customer evaluations are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-057 / Dock

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI workers for entrepreneurs operating small businesses.

Specific hook: The product presents agents as workers that find customers and carry out business tasks. [source]

Founder / LinkedIn: Mike Molinet. Personal onboarding and learning directly from users. 2026-09-30. Within the 30-day window. 18,744 founder followers (guest snapshot).

Angle to test: Explain which decisions stay with the owner when agents handle execution. (hypothesis)

Fit / gaps: The target business type, demonstrated results and willingness to pay need narrowing. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-058 / Donkey

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Managed import purchasing for small-business buyers.

Specific hook: It combines a delivered price, supplier payment and inspection under one seller relationship. [source]

Founder / LinkedIn: Benjamin Martindale. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the hidden handoffs behind a supposedly cheap factory quote. (hypothesis)

Fit / gaps: SMB procurement can fit, but buyer reach and recurring sales economics need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-059 / Dream

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Automated asset-condition capture for dealerships, fleets and rental operators.

Specific hook: Camera records connect vehicle or equipment movements to documented damage. [source]

Founder / LinkedIn: Ryland Birchmeier. Public engagement with a product launch; attention rather than revenue proof. 2026-08-19. Older sample; current cadence unknown. 2,191 founder followers (guest snapshot).

Angle to test: Show the difference between spotting damage and proving when it happened. (hypothesis)

Fit / gaps: Confirm named operator deployments and avoid assuming disputed-damage losses.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-060 / Earendil Robotics

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Counter-drone systems and training for defense organizations.

Specific hook: The product description spans detection, interception and operator training. [source]

Founder / LinkedIn: James Walton. A short event participation update; little product detail. 2026-08-19. Older sample; current cadence unknown. 1,815 founder followers (guest snapshot).

Angle to test: Use public procurement and deployment lessons to explain buyer requirements. (hypothesis)

Fit / gaps: Government procurement may depend on routes other than founder-led LinkedIn; paid contracts are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-061 / Edgerun

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Wearable mobility hardware for military customers.

Specific hook: YC describes iterative field testing and letters of intent. [source]

Founder / LinkedIn: David Venegas. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what repeated field tests teach about usable equipment. (hypothesis)

Fit / gaps: Letters of intent are not revenue; validate procurement maturity and commercial need.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-062 / EdotEnv

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Quantitative research environments for AI labs and research groups.

Specific hook: It uses market-related tasks to train and evaluate research agents. [source]

Founder / LinkedIn: Rui Wang. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a research benchmark needs feedback beyond a plausible answer. (hypothesis)

Fit / gaps: The external paying buyer and concrete product scope remain unclear.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-063 / Edviro

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Energy operations automation for infrastructure owners and operators.

Specific hook: It connects meters and equipment to diagnosis, maintenance and authorized control. [source]

Founder / LinkedIn: Hursh Shah. Facility-aware AI decisions and an energy-industry event. 2026-09-25. Older sample; current cadence unknown. 2,242 founder followers (guest snapshot).

Angle to test: Show how one energy anomaly becomes a work order and a verified action. (hypothesis)

Fit / gaps: Verify operating deployments and distinguish recommendations from approved equipment control.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-064 / Egoist Machines

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Portable personal-context infrastructure for AI applications.

Specific hook: AI Passport aims to let a user's context persist across products. [source]

Founder / LinkedIn: Erin McGurk. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A developer-facing story could explain consent and portable context if a B2B API is sold. (hypothesis)

Fit / gaps: The public proposition is individual-centered; the enterprise commercial motion is unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-065 / Ekho Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Disruption intelligence for freight and logistics teams.

Specific hook: It connects geopolitical and operational events to exposed shipments. [source]

Founder / LinkedIn: Alina Park. An older freight-disruption brief; event claims were not independently checked. 2026-03-02. Older sample; current cadence unknown. 1,416 founder followers (guest snapshot).

Angle to test: Explain how a tariff or strike changes a specific shipment decision. (hypothesis)

Fit / gaps: Predictive performance and actual customer workflows need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-066 / Ekpa

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Investment research assistance for retail investors.

Specific hook: The launch explicitly describes individualized portfolio advice for retail users. [source]

Founder / LinkedIn: Anant Asthana. A short retail-trading positioning statement. 2026-07-09. Older sample; current cadence unknown. 730 founder followers (guest snapshot).

Angle to test: No standard B2B campaign angle is established. (hypothesis)

Fit / gaps: Retail investing is outside the supplied founder-to-business-buyer brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-067 / Elite

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Patient front-office automation for healthcare practices.

Specific hook: It aims to complete scheduling and related administrative work within practice systems. [source]

Founder / LinkedIn: Raj Jagiasi. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why answering a call is different from finishing the patient's request. (hypothesis)

Fit / gaps: Verify deployed practices, workflow permissions and measurable outcomes.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-068 / Enact

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Physical evaluation and training environments for robotics developers.

Specific hook: It tests robot failures on commercially valuable tasks. [source]

Founder / LinkedIn: James Stevens. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show the gap between a robot demo and repeated success on a real task. (hypothesis)

Fit / gaps: The reviewed description does not establish paying customers or deployment scale.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-069 / Erinys

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operating infrastructure for lawyers launching and growing firms.

Specific hook: The proposition includes intake, back office and client acquisition while lawyers own legal decisions. [source]

Founder / LinkedIn: Sasha Zyuzin. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain which nonlegal tasks slow a lawyer's first months of firm ownership. (hypothesis)

Fit / gaps: Its own client-acquisition service may overlap with the proposed need.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-070 / Ethos Space Resources

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Lunar silicon production infrastructure for space-industry buyers.

Specific hook: It proposes processing lunar material into inputs for space-based solar power. [source]

Founder / LinkedIn: Ross Centers. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the industrial bottleneck between lunar resources and usable power hardware. (hypothesis)

Fit / gaps: Long development cycles and unverified commercial contracts weaken near-term campaign fit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-071 / Evergrove

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Care-coordination voice automation for workers' compensation organizations.

Specific hook: YC describes high call volumes and deployments with managed-care and therapy networks. [source]

Founder / LinkedIn: Sid Unnithan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Turn a stalled authorization or referral into an operator-focused workflow story. (hypothesis)

Fit / gaps: Performance figures are self-reported and require specific customer confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-072 / Executor

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: A shared tool gateway for teams deploying AI agents.

Specific hook: One integration layer connects agents with MCP, GraphQL and OpenAPI services. [source]

Founder / LinkedIn: Rhys Sullivan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what breaks when every agent maintains its own integration credentials. (hypothesis)

Fit / gaps: Open-source availability does not establish enterprise demand or paid adoption.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-073 / Exosat

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Satellite connectivity infrastructure for organizations seeking sovereign alternatives.

Specific hook: Its proposition emphasizes manufacturing and supply-chain independence. [source]

Founder / LinkedIn: Edward Ge. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the procurement tradeoff between satellite cost, launch capacity and sovereignty. (hypothesis)

Fit / gaps: Production, licensing and customer contracts are unverified; avoid repeating regulatory claims as conclusions.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-074 / Experiential Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI access and model-improvement infrastructure for enterprise budget owners.

Specific hook: Its gateway combines model-access controls with learning from customer traffic. [source]

Founder / LinkedIn: Kion Fallah. Learning from model usage and the company launch. 2026-07-17. Older sample; current cadence unknown. 2,328 founder followers (guest snapshot).

Angle to test: Explain how a company's inference traffic could become a proprietary model asset. (hypothesis)

Fit / gaps: Verify training permissions, paid deployments and any actual model improvements.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-075 / Fabraix

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Continuous security testing for companies deploying AI agents.

Specific hook: Nyx searches for vulnerabilities in customer-facing agent workflows. [source]

Founder / LinkedIn: Ahmed Aly. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why an agent update can reopen a previously closed attack path. (hypothesis)

Fit / gaps: Published benchmark results and large-company references are vendor claims.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-076 / Financial Datasets

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Financial search and structured market data for agent developers.

Specific hook: A founder post describes an enterprise prospect whose agent signed up and obtained payment approval. [source]

Founder / LinkedIn: Virat Singh. An enterprise prospect's agent signing up and obtaining payment approval. 2026-09-15. Older sample; current cadence unknown. 1,464 founder followers (guest snapshot).

Angle to test: Show how an agent traces a financial answer back to the original disclosure. (hypothesis)

Fit / gaps: One reported agent-led signup does not establish paid retention or an enterprise contract.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-077 / Floracene

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Internal-tool creation for healthcare operators without engineering teams.

Specific hook: It connects generated applications to production data with scoped access. [source]

Founder / LinkedIn: Asaph Kupferman. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the final operational gap between a prototype and a deployable clinic tool. (hypothesis)

Fit / gaps: Do not imply regulatory compliance from marketing language; customer deployment is unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-078 / Florin

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: An insurance carrier using AI-supported underwriting.

Specific hook: It reads application forms and investigates external risk evidence. [source]

Founder / LinkedIn: Shaurya Aggarwal. The founder's route into YC. 2026-07-30. Older sample; current cadence unknown. 4,881 founder followers (guest snapshot).

Angle to test: Explain a material exposure that an application form alone does not reveal. (hypothesis)

Fit / gaps: Carrier operations, bound policies and distribution relationships require confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-079 / FlowManual

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Estimating, bidding and purchasing software for construction contractors.

Specific hook: It connects pre-construction buying decisions for general and specialty contractors. [source]

Founder / LinkedIn: David Shijoon Bae. Customer-informed priorities for construction pre-planning software. 2026-08-20. Older sample; current cadence unknown. 2,585 founder followers (guest snapshot).

Angle to test: Show how a late supplier quote changes a contractor's bid. (hypothesis)

Fit / gaps: Validate contractor use and economics before assuming a scalable LinkedIn motion.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-080 / Frontier Computing

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: GB

Business / buyers: Biological computing research and infrastructure.

Specific hook: It develops larger biological neural networks as a computing substrate. [source]

Founder / LinkedIn: Michael Domarkas. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the technical explanation for a separately scoped campaign. (hypothesis)

Fit / gaps: YC identifies the United Kingdom, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-081 / Gamgee

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Cancer-treatment development beginning with companion animals.

Specific hook: Its origin story centers a personalized treatment developed for a founder's dog. [source]

Founder / LinkedIn: Paul Conyngham. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A veterinary-partnership angle requires a verified professional buyer and distribution plan. (hypothesis)

Fit / gaps: The current patient/owner proposition does not establish a suitable B2B sales motion.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-082 / General Context Labs

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI-product and dataset development for model builders.

Specific hook: Instaplay supplies an interactive app-generation product and a potential behavior-data source. [source]

Founder / LinkedIn: Akhil Aggarwal. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a product's real usage can expose missing model capabilities. (hypothesis)

Fit / gaps: A large user count is not proof of paying AI-lab customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-083 / GitCafe

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Version-control infrastructure for teams running coding agents.

Specific hook: Its infrastructure is designed for much larger commit and CI volumes. [source]

Founder / LinkedIn: Veronica C.. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why agent-generated changes stress assumptions in ordinary Git workflows. (hypothesis)

Fit / gaps: Engineer adoption is company-reported; enterprise contracts remain unverified.

Sources: Company / YC. Checked 29 Oct 2026.

PM-084 / Glen

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Shared organizational memory for companies running several AI agents.

Specific hook: It combines agent sessions with work artifacts to supply previous task context. [source]

Founder / LinkedIn: Nikos Dritsakos. Shared learning infrastructure for workplace agents. 2026-08-20. Older sample; current cadence unknown. 6,521 founder followers (guest snapshot).

Angle to test: Show a repeated engineering mistake that institutional memory could prevent. (hypothesis)

Fit / gaps: Verify access controls, customer usage and the claimed commercial benefit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-085 / Graphify Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Code knowledge graphs and change verification for enterprise engineering teams.

Specific hook: An August founder post distinguishes open-source downloads from a reported commercial customer base. [source]

Founder / LinkedIn: Safi Shamsi. The distinction between open-source downloads and commercial customers. 2026-08-03. Older sample; current cadence unknown. 8,439 founder followers (guest snapshot).

Angle to test: Explain a change that passes local tests but violates a wider dependency. (hypothesis)

Fit / gaps: Customer counts are self-reported; current contract economics and the content gap need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-086 / Greypoint Industries

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Autonomous sensing systems for defense customers.

Specific hook: Its public description centers radio-signal detection and geolocation. [source]

Founder / LinkedIn: Darcy Zhang. Team progress and defense-industry collaboration. 2026-07-30. Older sample; current cadence unknown. 1,665 founder followers (guest snapshot).

Angle to test: Keep content at public buyer requirements and system-level procurement tradeoffs. (hypothesis)

Fit / gaps: Specialist government procurement and unverified contracts weaken ordinary campaign fit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-087 / Grip

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: CH

Business / buyers: Waste-handling robots for recycling operators.

Specific hook: It combines learned manipulation with hardware for irregular waste streams. [source]

Founder / LinkedIn: Jonas Gruetter. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the sorting-workflow angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies Switzerland, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-088 / Grocalo

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Content automation and distribution for professional creators.

Specific hook: Its business already focuses on audience-specific content production and distribution. [source]

Founder / LinkedIn: David Hwang. Work with creators and audience development. 2026-08-20. Older sample; current cadence unknown. 1,101 founder followers (guest snapshot).

Angle to test: No standard PostingMachine angle; consider only a separately scoped partnership discussion. (hypothesis)

Fit / gaps: Creator-focused buyers and an existing content engine conflict with the brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-089 / GUILD

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Manufacturing and contract execution for defense procurement.

Specific hook: It combines government contracts with automated aerospace-parts production. [source]

Founder / LinkedIn: Kaya Celebi. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain a public manufacturing bottleneck that prevents timely contract fulfillment. (hypothesis)

Fit / gaps: Government buying paths and active revenue need checking before a founder-content pitch.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-090 / Gutgutgoose

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Personalized gut testing and probiotic products for individuals.

Specific hook: Customers submit samples and receive products followed by repeat testing. [source]

Founder / LinkedIn: Leon Mojarrabi. Consumer gut testing and personalized probiotic development. 2026-07-03. Older sample; current cadence unknown. 3,135 founder followers (guest snapshot).

Angle to test: No standard B2B campaign angle is supported. (hypothesis)

Fit / gaps: Direct-to-consumer health acquisition falls outside the supplied brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-091 / hardware intelligence

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Chip-design simulation and debugging tools for engineering teams.

Specific hook: WaveZip reduces waveform storage while Wave assists chip debugging. [source]

Founder / LinkedIn: Athreya Anand. The launch of a terminal-based chip-debugging tool. 2026-07-14. Older sample; current cadence unknown. 5,009 founder followers (guest snapshot).

Angle to test: Explain why a failed chip simulation can be hard to inspect even with complete logs. (hypothesis)

Fit / gaps: Published performance figures need validation; paid design-team adoption is unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-092 / Hebbian Robotics

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Open infrastructure for robotics and physical-AI developers.

Specific hook: Its positioning emphasizes shared foundations for building useful robots. [source]

Founder / LinkedIn: Brandon Ong. A robotics-data collaboration and industry event. 2026-08-13. Older sample; current cadence unknown. 2,756 founder followers (guest snapshot).

Angle to test: Explain one repetitive infrastructure problem across different robot embodiments. (hypothesis)

Fit / gaps: The public description is broad and does not identify a proven paying product.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-093 / HERA

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Engineering workflow tools for industrial manufacturers.

Specific hook: YC describes use across energy equipment, robotics and pressure-vessel manufacturers. [source]

Founder / LinkedIn: Meera Patel. Preserving engineering knowledge held by experienced employees. 2026-07-30. Older sample; current cadence unknown. 4,533 founder followers (guest snapshot).

Angle to test: Show where a design or review error becomes an expensive factory correction. (hypothesis)

Fit / gaps: Time-saving claims and current customer relationships need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-094 / Hilstart

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Agent-assisted physical testing for hardware developers.

Specific hook: It connects AI agents to real hardware validation and debugging. [source]

Founder / LinkedIn: William A'court. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why a software test can pass while the physical device still fails. (hypothesis)

Fit / gaps: Commercial deployments and the buyer's repeatable budget are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-095 / Hop Aero

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Rocket-based cargo delivery for defense logistics.

Specific hook: It targets deliveries into contested or difficult-to-access locations. [source]

Founder / LinkedIn: Matija Milenovic. The founders' experience discussing rocket development. 2026-08-10. Older sample; current cadence unknown. 4,198 founder followers (guest snapshot).

Angle to test: Explain the public logistics tradeoff between delivery time and infrastructure dependence. (hypothesis)

Fit / gaps: A development-stage defense program may lack a near-term content-led sales motion.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-096 / Hoplite

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Cloud execution for teams using coding agents.

Specific hook: It moves familiar local development setups into cloud-based agent workflows. [source]

Founder / LinkedIn: Ryan Morrissey. Hands-on developer onboarding instead of scalable marketing alone. 2026-08-04. Older sample; current cadence unknown. 3,563 founder followers (guest snapshot).

Angle to test: Show what a developer loses when an agent runs in an unfamiliar environment. (hypothesis)

Fit / gaps: Confirm paid team use and distinct benefits beyond existing cloud agent platforms.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-097 / Hubble

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Medical-record retrieval for organizations coordinating patient information.

Specific hook: Its proposition joins fragmented records under an authorization workflow. [source]

Founder / LinkedIn: Prabha Dublish. Building the company in Seattle after YC. 2026-09-15. Older sample; current cadence unknown. 7,739 founder followers (guest snapshot).

Angle to test: Explain why a signed authorization still does not guarantee a complete medical history. (hypothesis)

Fit / gaps: Clarify the paying organization and current coverage before selecting an outreach claim.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-098 / HyperProbe

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Production debugging infrastructure for software engineering teams.

Specific hook: It collects targeted runtime state rather than relying only on existing logs. [source]

Founder / LinkedIn: Shailendra Singh. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Walk through an incident where the decisive variable was never logged. (hypothesis)

Fit / gaps: Confirm production customers and avoid claims of autonomous fixes without evidence.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-099 / Illume Labs

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Personal health and longevity assistance for consumers.

Specific hook: It combines wearable, laboratory and genomic data into individual updates. [source]

Founder / LinkedIn: Pari Latawa. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard B2B buyer angle is established by the current service. (hypothesis)

Fit / gaps: Consumer wellness acquisition is outside the supplied B2B brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-100 / IMPACT Drones

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Counter-drone protection for infrastructure operators and defense buyers.

Specific hook: It describes container-based interceptors designed for unattended site protection. [source]

Founder / LinkedIn: Jasper Lortije. A public interceptor prototype announcement. 2026-08-24. Older sample; current cadence unknown. 6,018 founder followers (guest snapshot).

Angle to test: Explain procurement concerns around protecting distributed critical sites. (hypothesis)

Fit / gaps: Verify deployments and customer access; public technical descriptions do not prove contracts.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-101 / Induction Labs

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Foundation-model research.

Specific hook: Its stated focus is models that learn through curiosity and experience. [source]

Founder / LinkedIn: Jonathan Li. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A technical research narrative is possible after a concrete product buyer emerges. (hypothesis)

Fit / gaps: A clear commercial product, paying customer and functioning GTM motion are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-102 / Inkbox

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Persistent identities and communication channels for AI-agent developers.

Specific hook: Agents receive their own messaging endpoints and agent-to-agent communication. [source]

Founder / LinkedIn: Ray Liao. Persistent agent identities and agent-to-agent communication. 2026-08-11. Older sample; current cadence unknown. 6,637 founder followers (guest snapshot).

Angle to test: Explain how an agent becomes accountable when it has a stable identity. (hypothesis)

Fit / gaps: Current paid usage and enterprise communication requirements remain open.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-103 / Insurf

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Health-insurance decision infrastructure for employers and other coverage buyers.

Specific hook: Its products connect cost-selection decisions with data from healthcare providers. [source]

Founder / LinkedIn: Bryan Chung. Comparing health plans by actual cost. 2026-08-20. Older sample; current cadence unknown. 2,282 founder followers (guest snapshot).

Angle to test: Explain why comparing plan prices is different from comparing actual coverage costs. (hypothesis)

Fit / gaps: Mixed consumer and employer positioning needs a verified B2B buyer.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-104 / Isengard Industries Inc

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Production systems for allied defense organizations.

Specific hook: Its public proposition centers local manufacturing of defense equipment at scale. [source]

Founder / LinkedIn: Francisco Serra-Martins. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Use public manufacturing and procurement lessons rather than technical operational details. (hypothesis)

Fit / gaps: Defense procurement maturity and contracted customers are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-105 / Jcode

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Coding-agent infrastructure for developers scaling concurrent work.

Specific hook: Its harness addresses memory constraints when many coding agents run together. [source]

Founder / LinkedIn: Jeremy Huang. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a swarm can stall on memory before it runs out of tasks. (hypothesis)

Fit / gaps: Stars and inference throughput are not the company's own recurring revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-106 / Kara

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Diamond materials for semiconductor, thermal and advanced-hardware buyers.

Specific hook: It begins with high-purity diamond wafers for demanding hardware environments. [source]

Founder / LinkedIn: Aarin Jhaveri. Founder feedback on the industrial-diamond business. 2026-08-16. Older sample; current cadence unknown. 5,904 founder followers (guest snapshot).

Angle to test: Explain which device constraint makes diamond useful beyond its hardness. (hypothesis)

Fit / gaps: Verify samples, customer qualification and commercial wafer availability.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-107 / Kebra

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Field-assistance and back-office automation for skilled-service organizations.

Specific hook: The founder describes learning directly from Quality Air technicians and back-office staff. [source]

Founder / LinkedIn: Luca Hadife. Learning from field technicians and a customer's back-office team. 2026-08-06. Older sample; current cadence unknown. 3,278 founder followers (guest snapshot).

Angle to test: Show how a technician's field observation becomes a usable warranty record. (hypothesis)

Fit / gaps: Customer fieldwork is a useful signal, but paid deployment and economic outcomes are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-108 / Lamb Labs

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Purpose-built inference chips for AI infrastructure customers.

Specific hook: Its architecture embeds model weights in silicon. [source]

Founder / LinkedIn: Niki Kotecha. The proposed chip architecture and its intended inference benefits. 2026-08-27. Older sample; current cadence unknown. 7,542 founder followers (guest snapshot).

Angle to test: Explain the tradeoff between fixed-model efficiency and general hardware flexibility. (hypothesis)

Fit / gaps: Commercial silicon, model-update constraints and customer evaluations are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-109 / Last Accounting Company

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: FI

Business / buyers: An AI-assisted accounting firm now branded Bear.

Specific hook: YC explicitly identifies Bear as the former Last Accounting Company. [source]

Founder / LinkedIn: Sami Laakkonen. The original accounting-company launch and founding team. 2026-06-26. Older sample; current cadence unknown. 2,300 founder followers (guest snapshot).

Angle to test: Retain an accountant-reviewed service angle for a separate non-US campaign. (hypothesis)

Fit / gaps: YC identifies Finland; update the name before any later outreach.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-110 / LATO

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Market research for investment firms and commercial decision makers.

Specific hook: It combines public data with a fund's context to investigate market behavior. [source]

Founder / LinkedIn: Tymek Staniszewski. Commercial due diligence for private-equity investors. 2026-08-20. Older sample; current cadence unknown. 3,893 founder followers (guest snapshot).

Angle to test: Show how a specific customer question changes an investment thesis. (hypothesis)

Fit / gaps: Confirm repeat commercial work and distinguish research output from investment results.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-111 / LemonLime

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Automated sales and marketing for small businesses.

Specific hook: It generates leads, outreach drafts and branded content. [source]

Founder / LinkedIn: Jordan Zietz. Automating daily operations for small businesses. 2026-09-07. Older sample; current cadence unknown. 4,610 founder followers (guest snapshot).

Angle to test: A founder-specific content angle needs a gap beyond its own automation product. (hypothesis)

Fit / gaps: Its service overlaps with the proposed channel, and small-business economics may be weak.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-112 / Levocred AI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operational AI workers for lenders and credit organizations.

Specific hook: Its scope includes servicing, underwriting, collections and back-office tasks. [source]

Founder / LinkedIn: Mohit Gupta. A lending-operations analyst working through existing communication tools. 2026-08-27. Older sample; current cadence unknown. 5,286 founder followers (guest snapshot).

Angle to test: Explain one lending exception that crosses several operational teams. (hypothesis)

Fit / gaps: The scope is broad; verify a live workflow and an identifiable buying role.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-113 / Libra Robotics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Robotic labor for solar and data-center infrastructure contractors.

Specific hook: YC describes working robots and a service model charging for completed work. [source]

Founder / LinkedIn: Jermaine Zhao. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the buyer's transition from purchasing equipment to purchasing completed tasks. (hypothesis)

Fit / gaps: Pilots and deployment claims need verification; do not equate every pilot with revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-114 / Litmus

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Human-capability assessment for employers and software organizations.

Specific hook: Its premise is evaluating how people direct AI-assisted work. [source]

Founder / LinkedIn: Shaivi Rau. A recruiting workflow using the capability-assessment product. 2026-08-20. Older sample; current cadence unknown. 10,388 founder followers (guest snapshot).

Angle to test: Explain why a static coding test may miss judgment during an agent-driven task. (hypothesis)

Fit / gaps: Identify actual hiring buyers, paid use and validity evidence. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-115 / Locke

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Government relations and procurement support for companies.

Specific hook: It combines policy expertise with AI systems and commercial execution. [source]

Founder / LinkedIn: Parth Badhwar. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a product team's problem becomes a policy or procurement question. (hypothesis)

Fit / gaps: Its existing influence services may already include a mature content and acquisition function.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-116 / Luca IQ

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Tax-calculation and filing infrastructure for accounting firms and fintech developers.

Specific hook: Its API combines deterministic tax computation with electronic filing. [source]

Founder / LinkedIn: Angelo Policicchio. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a tax calculation and a successfully accepted return are different deliverables. (hypothesis)

Fit / gaps: Authorization and accuracy claims need checking; paid customer volume is unknown.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-117 / Lumeria

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: At-home skin monitoring and product guidance for consumers.

Specific hook: A phone attachment captures skin changes across time. [source]

Founder / LinkedIn: Maryanne Alhallak. Consumer skin-product launch and initial demand. 2026-08-19. Older sample; current cadence unknown. 5,691 founder followers (guest snapshot).

Angle to test: No standard B2B campaign angle is supported by its current consumer product. (hypothesis)

Fit / gaps: Consumer skincare acquisition falls outside the supplied brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-118 / machine0

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Persistent cloud machines for developers running AI agents.

Specific hook: Its CLI provisions machines that agents can control and keep running. [source]

Founder / LinkedIn: Barnaby Malet. Reproducible machine configuration for agent workspaces. 2026-08-07. Older sample; current cadence unknown. 2,728 founder followers (guest snapshot).

Angle to test: Explain the infrastructure needs of an agent that works after a laptop closes. (hypothesis)

Fit / gaps: Confirm paid team use and differentiate the proposition from short-lived sandboxes.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-119 / Magma

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: A marketplace or service for companies monetizing agent interaction traces.

Specific hook: Its stated product turns agent traces into a sellable data asset. [source]

Founder / LinkedIn: Ramtin Shahzanian. A launch update describing agent-trace monetization. 2026-08-14. Older sample; current cadence unknown. 6,741 founder followers (guest snapshot).

Angle to test: Explain what makes a trace useful training data rather than a log file. (hypothesis)

Fit / gaps: Buyer demand, data permissions and commercial transactions are not established.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-120 / Maingen

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Industrial simulations for AI-model developers.

Specific hook: It builds environments modeled on factories, power facilities and data centers. [source]

Founder / LinkedIn: Phillip Yan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why an industrial decision needs feedback beyond a text answer. (hypothesis)

Fit / gaps: The reviewed material does not establish lab contracts or simulation fidelity.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-121 / Manifold

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Robotic warehouse work for logistics operators.

Specific hook: Its service model charges for completed picks rather than upfront equipment. [source]

Founder / LinkedIn: Nicolas Yeh. Usage-priced warehouse robotics and deployment barriers. 2026-07-08. Older sample; current cadence unknown. 1,839 founder followers (guest snapshot).

Angle to test: Explain what a warehouse manager needs to test before adopting robotic labor. (hypothesis)

Fit / gaps: Deployment speed and task coverage are vendor claims; confirm operating customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-122 / Marble

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Back-of-house operating software for restaurants and hospitality groups.

Specific hook: A September hiring post reports more than 150 venue signings within four months. [source]

Founder / LinkedIn: Aakar Khanna. Reported venue signings and hiring a founding engineer. 2026-09-14. Older sample; current cadence unknown. 5,607 founder followers (guest snapshot).

Angle to test: Show how a kitchen stock observation becomes a purchasing decision. (hypothesis)

Fit / gaps: Signed venues are self-reported and may not all be paying; assess multi-site buyer economics.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-123 / Marengo

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Engineering-design services for data-center developers.

Specific hook: YC reports early revenue and a larger contracted delivery pipeline. [source]

Founder / LinkedIn: Emil Ares. Design-sector recognition and outreach to data-center developers. 2026-08-24. Older sample; current cadence unknown. 8,569 founder followers (guest snapshot).

Angle to test: Explain which design handoff most often delays a data-center project. (hypothesis)

Fit / gaps: Distinguish recognized revenue from contract value and confirm delivery capacity.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-124 / Marker

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Agent implementation infrastructure and delivery services for enterprises.

Specific hook: Forward-deployed engineers use a platform spanning discovery through production. [source]

Founder / LinkedIn: David Pastewka. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show what changes between an impressive pilot and a maintained business workflow. (hypothesis)

Fit / gaps: Verify specific customer projects and avoid treating services scope as product traction.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-125 / Markov

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Expert computer-use training data for AI labs.

Specific hook: It records professionals operating CAD, design and enterprise software. [source]

Founder / LinkedIn: Dev Mandal. A discussion of the company's data and research direction. 2026-04-03. Older sample; current cadence unknown. 4,638 founder followers (guest snapshot).

Angle to test: Explain why expert workflows contain decisions that click coordinates alone miss. (hypothesis)

Fit / gaps: Download figures and lab relationships are company-reported and not contract proof.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-126 / Mass Magnetics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Domestically produced magnetic materials for industrial and defense manufacturers.

Specific hook: Its process turns rare-earth scrap into permanent magnets. [source]

Founder / LinkedIn: Eric Silver. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the procurement tradeoff between domestic supply and material performance. (hypothesis)

Fit / gaps: Manufacturing capacity, customer qualification and compliance claims need verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-127 / Mentlio

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI-development cost and productivity intelligence for engineering leaders.

Specific hook: It links per-engineer AI spending with delivery and routing decisions. [source]

Founder / LinkedIn: Ashank Shah. The company launch and early engineering users. 2026-04-05. Older sample; current cadence unknown. 3,437 founder followers (guest snapshot).

Angle to test: Explain why token savings alone do not measure engineering return. (hypothesis)

Fit / gaps: Savings are vendor-reported; confirm the measurement method and customer evidence.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-128 / Meteoric

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Weather-modification drone development for energy and resilience applications.

Specific hook: Its initial proposition is clearing clouds over solar farms. [source]

Founder / LinkedIn: Mete Karslioglu. A short product-launch announcement. 2026-08-21. Older sample; current cadence unknown. 2,505 founder followers (guest snapshot).

Angle to test: Explain what an operator would need to validate before buying weather intervention. (hypothesis)

Fit / gaps: Scientific efficacy, approvals and commercial deployments are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-129 / Mireye

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Location-data infrastructure for AI agents and commercial site decisions.

Specific hook: It connects fragmented geographic, utility and policy information. [source]

Founder / LinkedIn: Ansh Chokshi. Location analysis for agent-driven business decisions. 2026-08-07. Older sample; current cadence unknown. 5,523 founder followers (guest snapshot).

Angle to test: Show how a site-selection answer changes when power and county rules are considered together. (hypothesis)

Fit / gaps: Confirm a paying use case and coverage before assuming broad demand.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-130 / Mochi

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: AI-generated anime creation and entertainment for fans.

Specific hook: Its adoption metrics describe creators, series and social viewing. [source]

Founder / LinkedIn: Robert Qiu. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard business-buyer content angle is supported. (hypothesis)

Fit / gaps: Consumer entertainment and creator acquisition fall outside the brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-131 / Molagri

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: CA

Business / buyers: Precision pesticide development for agricultural buyers.

Specific hook: It targets pest-specific molecular mechanisms and resistance behavior. [source]

Founder / LinkedIn: Zaky Hassan. The launch of a pest-control approach. 2026-08-03. Older sample; current cadence unknown. 4,728 founder followers (guest snapshot).

Angle to test: Retain the crop-protection education angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies Canada, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-132 / Moonshot

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Personal AI assistance for iPhone users.

Specific hook: Its context collection is designed around an individual's daily life. [source]

Founder / LinkedIn: Ojas Kandhare. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard B2B commercial angle is supported by the current proposition. (hypothesis)

Fit / gaps: Consumer personal assistance falls outside the supplied brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-133 / Mosaic

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Shared context and collaboration for software teams using coding agents.

Specific hook: It preserves decisions and session history across developers and agents. [source]

Founder / LinkedIn: Shubham Patil. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what the next developer needs to know beyond the final code diff. (hypothesis)

Fit / gaps: Public attention does not establish paid team adoption or an unsolved content gap.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-134 / Most Robotic

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Household robotics research.

Specific hook: Its public description emphasizes a research team and household automation. [source]

Founder / LinkedIn: Claire Mao. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A technical narrative becomes commercially useful only after a buyer or licensing route is clear. (hypothesis)

Fit / gaps: No sufficiently defined B2B product or paid GTM motion was established.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-135 / Moving Atoms

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Simulation and world-model tools for robotics research teams.

Specific hook: Its model supports simulated robot actions for generating training experience. [source]

Founder / LinkedIn: Shehryar Saroya. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain which rare physical scenarios are hardest to collect manually. (hypothesis)

Fit / gaps: Model capabilities, customer use and training value need validation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-136 / MusicArena

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Music-model evaluations and crowdsourced comparisons.

Specific hook: The public proposition centers benchmarking generated music and production. [source]

Founder / LinkedIn: Kevin Yao. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what a music-production evaluation measures beyond listener preference. (hypothesis)

Fit / gaps: The paying lab or enterprise buyer is not established by the public benchmark.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-137 / NebuSec

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI security testing for enterprises.

Specific hook: Its team advertises offensive-security experience and agent-focused defense capabilities. [source]

Founder / LinkedIn: Eten Zou. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Use a public, non-operational failure pattern to explain continuous security evaluation. (hypothesis)

Fit / gaps: Team credentials and bug bounties do not establish current enterprise contracts.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-138 / Neuromorphic

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Laboratory automation robots for research organizations.

Specific hook: Its robots aim to operate existing workstations rather than require a rebuilt lab. [source]

Founder / LinkedIn: Vatan Aksoy Tezer. The robotics team's formation and YC admission. 2026-07-19. Older sample; current cadence unknown. 3,953 founder followers (guest snapshot).

Angle to test: Show the handoff between two instruments that conventional lab automation struggles with. (hypothesis)

Fit / gaps: Verify actual laboratory deployments and distinguish demonstrations from repeatable use.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-139 / Neuron Industries

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Industrial control hardware for plant and automation teams.

Specific hook: It aims to replace traditional controllers with an AI-oriented architecture. [source]

Founder / LinkedIn: Dennis Ren. A new physical workspace for industrial-controller development. 2026-09-22. Older sample; current cadence unknown. 2,257 founder followers (guest snapshot).

Angle to test: Explain the practical work between a controls change and a safe commissioned process. (hypothesis)

Fit / gaps: Commercial availability and safety validation are not established by positioning.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-140 / Nex

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Revenue-operations agents for commercial teams.

Specific hook: Its workflows cover qualification, CRM upkeep, routing and forecasting. [source]

Founder / LinkedIn: Najmuzzaman (Nazz) Mohammad. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain a broken lead handoff from first interest to accountable ownership. (hypothesis)

Fit / gaps: Its own GTM capabilities may overlap with managed content; verify a distinct gap.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-141 / Nori

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Affordable mobile robots for households and businesses.

Specific hook: The proposition combines an inexpensive robot with teachable tasks. [source]

Founder / LinkedIn: Antonio Sitong Li. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A business-operator story needs a specific worksite task and an existing paying segment. (hypothesis)

Fit / gaps: Mixed consumer positioning and unverified deployment economics make fit uncertain.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-142 / Olam Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Simulation and evaluations for frontier-model labs.

Specific hook: It builds complex environments and a public human-agent game arena. [source]

Founder / LinkedIn: Om Buddhdev. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what a multi-agent interaction reveals that single-task tests miss. (hypothesis)

Fit / gaps: A public arena does not prove commercial lab adoption.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-143 / Omanta

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Personalized research services for individual patients.

Specific hook: It assembles research resources around unresolved or difficult diagnoses. [source]

Founder / LinkedIn: Alfredo Gonzalez. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No ordinary B2B acquisition angle is established by its patient-facing proposition. (hypothesis)

Fit / gaps: Direct patient services fall outside the supplied B2B brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-144 / OneCLI

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: IL

Business / buyers: Controlled business-work agents for enterprise teams.

Specific hook: It combines cross-application actions with approval rules and logged access. [source]

Founder / LinkedIn: Jonathan Fishner. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the enterprise-approval angle for a separately scoped geography campaign. (hypothesis)

Fit / gaps: YC identifies Israel, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-145 / OneTriangle

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Inference infrastructure for AI-product teams.

Specific hook: Its architecture emphasizes moving and reusing cached model state. [source]

Founder / LinkedIn: Hannah Chung. Inference optimization and the proposed cache architecture. 2026-08-24. Older sample; current cadence unknown. 5,488 founder followers (guest snapshot).

Angle to test: Explain why serving costs depend on more than the model's headline token price. (hypothesis)

Fit / gaps: Cost and latency comparisons are vendor claims; paid use is unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-146 / Ooak Data

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Enterprise data preparation for AI-agent training and evaluation.

Specific hook: It turns internal business data into realistic tasks for agent testing. [source]

Founder / LinkedIn: Pierre-Louis Vouteau. Turning company workflows into realistic agent-training environments. 2026-06-16. Older sample; current cadence unknown. 3,519 founder followers (guest snapshot).

Angle to test: Explain the gap between a generic benchmark and the company's actual work. (hypothesis)

Fit / gaps: Data permissions, deployment maturity and paying customers need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-147 / OpenRelay

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Hardware-independent inference infrastructure for AI teams.

Specific hook: An August founder post describes preparing a production inference cluster for a customer. [source]

Founder / LinkedIn: Jaden Wang. Preparing infrastructure for a customer's production inference workload. 2026-08-02. Older sample; current cadence unknown. 1,417 founder followers (guest snapshot).

Angle to test: Show the decisions hidden behind serving one model across different chips. (hypothesis)

Fit / gaps: A reported production workload is promising; current savings and paid retention remain unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-148 / OpenTag

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: A company-context assistant embedded in Slack.

Specific hook: It combines work execution with automatic knowledge-base updates. [source]

Founder / LinkedIn: Tony Kam. A short team-management product update. 2026-09-18. Older sample; current cadence unknown. 3,759 founder followers (guest snapshot).

Angle to test: Explain why answering yesterday's question is different from maintaining today's answer. (hypothesis)

Fit / gaps: Verify team adoption, permissions and a clear advantage over existing workplace assistants.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-149 / OpenVector

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Vision automation for industrial and operational camera users.

Specific hook: It adds task-specific event detection to existing camera feeds. [source]

Founder / LinkedIn: Andrey Gizdov. A founder opinion on improving vision models; no content gap established. 2026-09-11. Older sample; current cadence unknown. 11,032 founder followers (guest snapshot).

Angle to test: Show how a stalled physical workflow becomes an actionable alert. (hypothesis)

Fit / gaps: Avoid superlative performance claims; verify deployed sites and false-alert handling. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-150 / Operon

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Facility knowledge infrastructure for manufacturing and process industries.

Specific hook: An October founder post launches mobile plant-diagram agents developed with design partners. [source]

Founder / LinkedIn: Anderson Chen. Launching plant-diagram engineering agents with mobile support. 2026-10-06. Within the 30-day window. 4,587 founder followers (guest snapshot).

Angle to test: Explain how an engineer traces an equipment question back to the right drawing. (hypothesis)

Fit / gaps: Design-partner involvement is not proof of paid deployment; current contracts remain unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-151 / Orchestra

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Inference hosting and small-model optimization for AI-product businesses.

Specific hook: It trains and deploys smaller models when they outperform a costly baseline. [source]

Founder / LinkedIn: Luis Manrique. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the evidence required before replacing a frontier model in one workflow. (hypothesis)

Fit / gaps: The headline cost reduction is not a guaranteed customer result.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-152 / OS3

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Lower-cost mobile robotics for business operators.

Specific hook: Its proposition combines hardware affordability with robot-training data. [source]

Founder / LinkedIn: Rishabh Chanana. Press recognition and early hardware-testing experiences. 2026-09-03. Older sample; current cadence unknown. 8,748 founder followers (guest snapshot).

Angle to test: Explain which real business task can justify the first robot deployment. (hypothesis)

Fit / gaps: Affordability alone does not establish reliable deployments or a paying segment.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-153 / Osseus

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: GB

Business / buyers: Biomedical datasets and evaluations for AI labs.

Specific hook: Its focus includes clinical data and reinforcement-learning environments. [source]

Founder / LinkedIn: Anish Mariathasan. The founder's healthcare-AI direction and accelerator admission. 2026-06-20. Older sample; current cadence unknown. 3,162 founder followers (guest snapshot).

Angle to test: Retain the health-model evaluation story for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies the United Kingdom, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-154 / Pacific

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Modular data-center infrastructure for power and project owners.

Specific hook: It proposes putting unused power at delayed projects to work with deployable compute. [source]

Founder / LinkedIn: Harper Dammann Smith. A first-cluster plan, infrastructure development and hiring. 2026-08-10. Older sample; current cadence unknown. 4,753 founder followers (guest snapshot).

Angle to test: Explain why a powered site can be valuable before its original project is complete. (hypothesis)

Fit / gaps: Deployment timelines, financing and customer contracts need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-155 / Palette

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI-assisted media production and distribution for brands.

Specific hook: It combines generation with distribution and iterative optimization. [source]

Founder / LinkedIn: Josephine Lee. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A founder-led B2B strategy angle requires a gap beyond its own media engine. (hypothesis)

Fit / gaps: Its product already addresses content production; budget ownership and overlap need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-156 / Palisade

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operating-system vulnerability detection and remediation for device-fleet owners.

Specific hook: It analyzes system-level signals across distributed endpoints. [source]

Founder / LinkedIn: Fnu Prince. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a fleet can remain exposed after conventional application checks pass. (hypothesis)

Fit / gaps: Security efficacy and production customer references require verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-157 / Pango

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operations agents for e-commerce businesses.

Specific hook: Its workflows include delivery exceptions and returns. [source]

Founder / LinkedIn: Steve Rahimi. Delivery and returns automation with a product-demo invitation. 2026-07-24. Older sample; current cadence unknown. 5,259 founder followers (guest snapshot).

Angle to test: Show how a customer return creates work across commerce and logistics systems. (hypothesis)

Fit / gaps: Confirm merchant scale and contract value rather than assuming all stores fit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-158 / Parasma

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Biological computing research.

Specific hook: Its stated direction is training human brain cells to perform computation. [source]

Founder / LinkedIn: Sean Cole. The biological-computing research direction and accelerator admission. 2026-06-26. Older sample; current cadence unknown. 1,115 founder followers (guest snapshot).

Angle to test: A research explanation needs a defined commercial customer and measurable service first. (hypothesis)

Fit / gaps: The reviewed material does not establish an available B2B product or paid GTM.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-159 / Peer

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Freight brokerage for commercial shippers.

Specific hook: It covers quoting, carrier selection, tracking and exception handling. [source]

Founder / LinkedIn: Aaron Zhang. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what changes when a shipment stops following the original plan. (hypothesis)

Fit / gaps: Confirm shipment customers and distinguish operational execution from product claims.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-160 / Pennant

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Governance and proxy-voting intelligence for institutional investors and public companies.

Specific hook: A September founder post describes visiting institutional clients and recruiting additional ones. [source]

Founder / LinkedIn: Ryan Nowicki Stewart. Visiting institutional clients and developing governance workflows. 2026-09-14. Older sample; current cadence unknown. 4,552 founder followers (guest snapshot).

Angle to test: Explain a governance decision where policy consistency matters more than a generic recommendation. (hypothesis)

Fit / gaps: Client activity is self-reported; contract economics and the buying committee need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-161 / Perceptron ML

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Private, firm-specific AI systems for legal practices.

Specific hook: Its workflows span intake, matter work and primary-source grounding. [source]

Founder / LinkedIn: Michael Marcotte. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why a legal answer needs source verification before it reaches a client. (hypothesis)

Fit / gaps: Verification promises and current law-firm deployments require confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-162 / Petrarch

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Critical-infrastructure training environments for AI labs.

Specific hook: It transforms de-identified enterprise records into model tasks and environments. [source]

Founder / LinkedIn: Ian Lee. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why operational records reveal decisions absent from generic benchmarks. (hypothesis)

Fit / gaps: Rights, de-identification and customer contracts are not established by the description.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-163 / Pluto

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Professional discovery infrastructure for hiring and matching.

Specific hook: A voice interview captures experience and intent beyond a conventional resume. [source]

Founder / LinkedIn: Sahil Seth. Why professional matching needs more context than a resume. 2026-08-27. Older sample; current cadence unknown. 19,664 founder followers (guest snapshot).

Angle to test: Explain what a hiring team misses when it filters only job titles. (hypothesis)

Fit / gaps: Mixed candidate and company positioning requires a verified employer revenue model. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-164 / Poth Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Customer-behavior research for product teams.

Specific hook: It combines internal data with adaptive user feedback to test hypotheses. [source]

Founder / LinkedIn: Mojmir Horvath. Connecting customer feedback with behavior and account context. 2026-07-22. Older sample; current cadence unknown. 1,740 founder followers (guest snapshot).

Angle to test: Show a product problem where analytics reveals the symptom but interviews explain the cause. (hypothesis)

Fit / gaps: Confirm actual product-team use and research-quality evidence.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-165 / Praxis Robotics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Real-world training data for robotics and model developers.

Specific hook: It captures work across industrial and residential environments through business partnerships. [source]

Founder / LinkedIn: Rohan Seelamsetty. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why collecting authentic work differs from staging a demonstration. (hypothesis)

Fit / gaps: Reported reach is not confirmed contract volume; validate rights and paid use.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-166 / Prescience, Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Employer health-benefits infrastructure.

Specific hook: Its proposition combines plan operation and healthcare support for companies. [source]

Founder / LinkedIn: Rishab Jain. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a finance leader can compare benefit cost with employee access. (hypothesis)

Fit / gaps: Savings and healthcare claims need plan-specific evidence and current employer references.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-167 / PRINCEPS

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: GB

Business / buyers: Insurance for compute infrastructure and financing risks.

Specific hook: It focuses on outages, service obligations and GPU asset values. [source]

Founder / LinkedIn: Conrad Frøyland Moe. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the compute-risk education angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies the United Kingdom, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-168 / Prized

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Persistent cloud development machines for software teams.

Specific hook: It syncs files locally while retaining remote machines and terminal sessions. [source]

Founder / LinkedIn: Hudson Griffith. A brief cloud-development product launch. 2026-07-14. Older sample; current cadence unknown. 1,912 founder followers (guest snapshot).

Angle to test: Show the practical difference between a remote shell and a workspace that feels local. (hypothesis)

Fit / gaps: Verify paid team use and distinguish convenience from an enterprise buying need.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-169 / Prodigy Research

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Quantitative trading research.

Specific hook: Its public description emphasizes an internally developed finance model and trading performance. [source]

Founder / LinkedIn: Michael Wang. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: An institutional research angle needs an explicit external product or buyer. (hypothesis)

Fit / gaps: Proprietary trading returns do not establish a B2B sales motion or client revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-170 / Proprio Robotics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Robotics for data-center construction and maintenance operators.

Specific hook: It targets physical technician tasks across the facility lifecycle. [source]

Founder / LinkedIn: Anirudh Pai. Physical automation needs in the data-center buildout. 2026-06-30. Older sample; current cadence unknown. 2,750 founder followers (guest snapshot).

Angle to test: Explain one maintenance task that limits the pace of compute deployment. (hypothesis)

Fit / gaps: Customer installations and task reliability are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-171 / ProvenMetal

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Circuit-board manufacturing for industrial product teams.

Specific hook: It combines procurement, design-for-manufacture review and assembly. [source]

Founder / LinkedIn: Johnny Doyle. A company pivot into domestic circuit-board manufacturing. 2026-06-23. Older sample; current cadence unknown. 2,477 founder followers (guest snapshot).

Angle to test: Show how a small design or sourcing issue turns into a missed hardware milestone. (hypothesis)

Fit / gaps: Delivery speed claims and manufacturing capacity need customer confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-172 / Qlo

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Underwriting operations agents for commercial insurers.

Specific hook: It shares accounts, rules, documents and permissions between staff and agents. [source]

Founder / LinkedIn: Ryan Hu. Untouched underwriting opportunities and insurance-industry presentations. 2026-09-17. Older sample; current cadence unknown. 1,430 founder followers (guest snapshot).

Angle to test: Explain the operational work surrounding a risk decision before discussing automation. (hypothesis)

Fit / gaps: Separate current workflow assistance from future underwriting autonomy.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-173 / Radley

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: An AI-assisted radiology practice.

Specific hook: YC describes an acquisition intended to bring an existing revenue base into the practice. [source]

Founder / LinkedIn: Maryam Jahed. A brief introduction to the radiology-practice proposition. 2026-08-18. Older sample; current cadence unknown. 3,377 founder followers (guest snapshot).

Angle to test: Explain how operational agents can reduce administrative load around radiologist work. (hypothesis)

Fit / gaps: Verify acquisition completion; prospective annualized revenue is not current recognized revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-174 / Rapidfolio

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Back-office automation for banks and fintech companies.

Specific hook: Its scope includes fraud investigations, identity checks and lending operations. [source]

Founder / LinkedIn: Naveen Qureshi. The founder's motivation to build another financial-operations company. 2026-09-29. Within the 30-day window. 3,560 founder followers (guest snapshot).

Angle to test: Show what makes an investigation auditable after several automated steps. (hypothesis)

Fit / gaps: Confirm live financial-institution workflows and avoid unsupported accuracy claims.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-175 / Rasyn

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Formulation-design models for industrial chemicals and materials.

Specific hook: It treats multi-ingredient products as a search problem over possible mixtures. [source]

Founder / LinkedIn: Ansh Tiwari. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why optimizing one ingredient can make the whole formulation worse. (hypothesis)

Fit / gaps: Commercial formulation customers and validated performance need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-176 / Rational

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Automated accounting services for businesses.

Specific hook: Its proposition covers intake, bookkeeping and tax filing using AI workers. [source]

Founder / LinkedIn: Jibril Moinuddin. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the exceptions that make a bookkeeping workflow hard to finish automatically. (hypothesis)

Fit / gaps: Autonomy and savings are vendor claims; verify professional oversight and current clients.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-177 / RealPact

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Transaction administration for real-estate brokerages.

Specific hook: It gathers property records, prepares documents and tracks transaction deadlines. [source]

Founder / LinkedIn: Ranvir Deshmukh. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show how a missing property record creates work across a closing. (hypothesis)

Fit / gaps: Confirm brokerage deployments and avoid treating automated paperwork as legal review.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-178 / rekursiv.ai

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: AI research agents and autonomous scientific discovery.

Specific hook: It describes iterative agent teams whose findings improve later research. [source]

Founder / LinkedIn: Joshua Dillon. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a reproducible discovery differs from a plausible research suggestion. (hypothesis)

Fit / gaps: Benchmarks do not establish a commercial product or recurring B2B customers.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-179 / Rex

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Managed receivables operations for enterprise finance teams.

Specific hook: Agents and finance specialists handle disputes, remittances and customer portals. [source]

Founder / LinkedIn: Merlin Kafka. Press recognition of the receivables-operations business. 2026-09-03. Older sample; current cadence unknown. 6,198 founder followers (guest snapshot).

Angle to test: Show why a valid invoice can still sit unpaid when its supporting work is incomplete. (hypothesis)

Fit / gaps: Confirm active enterprise clients and distinguish service execution from software features.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-180 / Riften

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Model selection, evaluation and private-model infrastructure for AI organizations.

Specific hook: It combines workload evaluation with company-specific model development. [source]

Founder / LinkedIn: Carl Stauffer. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why the best model changes when a customer's task changes. (hypothesis)

Fit / gaps: The proposition is broad; verify a concrete paid workflow and differentiated result.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-181 / Rindler

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: A desktop workspace for developers managing multiple coding agents.

Specific hook: Maxxwell focuses on approvals, progress visibility and stalled sessions. [source]

Founder / LinkedIn: Michael Serrano. An older web-automation product launch; current positioning has changed. 2026-07-09. Older sample; current cadence unknown. 2,899 founder followers (guest snapshot).

Angle to test: Explain how human attention becomes the bottleneck after several agents run at once. (hypothesis)

Fit / gaps: An older founder post describes web automation, while current positioning is a coding-agent workspace; avoid stale personalization.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-182 / Rise Reforming

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Chemical production technology for industrial and energy buyers.

Specific hook: Its process aims to convert biogas into locally supplied chemicals. [source]

Founder / LinkedIn: George Rose. The chemical-process company's scale-up direction. 2026-07-13. Older sample; current cadence unknown. 1,598 founder followers (guest snapshot).

Angle to test: Explain why a low-value waste gas can matter to chemical supply resilience. (hypothesis)

Fit / gaps: Commercial plant progress and offtake contracts are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-183 / Risklytics

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Insurance for robotics, data centers and other frontier-technology businesses.

Specific hook: An October founder post introduces a tracker for AI-related insurance exclusions. [source]

Founder / LinkedIn: Samuel Gold. An insurance-exclusion tracker for frontier-technology founders. 2026-10-02. Within the 30-day window. 2,301 founder followers (guest snapshot).

Angle to test: Explain the operational fact that changes whether a robotics risk can be insured. (hypothesis)

Fit / gaps: The launch is current within the research window; binding capability and paid customers still need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-184 / Robocurve

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Independent robotics evaluations for model developers and buyers.

Specific hook: It seeks reproducible job-level benchmarks rather than curated demo comparisons. [source]

Founder / LinkedIn: Jay Chooi. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how a buyer distinguishes a compelling video from reliable task performance. (hypothesis)

Fit / gaps: Open benchmarks do not establish paid evaluation demand or recurring revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-185 / RonanRx Inc.

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Direct-to-patient pharmaceutical manufacturing and care.

Specific hook: Its description explicitly centers manufacturing medication and selling to patients. [source]

Founder / LinkedIn: Lloyd Armbrust. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard B2B acquisition angle is established. (hypothesis)

Fit / gaps: Patient acquisition is outside the supplied brief; growth claims do not change that fit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-186 / Salem Robotics Inc

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Inspection and measurement robots for hazardous industrial facilities.

Specific hook: Its robots perform site work and create auditable inspection records. [source]

Founder / LinkedIn: Caleb Horan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the handoff from a required inspection to a usable compliance record. (hypothesis)

Fit / gaps: Verify contracted deployments and distinguish a supervised trial from independent operation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-187 / screenpipe

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Work-context capture and automation for companies using AI agents.

Specific hook: It turns recorded computer work into searchable knowledge and reusable automation. [source]

Founder / LinkedIn: Louis Beaumont. Using captured work history to review how time was spent. 2026-10-02. Within the 30-day window. 11,681 founder followers (guest snapshot).

Angle to test: Explain how a repeated employee workflow can become an agent task. (hypothesis)

Fit / gaps: Current enterprise deployments, consent and an unsolved content gap need checking. Audience exceeds 10,000; exception required.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-188 / Shielded

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Supply-chain risk intelligence for large enterprises.

Specific hook: It connects market events with supplier, product and margin exposure. [source]

Founder / LinkedIn: . No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why the same tariff can affect two suppliers differently. (hypothesis)

Fit / gaps: Large-company positioning and decision impact need specific customer evidence.

Sources: Company / YC. Checked 29 Oct 2026.

PM-189 / Shiraz AI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Adaptable factory robots for contract manufacturers.

Specific hook: Its proposition teaches new tasks from a human demonstration. [source]

Founder / LinkedIn: Navid Aghasadeghi. The factory-robotics company launch. 2026-08-12. Older sample; current cadence unknown. 3,659 founder followers (guest snapshot).

Angle to test: Explain why weekly line changes make conventional automation difficult. (hypothesis)

Fit / gaps: Task-learning performance and paying factory deployments are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-190 / Sidekick

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Text-based operational assistance for custom manufacturers.

Specific hook: An August founder example describes a machine-health warning turning into an operational response. [source]

Founder / LinkedIn: Justin So. A machine-health event becoming an operational response. 2026-08-28. Older sample; current cadence unknown. 7,958 founder followers (guest snapshot).

Angle to test: Show how a veteran technician's knowledge becomes accessible during a shift. (hypothesis)

Fit / gaps: Treat the example as company-reported; verify the deployment and permissions behind any autonomous action.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-191 / Skymerse

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Flight-operations information and decision support for airlines.

Specific hook: Notamify is described as already serving airline customers and pilots. [source]

Founder / LinkedIn: Damian Szumski. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why receiving an aviation notice is different from knowing its flight impact. (hypothesis)

Fit / gaps: Airline references and safety-related claims need verification before outreach use.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-192 / Snowstone

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operational analysis for private-equity firms and portfolio companies.

Specific hook: Its reports tie improvement findings back to company data. [source]

Founder / LinkedIn: . No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show how a margin-improvement hypothesis becomes an evidence-backed operating decision. (hypothesis)

Fit / gaps: Delivery-speed and impact claims require an actual completed engagement.

Sources: Company / YC. Checked 29 Oct 2026.

PM-193 / SpaceFlow Technologies, Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Procurement execution services for physical-goods businesses.

Specific hook: It aims to carry sourcing work through to realized savings in existing systems. [source]

Founder / LinkedIn: Emre Isik. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why identifying a cheaper supplier does not guarantee the saving reaches the P&L. (hypothesis)

Fit / gaps: Confirm active procurement engagements and measured savings.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-194 / Spectre Intelligence

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: A proprietary trading firm developing AI traders.

Specific hook: Its current description centers trading its own strategies. [source]

Founder / LinkedIn: Michelle Li. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No conventional customer-acquisition angle is supported without an external product. (hypothesis)

Fit / gaps: A proprietary trading operation is not the required B2B GTM business.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-195 / Speko

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Speech-model routing infrastructure for voice-agent developers.

Specific hook: It compares speech and language models by language and use case behind one API. [source]

Founder / LinkedIn: Beknazar Abdikamalov. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why the best voice stack changes when the caller's language changes. (hypothesis)

Fit / gaps: Benchmark leadership and production adoption need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-196 / Standard Machines

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Chip-design evaluation and training environments for AI labs.

Specific hook: Its tasks focus on advanced semiconductor design. [source]

Founder / LinkedIn: Jacob Peake. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain what makes a chip-design answer verifiable rather than merely plausible. (hypothesis)

Fit / gaps: Paying lab customers and task validation are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-197 / Stoa

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: GPU pricing and trading infrastructure for commercial hardware buyers.

Specific hook: Its live request-for-quote marketplace connects buyers and vetted dealers. [source]

Founder / LinkedIn: Berat Celik. How opaque GPU quotes complicate price discovery. 2026-07-31. Older sample; current cadence unknown. 4,361 founder followers (guest snapshot).

Angle to test: Explain how an operator compares a GPU quote beyond the headline price. (hypothesis)

Fit / gaps: A live marketplace does not prove liquidity, repeat transactions or suitable margins.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-198 / Studio

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Market-response simulations for brands and commercial decision makers.

Specific hook: It models connected audience segments using behavioral evidence. [source]

Founder / LinkedIn: Nikita Mullangi. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain where a simulated audience should be checked against real purchase behavior. (hypothesis)

Fit / gaps: Prediction accuracy and customer results need independently reviewable evidence.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-199 / SubVysion

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Underground utility mapping for construction contractors.

Specific hook: Autonomous rovers create detailed maps intended to reduce excavation uncertainty. [source]

Founder / LinkedIn: Maxwell Stone. Underground utility mapping and the company's formation. 2026-07-10. Older sample; current cadence unknown. 1,923 founder followers (guest snapshot).

Angle to test: Show what a contractor needs to know before a safe excavation decision. (hypothesis)

Fit / gaps: Accuracy, deployed projects and contractor contracts require verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-200 / Sunflower

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Addiction-focused telemedicine and consumer support.

Specific hook: Its current proposition combines a clinic with an individual support application. [source]

Founder / LinkedIn: Koby Conrad. Consumer advertising experimentation; not a B2B demand signal. 2026-06-14. Older sample; current cadence unknown. 25,026 founder followers (guest snapshot).

Angle to test: No standard B2B buyer angle is established by the reviewed service. (hypothesis)

Fit / gaps: Consumer and patient acquisition fall outside the supplied brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-201 / Synapse Semiconductor

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Semiconductor research and vision hardware for advanced-device developers.

Specific hook: Its first work combines sensing and computation within a new device approach. [source]

Founder / LinkedIn: Sanjeev Chauhan. A vision sensor combining image capture with computation. 2026-07-28. Older sample; current cadence unknown. 3,338 founder followers (guest snapshot).

Angle to test: Explain the data movement avoided when sensing and computation happen together. (hypothesis)

Fit / gaps: Commercial devices, customer evaluations and current product scope remain unclear.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-202 / TareBio

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Vaccine-platform research for possible pharmaceutical development partners.

Specific hook: Its public progress describes an end-to-end platform and preclinical animal results. [source]

Founder / LinkedIn: Eta Atolia. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how an observed immune response becomes a candidate design input. (hypothesis)

Fit / gaps: Preclinical evidence is not a clinical result or a proven B2B sales motion.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-203 / Tarifflo Inc.

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Customs filing, tariff recovery and trade intelligence for importers.

Specific hook: It combines entry filing with opportunities to recover tariff payments. [source]

Founder / LinkedIn: Bryce Judy. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why completing a customs entry does not mean the importer paid the correct tariff. (hypothesis)

Fit / gaps: Confirm current customer use and substantiate any recovery claim individually.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-204 / tash

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Trading-card investment products for individual investors.

Specific hook: It packages selection, storage and resale into a portfolio proposition. [source]

Founder / LinkedIn: John Ohannesian. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard business-buyer content angle is established. (hypothesis)

Fit / gaps: Consumer collectibles investing falls outside the supplied B2B brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-205 / Tenor

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Execution and learning infrastructure for businesses operating AI workflows.

Specific hook: It captures actions and outcomes as part of the same operating loop. [source]

Founder / LinkedIn: Hamze Al-Zamkan. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why an agent's completed action is not the same as a business result. (hypothesis)

Fit / gaps: The broad full-stack claim needs one verified production use case.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-206 / Tensr

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Contract manufacturing for robotics companies.

Specific hook: YC describes an operating factory and active customer orders. [source]

Founder / LinkedIn: Eric Berndt. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show where robot assembly gets delayed between a working design and repeat production. (hypothesis)

Fit / gaps: Factory and customer claims are self-reported; check current capacity and relationships.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-207 / Tokenless

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Evaluation-quality research and tools for AI-training teams.

Specific hook: It detects flaws that let models exploit rewards instead of solve intended tasks. [source]

Founder / LinkedIn: Rohit Agarwal. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain a benign example of a model passing an evaluation for the wrong reason. (hypothesis)

Fit / gaps: Commercial lab adoption and repeat paid projects remain unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-208 / Torus

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Engineering assistance for infrastructure designers and project owners.

Specific hook: YC describes work with large companies on energy and data-center projects. [source]

Founder / LinkedIn: Marcus Lima. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain one review bottleneck between an engineering design and an approved project. (hypothesis)

Fit / gaps: Customer relationships and acceleration claims need confirmation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-209 / Touchmark

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Reserved inference-capacity trading for AI teams and providers.

Specific hook: Buyers reserve tokens for a time window and can resell unused capacity. [source]

Founder / LinkedIn: Ilia Bolgov. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain when a fixed capacity commitment is more useful than an on-demand discount. (hypothesis)

Fit / gaps: Marketplace liquidity, enforceable supply and actual transactions are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-210 / TovenAI

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Compliance operations agents for institutional trading organizations.

Specific hook: YC describes live workflows and connectors into existing communication and trading systems. [source]

Founder / LinkedIn: Batu Balci. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how an exception travels from a monitored communication to a documented review. (hypothesis)

Fit / gaps: Institutional references are company-reported; confirm the exact use and permissions.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-211 / Traceforce

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Security visibility and controls for companies using AI applications.

Specific hook: It monitors AI-app use across company devices. [source]

Founder / LinkedIn: Xia Hua. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the new visibility problem when sensitive work moves into an AI application. (hypothesis)

Fit / gaps: Deployment coverage and prevention claims need security-team validation.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-212 / Tracer

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Model-coordination research for organizations seeking efficient AI.

Specific hook: It combines open models through adaptive inference and coordinated systems. [source]

Founder / LinkedIn: Adam Rida. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain when several smaller models can outperform one expensive default. (hypothesis)

Fit / gaps: Research capability does not establish an externally sold product or enterprise traction.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-213 / Trident

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Security testing agents for cloud and application teams.

Specific hook: It links verified weaknesses into attack paths across connected environments. [source]

Founder / LinkedIn: Junaid Mahmood. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why a list of isolated findings can hide the real business exposure. (hypothesis)

Fit / gaps: Avoid operational attack detail; customer use and finding quality need verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-214 / Trope

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Custom ERP agents for mid-market companies.

Specific hook: Its deployment process learns each company's customized systems before building workflows. [source]

Founder / LinkedIn: Matthew Chow. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain why the final ERP integration is different in every customer organization. (hypothesis)

Fit / gaps: Confirm completed deployments and separate bespoke services from repeatable software.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-215 / TryNearby

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Creator visits and social promotion for local restaurants.

Specific hook: Its service automatically connects venues with nearby creators. [source]

Founder / LinkedIn: Yousef Abdelfattah. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard founder-to-enterprise-buyer angle fits the supplied campaign. (hypothesis)

Fit / gaps: Local-business acquisition, creator distribution and channel overlap conflict with the brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-216 / Tsenta

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Job-search and application assistance for individual candidates.

Specific hook: Its current users are job seekers applying through an automated career agent. [source]

Founder / LinkedIn: Agnay Srivastava. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: No standard B2B buyer angle is supported by the current service. (hypothesis)

Fit / gaps: Consumer career assistance falls outside the supplied brief despite reported revenue.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-217 / Ultrasonium

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Metal-parts production technology for industrial hardware buyers.

Specific hook: It targets complex parts that are difficult for conventional methods to produce. [source]

Founder / LinkedIn: Jack Qiu. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain where geometry changes force a manufacturer into a slower production method. (hypothesis)

Fit / gaps: Production economics and commercial customer orders need verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-218 / Verdant

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Permitting-workflow agents for local governments.

Specific hook: YC reports processed applications and paid deployments in several states. [source]

Founder / LinkedIn: Aidan Ng. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain which judgment calls make permitting harder than ordinary form processing. (hypothesis)

Fit / gaps: Paid-use claims are company-reported; verify purchasing routes and current renewals.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-219 / Verdict Machine

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: IL

Business / buyers: Digital-asset security and transaction controls for financial institutions.

Specific hook: It evaluates proposed transactions against live institutional policies. [source]

Founder / LinkedIn: Dan Danay. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the institutional-security angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies Israel, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-220 / Vernius Systems, Inc.

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Radar hardware for unmanned defense systems.

Specific hook: Its first product is described with substantial letters of intent. [source]

Founder / LinkedIn: Arthur Nguyen-cao. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Focus public content on manufacturing and procurement readiness. (hypothesis)

Fit / gaps: Letters of intent are not revenue; verify commercial delivery and an appropriate buyer route.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-221 / Vestris

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Closing and title-processing automation for real-estate service firms.

Specific hook: It automates work from contract intake through the title workflow. [source]

Founder / LinkedIn: Joshua Tang. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show how one title exception creates follow-up work across a closing. (hypothesis)

Fit / gaps: Confirm title-shop customers and contract economics before claiming strong fit.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-222 / Waddle Labs

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Robot task-programming agents for robotics developers.

Specific hook: A natural-language request is converted into executable robot code. [source]

Founder / LinkedIn: Hanming Ye. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain the work between requesting a task and safely demonstrating it on hardware. (hypothesis)

Fit / gaps: Task-speed claims and paid robot integrations need verification.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-223 / Waybill

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: IN

Business / buyers: Procurement and inventory execution for deep-technology teams.

Specific hook: It handles sourcing, approvals, payment and shipment tracking from parts lists. [source]

Founder / LinkedIn: Rishi Laddha. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the hardware-procurement angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies India, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-224 / Whitespace

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Operations agents for wholesale distributors.

Specific hook: Its starting workflows include inventory planning and customer service. [source]

Founder / LinkedIn: Alex Tung. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Show why an inventory decision needs both demand context and customer commitments. (hypothesis)

Fit / gaps: Current distributor deployments and the breadth of autonomous actions need checking.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-225 / Wondering

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: US

Business / buyers: Personalized learning content for individual users.

Specific hook: It turns chosen subjects into short lessons and interactive activities. [source]

Founder / LinkedIn: Cheng-Wei Hu. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: An employer-learning angle would require a separate, verified product. (hypothesis)

Fit / gaps: The current consumer learning proposition is outside the supplied brief.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-226 / WonderTx

BORDERLINE BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Drug-discovery research focused on orally available molecules.

Specific hook: Its strategy targets pathways already supported by human therapeutic evidence. [source]

Founder / LinkedIn: Abraham Heifets. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: A partner-facing narrative could explain delivery constraints without claiming clinical success. (hypothesis)

Fit / gaps: Commercial partnerships and a functioning B2B sales motion are unverified.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-227 / Zaplar

EXCLUDE BUSINESS FIT / Excluded / YC COUNTRY: SE

Business / buyers: Hotel operating software.

Specific hook: Its platform seeks to combine booking, property and other hotel systems. [source]

Founder / LinkedIn: Douglas Solberg. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Retain the hotel-stack angle for a separate geography campaign. (hypothesis)

Fit / gaps: YC identifies Sweden, outside the current US-company filter.

Sources: Company / YC / Founder profile. Checked 29 Oct 2026.

PM-228 / Zomma

POTENTIAL BUSINESS FIT / Review needed / YC COUNTRY: US

Business / buyers: Managed financial-services operations using computer-use agents.

Specific hook: Agents work inside the same review screens as human analysts. [source]

Founder / LinkedIn: Jihyun Kim. No dated, identity-matched founder post was verified in the bounded search. Posting frequency and audience size remain unknown.

Angle to test: Explain how an agent handles a review when no system integration is available. (hypothesis)

Fit / gaps: Verify real institutional customers, oversight and the exact workflows currently live.
